SPECIAL PROGRAM CONSIDERATIONS

POLLUTION ABATEMENT

The military construction projects in this program will be designed to meet environmental standards. Military construction projects proposed primarily for abatement of existing pollution problems at Naval and Marine Corps installations have been reviewed to ensure that corrective design is accomplished in accordance with specific standards and criteria.

ENERGY CONSERVATION

The military construction projects proposed in this program will be designed for minimum energy consumption.

FLOODPLAIN MANAGEMENT AND WETLANDS PROTECTION

Proposed land acquisition, disposals, and installation construction projects have been planned to allow the proper management of floodplains and the protection of wetlands by avoiding long and short-term adverse impacts, reducing the risk of flood losses, and minimizing the loss or degradation of wetlands. Project planning is in accordance with the requirements of Executive Order Nos. 11888 and 11990.

DESIGN FOR ACCESSIBILITY OF PHYSICALLY HANDICAPPED PERSONNEL

In accordance with Public Law 90-480, provisions for physically handicapped personnel will be provided for, where appropriate, in the design of facilities included in this program.

PRESERVATION OF HISTORICAL SITES AND STRUCTURES

Facilities included in this program do not directly or indirectly affect a district, site, building, structure, object or setting listed in the National Register of Historic Places, except as noted on DD Form 1391.

PLANNING IN THE NATIONAL CAPITAL REGION

Projects located in the National Capital Region are submitted to the National Capital Planning Commission for budgetary review and comment as part of the commission's annual review of the Future Years Defense Program (FYDP). Construction projects within the District of Columbia, with the exception of the Bolling/Anacostia area, are submitted to the Commission for approval prior to the start of construction.

ENVIRONMENTAL PROTECTION

In accordance with Section 102(2)(c) of the National Environmental Policy Act of 1969 (Public Law 91-190), the environmental impact analysis process has been completed or is actively underway for all projects in the military construction program.

ECONOMIC ANALYSIS

Economics are an inherent aspect of project development and design of military construction projects. Therefore, all projects included in this program represent the most economical use of resources. Where alternatives can be evaluated, a primary economic analysis was prepared and the results indicated on the DD Form 1391.

CONSTRUCTION CRITERIA MANUAL

Project designs conform to Part II of Military Handbook 1190, "Facility Planning and Design Guide".

CONGRESSIONAL REPORT REQUIREMENTS

a. Naval War College, Newport, RI - Navy is directed to allocate \$50,000 during FY 1993 to complete design work on alternatives for library stack space. Project is to be funded during FY 1994. HASC Report 102-527, dated 19 May 1992, page 307. MILCON requirement being determined.

b. San Diego, CA - Navy is directed to install ultra-low flush toilets in all new family housing and to begin installation in existing units. CAC Report 102-888, dated 22 September 1992, pages 18 and 19. Direction incorporated into design criteria.

c. St. Inigoes, MD - Navy is directed to release funds for construction of the Electronics System Integration Laboratory and ACLS Integration and Test Facility. HASC Report 102-580, dated 18 June 1992, page 8, and HASC Report 102-527, dated 19 May 1992, page 308. Projects

DEPARTMENT OF THE NAVY
FY 1994 MILITARY CONSTRUCTION PROGRAM

SPECIAL PROGRAM CONSIDERATIONS

are scheduled for construction award in FY 1993.

d. Bremerton, WA - Navy is directed to provide family practice residency relocatable buildings utilizing urgent minor construction funds. HAC Report 102-580, dated 18 June 1992, page 8. Coordinating with Defense Medical Facilities Office for project execution.

e. NS Mayport, FL - The House Committees recommended \$1,350,000 of the funds provided for planning and design be utilized for a facility study and initiation of design to upgrade the Mayport Naval Station to be capable of homeporting nuclear-powered aircraft carriers. HAC Report 102-580, dated 18 June 1992, page 8, and HASC Report 102-527, dated 19 May 1992, page 307. MILCON requirement being determined.

f. NAS Patuxent, MD - Committee recommends \$10,000,000 as the initial phase of construction of an Advanced System Integration Facility. Remaining construction funds are to be included in the FY 1994 budget request. HAC Report 102-580, dated 18 June 1992, page 8. MILCON requirement being determined.

g. Whidbey Island, WA - Assess requirement and include funds for design of 300 units of family housing in FY 1994 request. SAC Report 102-355, dated 23 July 1992, page 20; CASC Report 102-966, dated 1 October 1992, page 790; and Public Law 102-484, Section 2208, dated 23 October 1992. Family housing requirement being determined.

h. Great Lakes, IL - Within funds available for unspecified minor construction, the Navy is directed to allot \$730,000 for Wastewater Treatment Facilities. CAC Report 102-888, dated 22 September 1992, page 8. Requirements being determined.

NON-MILCON CONSTRUCTION

The following is in response to the requirement on page 24 of the FY 1988 Senate Appropriations Committee Report 100-200 and page 1006 of the FY 1988 Committee of Conference, House and Senate Appropriation Committees Report 100-498:

- a. Operation and Maintenance, Navy
Maintenance and Repair, \$453,300,000.
Minor Construction, \$52,200,000.
- b. Operation and Maintenance, Marine Corps
Maintenance and Repair, \$127,200,000.
Minor Construction, \$19,000,000.
- c. Research and Development, Navy, \$45,000,000
- d. Aircraft Procurement, Navy, \$0.

RESOLUTION TRUST CORPORATION

Following guidance provided in the Senate Armed Services Committee Report No. 101-384 on the National Defense Authorization Act for FY 1991, a review was accomplished with the results that the requirements of the projects contained in this budget request could not be more economically met through the purchase of assets of the Resolution Trust Corporation or any similar entity.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Seven-story steel frame control tower, insulated metal wall panels, built-up roofing over insulation and metal roof decking; one-story reinforced concrete, steel frame operations building, built-up roofing supported by metal roof decking; one and one-half story aircraft fire rescue station and shed, built-up roofing supported by metal roof decking; pile foundations, fire sprinkler and communications systems, elevator for control tower, air conditioning, and utilities; operations building with instrument flight room, equipment room, administration, and maintenance areas; aircraft fire rescue station includes five truck stalls, bunkrooms, kitchen, dining room, showers and administration area; shed includes five stalls for vehicle maintenance and storage of fire rescue equipment.				
11. REQUIREMENT: <u>13,330</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF PROJECT: Provides an airfield control tower, operations building, and an aircraft fire rescue station with a facility for housing personnel and equipment. (Current mission.) REQUIREMENT: Adequate facilities for control of aircraft traffic. The tower must have unobstructed line-of-sight of the activity airfield approach area, runways, taxiways, aircraft parking areas and all other areas where aircraft movements must be controlled. An operations building with an Instrument Flight Room (IFR), Precision Approach Radar (PAR) equipment and a Ground Control Approach (GCA) system is also required. The aircraft fire rescue station will be adjacent to the control tower and will have direct access to the station runways, taxiways, and aircraft parking ramps. It must have alarms which can be activated either by the control tower or locally from administrative offices or parking bays. CURRENT SITUATION: Because of its location and age, the existing control tower is no longer adequate as an aircraft control center. The tower line-of-sight to				

(CONTINUED ON DD 1391C)

3. INSTALLATION AND LOCATION/UIC: NOO236 NAVAL AIR STATION, ALAMEDA, CALIFORNIA		
4. PROJECT TITLE CONTROL TOWER COMPLEX		5. PROJECT NUMBER P-053
11. REQUIREMENT: (CONTINUED) <u>CURRENT SITUATION: (CONTINUED)</u> runways, taxiways, parking aprons, and approach/departure flight zones is obstructed and requires controllers to rely on air crew reports instead of visual interpretation of existing conditions. The existing control tower has major blind spots to the approach area and the first 3,000 feet of the secondary runway because of the existing row of hangars. Also, a new hangar has been added that further reduces the visual coverage of the secondary runway, and a new stripping and paint hangar now blocks the visual approach to the primary runway. Site constraints dictated the siting of these functions at these locations. Pilot incident reports filed over a number of years shows an average of 1.5 near-misses per month. The tower is outdated, inadequate in size, and limited in space for the required equipment and personnel. The current tower cannot be raised high enough to see over the hangars. Television equipment is only a temporary, poor substitute for the required visual line of site, that is now operating under a safety waiver. The aircraft fire rescue station is a substandard facility attached to the existing control tower operations building. Further, the 1989 earthquake damaged the existing crash, fire rescue station beyond repair so that the firemen's quarters had to be demolished. Firefighters are now living in inadequate trailers under a time response waiver to reach their equipment. <u>IMPACT IF NOT PROVIDED:</u> Continued use of the existing control tower with obstructed line-of-sight, resulting in limited capability of controllers to spot potential air traffic hazards and to notify air crews. The present situation lends itself to a very high potential for loss of life accidents. The fire rescue station response time will continue to be impaired by current operating conditions. The results could be loss of life, aircraft, and facilities.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story concrete and masonry addition on concrete slab, built-up roof, air conditioning, sound attenuation, raised computer flooring, utilities, fire protection system, elevator, emergency generator, paved equipment aprons, parking, and minor alterations to existing facilities to functionally accommodate addition.				
11. REQUIREMENT: <u>17,110</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: (<u>4,460</u>) SF <u>PROJECT:</u> Provides facilities to support air traffic and range control at this station and the Marine Corps Base, Camp Pendleton. (Current mission.) <u>REQUIREMENT:</u> A collocated Radar Air Traffic Control Facility and Range Operations Facility is required to allow for the control and monitoring of air traffic, and to provide safe, expeditious and orderly movement of aircraft under all weather and lighting conditions. Additionally, it will provide for the coordinated and combined activities of land, air, and naval forces during simulated and live fire training. <u>CURRENT SITUATION:</u> Air traffic control is currently provided by deployable, combat essential assets. Should deployment occur, this air space would not have radar control. The requirement to retain tactical units for air control services severely restricts their ability to train in a tactical manner. Range control is provided in inadequate and dispersed facilities at MCB Camp Pendleton. Positive control for range safety is intermittent. Coordination of land and air units is haphazard. Access to radar data and a centralized facility will greatly enhance the performance of this function and the safety of range participants. <u>IMPACT IF NOT PROVIDED:</u> Continued use of inadequate, dispersed facilities with deployable assets providing stopgap services. Inefficient use of ranges will continue. The potential for aircraft mishaps, both military and civilian, will remain high. An unsafe, haphazard and uncoordinated use of air space

10. DESCRIPTION OF PROPOSED CONSTRUCTION Automated field firing range with underground cabling for Remoted Engagement Target System (RETS) installation, public address system, target system with stationary and moving infantry targets, control tower with air conditioning, utilities, access road, lighting, and removal of existing bunker.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Constructs an automated infantry platoon assault field firing range to accommodate procurement of RETS. (Current mission.) <u>REQUIREMENT:</u> Adequate facilities to replace antiquated ranges and provide state-of-the-art targeting systems in support of training objectives. The range is required for infantry platoon assault training, familiarization of various weapons, and to maintain proficiency in field firing techniques. <u>CURRENT SITUATION:</u> There are no existing facilities capable of supporting this training. Most of the existing ranges were constructed in the 1950's and some have outdated targeting systems. These ranges are old and deteriorated and cannot accommodate the RETS hardware. Marines receive classroom training and specialized instructions on new weapons and training techniques but actual training is conducted on outdated ranges. The RETS hardware provides moving targets and instantaneous feedback to the shooters unlike the existing systems which provide neither. The feedback capability of RETS informs the shooter of where the rounds are impacting, reducing the expenditure of ammunition, and allowing for detailed critiques at the conclusion of training. <u>IMPACT IF NOT PROVIDED:</u> Continued use of existing ranges, adversely affecting combat and live fire proficiency, the quality of marksmanship, training, and combat readiness.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Eighteen-inch underground water line with pressure reducing valve stations, flow meter fittings, excavation and backfill.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Improves the water distribution system to provide adequate water supply and pressure to the Del Mar area of Camp Pendleton for fire protection, operations, health, and safety requirements. (Current mission.) <u>REQUIREMENT:</u> Adequate water supply and pressure control measures to meet current needs. The housing and other areas of Del Mar do not have adequate water pressure during peak hours (0530 to 2200). Facilities are dependent on sufficient water supply and pressure required for operations, fire protection, health, and safety. <u>CURRENT SITUATION:</u> The existing water line that serves Del Mar also serves the South Mesa and Wire Mountain housing areas of Camp Pendleton. Currently, there are 1,990 housing units in Wire Mountain, 330 of which were recently completed. This has put an additional strain on the water line, causing reduced pressure to Del Mar, impacting fire protection and sanitary requirements. <u>IMPACT IF NOT PROVIDED:</u> Del Mar will continue to be a high risk area with reduced fire protection and potential unsanitary conditions. <u>ADDITIONAL:</u> In addition to the proposed construction, a connection to the Del Mar area from Oceanside was considered. However, an economic analysis was performed, and the connection to the existing Booster Station was found to be more cost-effective.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story reinforced concrete and masonry addition, pile foundation, concrete slab floor, metal roof, air conditioning, sound attenuation, seismic provisions, fire protection system, utilities, parking, demolition of two buildings.				
11. REQUIREMENT: <u>6,630</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provides an addition to a hangar shop and maintenance administration space to support one F/A-18 squadron. (Current mission.) <u>REQUIREMENT:</u> Adequate hangar space and associated facilities to support the maintenance of the newer, larger F/A-18 aircraft assigned to the West Coast operational F/A-18 fighter squadron. <u>CURRENT SITUATION:</u> Existing hangar was constructed to support smaller and less sophisticated aircraft than the F/A-18, and cannot support this aircraft adequately. Some hangar shop and administration functions must be performed in buildings remote from the hangar. <u>IMPACT IF NOT PROVIDED:</u> Because maintenance of F/A-18 fighters is impeded by the lack of adequate facilities, squadron efficiency and safety is hampered. Ineffective procedures are caused by shop crowding and use of the ramp for hangar functions. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Two type F, earth-covered, reinforced concrete missile magazines; roads, tarmacs, loading docks, lightning protection system and utilities.				
11. REQUIREMENT: <u>38,200</u> SF ADEQUATE: <u>9,250</u> SF SUBSTANDARD: <u>0</u> SF				
<u>PROJECT:</u> Constructs two magazines for storing HARM missiles. (New mission.) <u>REQUIREMENT:</u> Adequate magazine space for the secure, safe and efficient storage of HARM missiles. Intermediate level maintenance performed on these air-launched missiles at the Annex requires storage of the missiles in the all-up-round (AUR) configuration in magazines. Missiles are received from the manufacturer or Fleet and placed into storage pending testing or repair. Upon completion of the testing or repair, the ready-for-issue missile is stored in AUR mode pending issue to the Fleet. There is a requirement for two magazines in this year's program to meet the projected HARM missile storage requirements. <u>CURRENT SITUATION:</u> Most magazines at the annex are for conventional ordnance. Because of their size, small loading docks, door openings and interior columns, these magazines are functionally inadequate for the storage of assembled missiles. Of the remaining magazines capable of accommodating missiles, only six were specifically designed for missile storage and are utilized to 95 percent capacity. One of these magazines was provided for HARM missiles in the Fiscal Year 1989 Military Construction Program. There is no additional missile magazine space to satisfy upcoming storage requirements for the HARM air-launched missiles. <u>IMPACT IF NOT PROVIDED:</u> Adequate storage of HARM missiles in projected quantities will not be possible. Missiles may be jam stowed in magazine aisles, resulting in the inability to timely retrieve or store missiles and complete required maintenance. The safety of personnel working in the magazines will also be compromised. Reduced availability of these missiles could have an

10. DESCRIPTION OF PROPOSED CONSTRUCTION Automatic fire protection sprinkler system and alarm systems.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides fire protection systems in six warehouses to meet National Fire Protection Association (NFPA) standards. (Current mission.) <u>REQUIREMENT:</u> Modern, efficient fire protection systems for warehouses located at the National City Annex to conform with NFPA standards for indoor storage of general and combustible materials. These systems are required to protect the health and safety of military and civilian personnel, the buildings, as well as essential supplies and equipment for afloat and ashore units. <u>CURRENT SITUATION:</u> A fire protection engineering survey verified these warehouses have deficient fire protection systems that are not in compliance with current NFPA standards. An automatic fire sprinkler system does not exist, and the fire alarm system is deteriorated, unreliable, and inadequate. <u>IMPACT IF NOT PROVIDED:</u> Failure to provide the necessary fire protection systems will risk loss of worker's lives, the buildings, and commodities stored therein. In the event of a fire, the destruction of buildings and stored commodities would seriously hamper operations of the Fleet, shore activities, and the Center.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story reinforced concrete and masonry building with concrete spread footings, concrete block walls, built-up roof, utilities, security fencing and lighting, access roadway, attached canopy, and demolition of three buildings.				
11. REQUIREMENT: <u>14,000</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provide adequate warehouse facilities to support the Weapon and Field Training Battalion (WFTB) at the Edson Range Area of Camp Pendleton. (Current mission.) <u>REQUIREMENT:</u> As a part of the recruit training program, all recruits must complete ten days of field training exercises conducted by the WFTB. Because of the cyclical nature of the training, the facility will be used 49 weeks a year. Each recruit is issued individual field equipment (782 gear). Adequate warehouse facilities are required for storage, issuance, receipt, inspection, repair, accounting, and safeguarding of these items. <u>CURRENT SITUATION:</u> Three semi-permanent Marine Corps Equipment Storage Shelters (MCESS) have functioned as warehouses since the WFTB relocated in May 1989. The asphalt paving that serves as the building floor surface for the MCESS does not provide adequate structural support, which results in shelving and other heavy equipment settling into the paving. The long, narrow floor plan of the buildings create problems with storage in relation to the maneuvering requirements of the material handling equipment. As the MCESS are not water-tight and lack proper ventilation, \$80,000 is spent annually replacing water-damaged equipment. The buildings do not meet electrical codes, and electrical fires have occurred in the buildings. The buildings show signs of stress during wind storms. The MCESS are attached to the ground with spikes, and the total weight of the building may not be enough to counteract a strong wind load. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story building, concrete piling and footings, concrete slab on compacted fill; open web steel joists, metal decking, rigid insulation and elastomeric roof; fire protection system, utilities, fenced outdoor play area, and parking.				
11. REQUIREMENT: <u>20,640</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF PROJECT: Provides a child development center for 246 infants, toddlers, and pre-school age dependent children of military personnel and patients on base. (Current mission.) REQUIREMENT: Adequate facilities to support a child development center. A child development center provides supervised care for infants, pre-school and school age children in a common facility when parents are at work or at times when the family is unable to care for them. Child development centers are a necessary element in today's environment as their availability alleviates many problems incurred by military parents who are single, who both work or who have other special needs. These centers make the quality of service life more appealing to military personnel and their dependents. CURRENT SITUATION: The existing facility, located in the old hospital pediatrics department, is inadequate and provides care for only 73 children. There are no kitchen facilities and no meals can be served. There are not enough toilets and the only ventilation comes from open windows. In addition, there is no direct access to the outside ground level for several rooms. The hospital compound is located in the center of downtown San Diego and day care is needed for 246 children. The hospital is surrounded by a golf course, Balboa Park, and low income housing and businesses. No other civilian care facilities are in reasonable proximity to the hospital, and many families are forced to seek care in private homes.				

(CONTINUED ON DD 1391C)

1. COMPONENT NAVY	FY 1994 MILITARY CONSTRUCTION PROGRAM	2. DATE																						
3. INSTALLATION AND LOCATION/UIC: NOO259 NAVAL HOSPITAL, SAN DIEGO, CALIFORNIA																								
4. PROJECT TITLE CHILD DEVELOPMENT CENTER		5. PROJECT NUMBER P-102																						
11. REQUIREMENT: (CONTINUED) <u>IMPACT IF NOT PROVIDED:</u> The existing inadequate facility will continue to operate in overcrowded, inadequate conditions which cannot meet current demands for child care. The lack of adequate child care facilities is a detriment to the welfare and morale of personnel and adversely affects retention.

10. MISSION OR MAJOR FUNCTIONS:	
Provide housing, training facilities, logistical, and administrative support for Fleet Marine Force units and other units assigned. Operate the Communication-Electronics School, and administer and conduct the air-ground training program for combined training of Fleet Marine Force units, both active and reserve.	

11. OUTSTANDING POLLUTION AND SAFETY DEFICIENCIES: (\$000)

10. DESCRIPTION OF PROPOSED CONSTRUCTION Anti-armor tracking range with control tower, weather shelter, ammunition handling pad, head facility, three target carrier houses, two target carrier track beds with earth berms and retaining walls, and utilities; stabilize tracking roads.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Modernizes an automated anti-armor tracking and live fire range to accommodate procurement of the Remoted Engagement Target System (RETS). (Current mission.) <u>REQUIREMENT:</u> Adequate facilities to provide state-of-the-art ranges and targeting systems in support of Marine Corps training objectives. This range is required for familiarization and proficiency training with the DRAGON and TOW light to heavy anti-armor weapons systems. <u>CURRENT SITUATION:</u> There is no firing range at this center which can support this training. The existing range is old and deteriorated and cannot accommodate the RETS hardware. Marines receive classroom training and specialized instructions on new weapons and training techniques but actual training is conducted on outdated ranges. The RETS hardware provides moving targets and instantaneous feedback to the shooters unlike the existing systems which provide neither. The feedback capability of RETS informs the shooter of where the rounds are impacting, which reduces the expenditure of ammunition and also allows for detailed critiques at the conclusion of training. <u>IMPACT IF NOT PROVIDED:</u> Training for the Fleet Marine Force (FMF) units assigned to this center and to the units participating in the combined arms exercises at this center cannot be accomplished. Continued use of existing ranges adversely affecting combat and live fire proficiency, quality of marksmanship, training, and combat readiness.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story concrete building, concrete foundation, metal deck roofing, utilities, air conditioning, emergency generator, provision for intrusion detection system, cleaning tables, loading dock, security lighting and fencing, fire protection system, and demolition of four buildings.				
11. REQUIREMENT: <u>22,440</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Constructs an armory to provide secure storage for individual and crew-served weapons of the Seventh Marine Regiment. (Current mission.) <u>REQUIREMENT:</u> Secure storage and maintenance space for personal and crew-served weapons, machine guns, and mortars of the Seventh Marine Regiment, which was relocated to this center from Camp Pendleton. <u>CURRENT SITUATION:</u> There is no space available to meet this requirement. Weapons are currently stored in leased interim relocatable shelters not designed for weapons storage. These modular storage units provide no weapon maintenance space, have insufficient environmental control, and do not meet basic security requirements. Security waivers have been issued to permit these interim facilities to be used with armed guards 24 hours a day. <u>IMPACT IF NOT PROVIDED:</u> Weapons storage will remain in inadequate temporary facilities. Weapons will not meet required standards of readiness because of inadequate climate control and lack of maintenance space. Inadequate security will continue to place weapons at risk, requiring round-the-clock guards. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Modernize portions of ten buildings including upgrading shower and head facilities, doors, walls, floors, roofs, utilities, plumbing and electrical systems, fire protection systems, windows, air conditioning; lead paint and asbestos removal.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Modernizes housing to provide adequate billeting for 1,149 personnel assigned to the station. This modernization is less than 20 percent of the cost of new construction. (Current mission.) <u>REQUIREMENT:</u> Adequate housing meeting current DoD standards. <u>CURRENT SITUATION:</u> Existing adequate berthing capacity is insufficient and results in overcrowding. Up to four or five persons are living in rooms authorized for two or three, with additional personnel living onboard submarines. After modernization of the spaces requested by this project, a new construction deficiency of 1,207 spaces will exist. This remaining projected space deficit will be satisfied by follow-on projects currently planned for the mid-1990's. <u>IMPACT IF NOT PROVIDED:</u> Adequate living quarters for enlisted personnel will continue to be unavailable, resulting in degradation of morale, training, and career retention efforts. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Install transformer, circuit breakers, lightning arrestors; upgrade utility feeders; relocate control cable and electrical distribution feeders; enclose deaerator tanks; replace switchgear; resistance grounding; capacitors; pier cabling, switchgear, outlets and primary capacitors.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Upgrades base electric power distribution system. (Current mission.) <u>REQUIREMENT:</u> Reliable, flexible electrical distribution system to support existing and projected electrical demands for base operations, Fleet support, squadrons reassigned from State Pier and Scotland, and increased loading because of reduced mission tempo. <u>CURRENT SITUATION:</u> The existing base utility system is utilized for peak-shaving purchased commercial utility power and for emergency power generation in the event of a commercial power outage. Various system components require improvements or upgrades. The existing system does not have the flexibility, capacity, or protective devices to adequately and safely support projected demand. <u>IMPACT IF NOT PROVIDED:</u> Existing system components will be unable to fulfill their intended design to carry the total demand. The system will be unreliable and not flexible enough to support mission requirements, resulting in negative impacts to base operations and Fleet support.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Steam driven turbine electric power generator including condenser, piping, valves, controls and metering; structural and electrical system modifications; utilities.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides a 7,000-kilowatt (KW) steam turbine generator with ancillary equipment and necessary plant modifications. (Current mission.) <u>REQUIREMENT:</u> Adequate uninterrupted electrical service ashore, adequate facilities for peak shaving, and adequate facilities for emergency conditions in support of base operations, fleet direct support facilities, squadrons reassigned from State Pier and Scotland, and increased port loading because of reduced mission tempo. <u>CURRENT SITUATION:</u> The electric power generating capability is insufficient to support the base wide demand when purchased commercial power is down. Existing Navy generation capacity can support the afloat units, but not shore facilities. As the base continues its development, the capability of the power plant to support all activities during commercial power outages becomes less effective. Load shedding drills have established that no more than ten percent reduction in the ashore facilities can be achieved without significant impact on operations. Existing electrical generating capability is also insufficient for providing economical peak shaving. Peak demands have resulted in high penalty costs. To avoid this penalty, the base utilizes its own generating capability to shave off the peaks, thereby keeping purchased power within an acceptable range and realizing savings of nearly \$1.0 million per year. <u>IMPACT IF NOT PROVIDED:</u> Submarines and ashore facilities will be without essential power during commercial power outages. Savings resulting from peak shaving will not be realized.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story building with special pile foundation, concrete slab on grade, load bearing masonry walls; steel joist roof structural system with rigid insulation and built-up roofing; interior steel columns, fire protection system; heating, ventilating, and air conditioning system; utilities, fenced outdoor play area, and parking.				
11. REQUIREMENT: <u>8,000</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provides a child care center for 100 pre-school age children and infants of the military population within the Naval District Washington. (Current mission.) <u>REQUIREMENT:</u> An adequate and centralized child care facility to serve the military personnel of this activity. A child development center provides supervised care for infants, pre-school, and school age children in a common facility, on a regularly scheduled or drop-in basis, when parents are employed or at times when the family is temporarily unable to care for them. Child development centers are a necessary element in today's environment, as their availability alleviates many problems incurred by military parents who are single, who both work, or who have other special needs. These centers make the quality of life more appealing to military personnel and their dependents. <u>CURRENT SITUATION:</u> This activity has no adequate child care facilities. Children are presently cared for in expensive commercial facilities or in unlicensed, informal private home arrangements where the child's safety and the quality of care being provided cannot be assured. Based on recent surveys, there is a need for child development centers to support 726 children in the National Capital Region. One center exists at Bellevue Housing, supporting 60 children, and a FY 1992 Military Construction project at Anacostia will provide space for an additional 300 children.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Automatic fire sprinkler system, water booster pump, new fire alarm system, upgrade underground water distribution piping system; and replace open exterior stairs.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Upgrades the fire protection system in an administrative office building. (Current mission.) <u>REQUIREMENT:</u> A modern and efficient fire protection system conforming to National Fire Protection Association (NFPA) standards to protect the health and safety of personnel as well as avoid the destruction of critical defense communications equipment. <u>CURRENT SITUATION:</u> Originally designed as a warehouse, this 45-year old building has been converted to administrative office space and is being used by the Defense Communication Agency. Because it is on the Navy's plant account, the Navy is responsible for improvements and maintenance. Since the building is now being used for office space, the safety standards are much stricter than when the building was used for warehouse functions. The building does not meet NFPA life safety code standards as there is no automatic fire sprinkler system, and the exterior egress stairs are structurally unsafe. In addition, the fire alarms must be consolidated so that the entire building is alerted to fire. <u>IMPACT IF NOT PROVIDED:</u> A continued risk of loss of lives, loss of the building, and the destruction of vital defense communications equipment, which would seriously impede this activity's mission. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story steel frame building, pile foundation, concrete floors, built-up roof, masonry walls, sensitive compartmented information facility (SCIF) construction, raised computer flooring, high-bay area, 15-ton bridge crane with 60' hook height, radio frequency shielded anechoic chamber, computer software laboratory, special environmental control system, isolated and filtered electrical utility system, fire protection system, utilities.					
11. REQUIREMENT: <u>8,610</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provides a Sensitive Compartmented Information Facility (SCIF) for conducting research, assembly, test, and qualification functions necessary for the development and integration of the next generation of classified space and spacecraft technology capability for Navy, DoD, and national missions. (New mission.) <u>REQUIREMENT:</u> A SCIF is required to support assembly, electrical checkout, and integration for the next generation classified space and spacecraft capabilities for Navy, DoD, and national missions. Facilities are required to accommodate the new generation hardware for space and spacecraft systems currently being designed. <u>CURRENT SITUATION:</u> Facilities do not exist which could be used for the development of the next generation of classified space and spacecraft capability mandated by DOD and national policy. Secure electronic laboratories do not exist. The isolation of all power, communications, acoustics, ventilation, and physical access cannot be economically added to the existing buildings. Existing space is being used for testing and integration on the present generation capabilities and the existing SCIF cannot accommodate the size and weight of the next generation hardware.

EQUIPMENT PROVIDED FROM OTHER APPROPRIATIONS	-	-	(NON-ADD)	(0)
10. DESCRIPTION OF PROPOSED CONSTRUCTION Six-story masonry load-bearing wall building, spread footing foundation on vibro-flotation deep soil densification, stucco clad masonry walls, built-up roof, precast concrete floors, two elevators, fire pumps and mains, sprinkler system, emergency generator; 180 two-bedroom modules with private bathroom, lounges, laundry, storage, vending, mechanical equipment; provisions for intercom and master TV systems, air conditioning, sound attenuation, utilities; one-story central administrative building. Grade Mix: 720 E1-E4. Total: 720.				
11. REQUIREMENT: <u>2,654</u> PN ADEQUATE: <u>1,557</u> PN SUBSTANDARD: (<u>96</u>) PN PROJECT: Provides adequate billeting for 720 enlisted personnel. (Current mission.) REQUIREMENT: Adequate housing for 2,654 enlisted personnel assigned to the station for support, the air anti-submarine warfare squadrons, the aviation depot, the base air operations department (which includes the aircraft intermediate maintenance department), and other tenant activities. CURRENT SITUATION: Existing adequate berthing capacity of 1,557 spaces is insufficient, resulting in overcrowding. Fourteen existing barracks are inadequate because of configuration (central heads), age (45 years) and location (in the industrial complex of the Naval Aviation Depot). These facilities have had extensive repairs, approximately \$1 million per facility; however, continual repairs are necessary because of their high utilization and age. The existing facilities do not lend themselves to renovation to gain a modern adequate facility. It is estimated to cost a minimum of \$3 to \$4 million per facility to bring them into compliance with Department of Defense standards. However, this would still result in a 45-year-old building while reducing the overall capacity of the bachelor enlisted quarters.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Dredge material containment dikes; dewatering weirs and outflow control structures; erosion control measures; environmental protection; other mitigation; and stockpiling of suitable material for future dike construction.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Raise dredge material containment dikes and dredge material dewatering management devices. (Current mission.) <u>REQUIREMENT:</u> Adequate and economic means for disposing of dredge materials resulting from current and future dredging activities to maintain operational depth for OHIO-class submarines. <u>CURRENT SITUATION:</u> This project continues the multi-year Kings Bay dredging program, and provides the most cost-effective means of disposing of the materials resulting from dredging operations in the waterfront area. The existing dike system has insufficient long-term storage capacity and is unable to meet requirements of the materials area management plan, intended to optimize storage life availability. <u>IMPACT IF NOT PROVIDED:</u> Substantially more costly and equipment-intensive deep ocean disposal of maintenance dredging materials will be required. This will increase maintenance dredging frequency and lead to longer equipment on-site durations, compromising the refit, repair and maintenance schedule of OHIO-class submarines.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Improvements to the sanitary sewer system, potable water system, roads, pedestrian/bicycle paths, wetlands mitigation, drainage facilities, abandoned railroad trackage demolition, salvage and site restoration.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides utilities and site improvements. (Current mission.) <u>REQUIREMENT:</u> Improvements to the sewage treatment plant to accommodate steady state base personnel loadings projected to increase from 27,000 to 29,000 in the year 2000, to satisfy current Georgia Department of Natural Resources (DNR) effluent discharge concentration regulations, to comply with requirements of the "Final Supplement to the Environmental Impact Statement for Preferred Alternative Location for a Fleet Ballistic Missile Submarine Support Base, Kings Bay, Georgia" (EIS) and to meet the intents of the Base Master Plan, Base Bicycle Path Plan, Base Energy Conservation Plan and Executive Order 11990 (Wetlands Protection). <u>CURRENT SITUATION:</u> Existing Georgia DNR permitting requirements have reduced the sewage treatment plant capacity to well below its intended design to serve steady state population. During periods of prolonged rainfall, the golf course and adjacent woodland effluent disposal areas are incapable of properly treating discharge. Required automatic alarm monitoring, remote data acquisition and control functions of the sanitary sewer system are not provided by the Supervisory Control and Data Acquisition (SCADA) System. Existing system components installed within the water and wastewater treatment plants are incompatible with the existing SCADA system. Several locations on the base are served by septic systems which pose a contamination threat to ground water and adjacent surface water. The future master planned family housing and the golf course, clubhouse, and maintenance areas are not served by the potable water, requiring small inefficient and costly water treatment facilities to provide

4. PROJECT TITLE UTILITIES AND SITE IMPROVEMENTS		5. PROJECT NUMBER P-513
11. REQUIREMENT: (CONTINUED) <u>CURRENT SITUATION: (CONTINUED)</u> potable water in these areas. The access road to the weapons qualifications and skeet ranges is too narrow to permit safe vehicular flow. Final freshwater wetlands mitigation has not been completed as required in the approved EIS. The base's three erosion control drainage basins are experiencing severe siltation and erosion. The pedestrian and bicycle path system is only partially complete. Serious traffic safety and congestion exists at the intersection of Henry Clay and USS Daniel Webster Avenues. <u>IMPACT IF NOT PROVIDED:</u> Operational readiness of the Base will be impaired. Requirements of DNR, EIS, Base Master Plan and Executive Orders 11990 (Wetlands Protection) and 11998 (Flood Plain Management) will not be met.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Two single-story buildings, concrete foundation and floors, concrete and masonry walls, elastomeric roof, fire protection system, waste water treatment system, propane tanks, water storage tanks, air conditioning, utilities; lightning protection, provisions for intrusion detection system, fire alarm and intercom systems, raised computer flooring with CO2 fire suppression system, and compressed air system.				
11. REQUIREMENT: <u>14,500</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provides an environmentally-acceptable, hands-on fire fighting trainer facility for the submarine community. (New mission.) <u>REQUIREMENT:</u> Adequate and effective fire fighting trainer facility with submarine-unique, hands-on, fire fighting training courses in General Submarine Fire Fighting, Basic Team Fire Fighting, and Advanced Team Fire Fighting. Training will be given to 3,240 students annually to satisfy a mandatory requirement for all officers and enlisted personnel. Instructors can produce fire situations at will on simulators until the proper student response is received. This facility will be environmentally clean and offer significantly improved levels of training. <u>CURRENT SITUATION:</u> This activity does not possess any fire fighting facility that replicates realistic submarine fires with dense smoke and intense heat to allow a student hands-on experience. <u>IMPACT IF NOT PROVIDED:</u> Submarine personnel will not be trained under conditions designed for submarine fire fighting and will not gain the skills and confidence necessary to successfully control and extinguish submarine fires. This facility will be unable to meet the established requirements for fire fighting training and the combat readiness of submarines will be degraded.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story reinforced concrete and masonry building, concrete foundation and floor, built-up roof, fire protection system, air conditioning, utilities; covered and uncovered fenced outdoor play area, and parking.				
11. REQUIREMENT: <u>8,650</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provides a child development center on the station with a capacity of 100 children. (Current mission.) <u>REQUIREMENT:</u> An adequate and centralized child care facility to serve the military personnel assigned to this station. A child development center provides supervised care for infants, pre-school, and school age children in a common facility, on a regularly scheduled or drop-in basis, when parents are employed or at times when the family is temporarily unable to care for them. Child development centers are a necessary element in today's environment as their availability alleviates many problems incurred by military parents who are single, who both work, or who have other special needs. These centers make the quality of life more appealing to military personnel and their dependents. <u>CURRENT SITUATION:</u> The existing child development center provides day care for 120 children and is operating at its maximum allowable capacity. Because of a lack of space, the center has been forced to turn away children or place them on a waiting list which currently has 135 children. A new center, located on station property, will reduce travel times for parents in need of child care and reduce the burden created on children because of insufficient child care facilities. <u>IMPACT IF NOT PROVIDED:</u> The lack of sufficient child development facilities is detrimental to the welfare and morale of personnel and adversely affects retention. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Modernize three-story concrete building to include removal and disposal of asbestos and lead paint; seismic condition modifications, upgraded plumbing, fire protection system, utilities, and air conditioning; provide storage.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Modernizes living spaces in one bachelor enlisted quarters. (Current mission.) <u>REQUIREMENT:</u> Adequate living spaces in compliance with current housing standards for enlisted personnel. <u>CURRENT SITUATION:</u> Existing rooms are deteriorated and undersized, with gang showers and open-bay living areas which do not meet Navy standards. There is insufficient lighting and outlets, no air conditioning, and no fire protection systems. <u>IMPACT IF NOT PROVIDED:</u> Continued occupancy of quarters which fail to meet living conditions considered necessary to recruit and retain Navy personnel. Continuation of the substandard communal-type living conditions will have an adverse effect on morale and retention.				
12. SUPPLEMENTAL DATA: A. ESTIMATED DESIGN DATA: (PROJECT DESIGN CONFORMS TO PART II OF MILITARY HANDBOOK 1190, "FACILITY PLANNING AND DESIGN GUIDE.") (1) STATUS: (A) DATE DESIGN STARTED. <u>01-92</u> <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Modernize two two-story buildings into two-bedroom modules with private bathrooms, lounges, laundry, storage, vending, mechanical equipment, fire protection system, utilities, air conditioning, and asbestos/lead paint removal.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides adequate billeting for enlisted personnel. (Current mission.) <u>REQUIREMENT:</u> Adequate housing for bachelor enlisted personnel assigned to the station. <u>CURRENT SITUATION:</u> Five of the existing six Bachelor Enlisted Quarters buildings are substandard due to inadequate space, common toilets and showers, insufficient utilities, inadequate air conditioning, and general deteriorated physical condition. Air conditioning is required in this climate, particularly for communications watchstanders for daytime sleeping. These quarters were described as "slums" and "career stoppers" during a recent IG inspection. <u>IMPACT IF NOT PROVIDED:</u> Enlisted personnel will continue to be housed in substandard facilities to the detriment of morale and career retention efforts.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Reinforced concrete pile supported pier, approach trestle, approach and offshore dredging, and related facilities including fender system and hotel services for water, sewer, electrical, and telephone; fire protection system, partial demolition of an existing pier, electrical substation, sewage lift station, relocation of an existing boat ramp, security fencing, parking, and archaeological services.				
11. REQUIREMENT: <u>41,900 SF</u> ADEQUATE: <u>Q</u> SF SUBSTANDARD: <u>Q</u> SF <u>PROJECT:</u> Constructs pier, approach trestle, and related dockside facilities to support programmed Surveillance Towed Array Sensor System (SURTASS) ships at the Pearl City Peninsula. (New mission.) <u>REQUIREMENT:</u> Adequate pier facilities to provide docking capability for up to five mono-hull T-AGOS-1 class ocean surveillance ships and at least four widebeam Small Waterplane-Area Twin Hull (SWATH) class ships scheduled for assignment to SURTASS operation. The first SWATH ship was assigned in 1992. Simultaneous docking of two ships is required to maintain the assigned SURTASS mission in the Pacific. The facilities are part of the planned relocation of the SURTASS Support Center from Bishops Point to the Pearl City Peninsula. SURTASS is a submarine detection system based on a flexible, tube-like structure towed behind a civilian-manned ship. Raw data is sent from the ship via satellite to Fleet units for processing. SWATH ships are 224 feet long and considerably wider than their mono-hull counterparts. They are designed to be more stable and have better sea-keeping characteristics than the mono-hull ships. <u>CURRENT SITUATION:</u> The current SURTASS operations are supported at the Bishops Point, Pearl Harbor site. While the structure at the Bishops Point site is marginally sound enough to support mono-hull T-AGOS-1 class vessels, the facility is physically unable to accommodate the larger, deeper draft SWATH hulls represented by the T-AGOS-19 and T-AGOS-23 class ships, and to adequately

3. INSTALLATION AND LOCATION/UIC: N57101 COMMANDER OCEANOGRAPHIC SYSTEM PACIFIC, PEARL HARBOR, HAWAII		
4. PROJECT TITLE BERTHING PIER		5. PROJECT NUMBER P-422
11. REQUIREMENT: (CONTINUED) <u>CURRENT SITUATION:</u> (CONTINUED) support the maintenance requirements of their upgraded array systems. The move to the Pearl City Peninsula was initiated with the successful programming of an FY 1991 MILCON project to provide SURTASS maintenance and operations facilities (\$12.8 M). This follow-on project provides the necessary berthing piers, specially designed to accommodate the SWATH ships. The berthing facilities will also provide array off-loading capabilities for the ocean surveillance ships. The 6,000-foot-long arrays must be periodically removed from the ship to be serviced and repaired. The ships dock for only 15 days before returning to sea for another 75-day deployment. Adequate berthing facilities must be available to support the tight in-port availabilities. Berthing facilities cannot adequately accommodate the SWATH ships scheduled for delivery through the mid-1990's. The existing water depth is not sufficient for the much deeper draft SWATH ships. <u>IMPACT IF NOT PROVIDED:</u> The Pacific SURTASS Support Center will not be able to support the SURTASS fleet expansion and the new T-AGOS 19 through 23 class SWATH ships will have no supporting shore facility in the Pacific. The new support center will not be fully utilized because of a lack of berthing facilities. The level of ocean surveillance and mission readiness will decrease significantly, if the operating tempo of the 13 SURTASS ships cannot be maintained.

10. DESCRIPTION OF PROPOSED CONSTRUCTION 26-foot wide by 300-foot long pier, including sheet pile abutment, fire protection water distribution system, and utilities.				
11. REQUIREMENT: <u>7,800 SF</u> ADEQUATE: <u>0 SF</u> SUBSTANDARD: <u>0 SF</u> <u>PROJECT:</u> Constructs a pier to provide loading, workspace, and berthing facilities for this activity. (Current mission.) <u>REQUIREMENT:</u> Adequate facilities are required for berthing support vessels and for transporting, loading, and unloading materials and equipment from shore to the support vessels. This facility is responsible for all functions necessary to accomplish the inactivation, maintenance, custody, disposal, security, and preparation for reactivation of assigned ships and craft moored off-shore in the Middle Loch of Pearl Harbor. In addition to the 43 ships and craft presently maintained, this facility will receive eleven additional ships by FY 1995. The only means of accomplishing this work is by using six large yard craft (YC) and several landing craft and utility boats for workshops, crane support, and transportation access to the inactive ships moored in-stream. This project provides adequate berthing for these support vessels. <u>CURRENT SITUATION:</u> This facility has two temporary piers, a pontoon pier and two YC's, which are totally inadequate to support the requirements. The pontoon pier was constructed in 1969 using World War II surplus sections, which are badly rusted, and many sections are partially sunk. Pier 7 was the only permanent pier in the Middle Loch, built in the 1940's, condemned in 1985 and demolished in 1991. Two YC's were assembled in December 1991 as a temporary replacement for the condemned pier, but are inherently unstable. The temporary piers are weight restricted for forklift and truck traffic. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Renovation of existing spaces for a speedline and self-serve area; cashier's stands; expansion of the vegetable preparation area; women's and men's restrooms; conversion of storage space to office space; renovation of worker's locker room and restrooms; demolition and reconstruction of the smoke pit and pot scullery; fire safety improvements; replacement of plumbing, water heater tank, exhaust hoods, steam lines, electrical wiring, interior light fixtures, floor tiles, wainscots, chill boxes, and rotary ovens.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Modernizes an enlisted mess hall. (Current mission.) <u>REQUIREMENT:</u> A modern, efficient, and reliable mess hall for preparing and serving meals to support the assigned submarine force personnel. <u>CURRENT SITUATION:</u> The existing mess hall is located on the first floor of a bachelor enlisted quarters built in 1927 and has not been extensively renovated since it began operations. The plumbing, steam lines, and electrical system are old and deteriorated. The existing fluorescent fixtures are suspected of containing hazardous materials such as asbestos, lead paint, and PCB ballasts. The interior layout is not suited for an item pricing (pay for meals) type of operation since self-serve areas are located in the dining areas, and there is presently no cashier's stand at the exit of the serving area. Efficiency is hampered by the use of only one regular serving line. In addition, the architectural features are old, worn, and have an outdated appearance. <u>IMPACT IF NOT PROVIDED:</u> Continued use of a deteriorated, substandard, and inefficient facility to the detriment of morale and base operations.

10. DESCRIPTION OF PROPOSED CONSTRUCTION 70 feet by 480 feet concrete deck on pile wharf with sheetpile bulkhead capable of supporting a 100-ton mobile crane; mechanical and electrical utilities, potable water, saltwater fire protection system, wastewater collection; dredging of entrance/exit channels and berthing area, relocation of on-site tenants, and demolition of quaywall.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides adequate waterfront berthing facilities capable of accommodating advanced nuclear attack submarines. (Current mission.) <u>REQUIREMENT:</u> Adequate waterfront berthing facilities to berth transient and homeported submarines. This base provides logistic support, including maintenance and repair, to the submarine force of the Pacific Fleet. The new wharf will provide a fully capable berth on the Kuahua Peninsula in close proximity to the new intermediate maintenance facility. <u>CURRENT SITUATION:</u> Pearl Harbor does not have sufficient waterfront berthing facilities to adequately support homeported and transient submarines. Ships are berthed close together along the wharves without adequate separation distance and nested when spaces along the wharves are fully occupied. In addition, the existing wharves were constructed in the 1930's and 1940's and do not have the structural capacity to support the heavier mobile cranes now required to service the newer submarines. As the larger, longer SSN-688 class submarines replaced early classes, spacing became more constricted and it became necessary to nest submarines in order to berth those in port. Also, submarines are berthed on wharfs and piers which lack adequate deck-loading capacity to support mobile cranes used during maintenance and replenishment operations. The wharfs on Kuahua Peninsula are used but are not adequate because of insufficient utility support and the condition of the facilities. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story concrete masonry building, concrete foundation and floors, masonry walls; air conditioning, fire protection system, utilities, fenced outdoor play area, and parking.					
11. REQUIREMENT: <u>22,350</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF					
<u>PROJECT:</u> Provides a child development center for 300 children from infants through five years of age. (Current mission.) <u>REQUIREMENT:</u> Adequate facilities to support a child development center. A child development center provides supervised care for infants, pre-school, and school age children in a common facility, on a regularly scheduled or drop-in basis, when parents are employed or at times when the family is temporarily unable to care for them. Child development centers are a necessary element in today's environment as their availability alleviates many problems incurred by military parents who are single, who both work, or who have other special needs. These centers make the quality of life more appealing to military personnel and their dependents. <u>CURRENT SITUATION:</u> The existing child development center can only accommodate 36 children. A trailer was obtained to provide additional space, but only accommodates 82 children. Both the existing facility and the trailer do not provide the configuration and space allowance, indoor and outdoor, needed for the number of children supported and fail to satisfy the station's requirement for child care. With the increasing number of children placed on the waiting list, this activity does not have the facilities with proper space allowance, fire and safety standards to meet the 300 children demand. <u>IMPACT IF NOT PROVIDED:</u> The lack of adequate child care facilities is a detriment to the welfare and morale of personnel.

(New mission.) <u>REQUIREMENT:</u> An adequate facility is needed for providing safe overnight and weekend storage for up to 90 explosives-loaded trucks. This facility is required at the station's main side for the receipt and temporary storage of shipments of ordnance prior to its transfer to the magazine areas or the waterfront. An increase in workload resulted from the arrival of the two existing Atlantic Fleet fast combat support ships (AOE's) for permanent homeporting. <u>CURRENT SITUATION:</u> Currently, explosives-loaded trucks entering the station are processed through the truck scale house and, when not destined for immediate deployment to the waterfront, are parked in two magazine areas. While this is the only alternative presently available, it is highly dangerous because of the proximity of the explosives-loaded trucks to loaded magazines. <u>IMPACT IF NOT PROVIDED:</u> This station will be unable to provide adequate, safe and secure explosives truck holding capacity, inhibiting ordnance handling capability and subsequent service to the Fleet. <u>ADDITIONAL:</u> This project will be conjunctively funded with NATO.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Automated multi-purpose training range with target emplacements, field service heads, control tower, operation/storage facility, general instruction building, ammunition breakdown facility, two covered shelters, air conditioning, utilities, fire protection system, parking, access roadway, and perimeter trails.					
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Construct an automated multi-purpose training range to accommodate procurement of the Remoted Engagement Target System (RETS). (Current mission.) <u>REQUIREMENT:</u> Adequate facilities to replace antiquated ranges and provide state of the art targeting systems in support of Marine Corps Training objectives for the main battle tank and the light armored vehicle. The range will provide a crew qualification course and a course to allow crews to train in skills required to engage stationary and moving targets in tactical situations. <u>CURRENT SITUATION:</u> There are no existing facilities capable of supporting this training. Current ranges were developed for older and less sophisticated weapons systems and are not capable of handling the newer systems, requiring units to train away from Camp Lejeune. These ranges are old and deteriorated and cannot accommodate the RETS hardware. Marines receive classroom training and specialized instructions on new weapons and training techniques, but live firing cannot be conducted. The RETS hardware provides moving targets and instantaneous feedback. The feedback capability of RETS informs the shooter of where the rounds are impacting, reducing the expenditure of ammunition, and allowing for detailed critiques at the conclusion of training. <div style="text-align: right; margin-top: 20px;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Approximately 7,000-foot wharf renovation including structural improvements, steel sheet piling, reinforced concrete deck, fender system, utilities and power substation, non-potable water lines, demolition and removal of existing collapsed wharf, and dredging to 30 feet below mean-low-water.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides structural improvements to Wharf N to support mobile crane operations. Upgrades non-potable water lines along Wharves N and L. Upgrades and repairs electric shore power system along east and north sides of the Reserve Basin, including additional shore power outlets and a new substation. Dredges along Wharves F, L, N, Preble Avenue, and Second Street at the Reserve Basin. (New mission.) <u>REQUIREMENT:</u> Structural wharf upgrades, dredging and utility distribution work for lighting, dehumidification, and cathodic and fire protection required to support the increased number of inactive ships, particularly mobilization assets, and the influx of larger, deeper draft vessels. This facility is responsible for all functions necessary to accomplish the inactivation, maintenance, custody, disposal, security, and preparation for reactivation of assigned ships and craft. All combatant vessels and almost all non-combatant mobilization assets on the east coast are berthed at this facility or NISMF Portsmouth, Virginia. This facility will be required to berth at least 31 ships and craft within the Reserve Basin by FY 1995, in addition to ships berthed on shipyard piers. <u>CURRENT SITUATION:</u> A quantity of subsurface materials including pilings and chunks of concrete and asphalt are known to exist in the reserve basin. The limiting draft for ships berthed in the Reserve Basin is between 17 and 25 feet, inadequate for the numbers and types of ships that will complete inactivation and be maintained there starting in FY 1995. A section of				

(CONTINUED ON DD 1391C)

1. COMPONENT NAVY	FY 1994 MILITARY CONSTRUCTION PROGRAM	2. DATE																										
3. INSTALLATION AND LOCATION/UIC: N55632 NAVAL INACTIVE SHIP MAINTENANCE FACILITY, PHILADELPHIA, PENNSYLVANIA																												
4. PROJECT TITLE BERTHING WHARF IMPROVEMENTS (INCREMENT II)		5. PROJECT NUMBER P-588																										
11. REQUIREMENT: (CONTINUED) <u>CURRENT SITUATION:</u> (CONTINUED) Wharf N cannot support a mobile crane used in stripping and cannibalization functions. Existing electric power and non-potable water systems cannot support maintenance of mobilization asset ships and disposal of stricken ships. <u>IMPACT IF NOT PROVIDED:</u> This facility cannot provide berthing and utility services for the preservation of 15 to 20 additional inactive ships through FY 1997. The ability to meet current inactivation schedules and maintain valuable Navy assets will be severely jeopardized.

10. DESCRIPTION OF PROPOSED CONSTRUCTION High voltage feeders, duct bank, manholes, high voltage breakers; alterations to existing high voltage substation to include installation of high voltage vacuum breakers and components.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Upgrades the electrical distribution system. (Current mission.) <u>REQUIREMENT:</u> Adequate, reliable, and redundant electrical distribution power service to meet the increased electrical requirements of the computer centers and other critical loads. Upgrades the electrical system in the main high voltage substation to increase the system capacity and support dual high voltage feeder service to critical computer loads. <u>CURRENT SITUATION:</u> The computer rooms have increased in mission over the years to a point where the electrical service to the buildings no longer has the reliability and redundancy required. The existing high-voltage substation is overloaded and equipped with obsolete, over-aged circuit breakers. Sufficient space is not available to accommodate additional electrical service required to serve the increased load growth. A recent failure of an obsolete feeder circuit breaker required over one year to repair by remanufacturing and locating used replacement parts. The existing distribution feeders are inadequate to carry the increased electrical loads reliably. <u>IMPACT IF NOT PROVIDED:</u> The existing obsolete high voltage equipment will continue to be unable to provide the required reliability and redundant power quality required for the computer center and other loads. The existing equipment cannot provide adequate service for the expanded electrical load growth. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Four-story reinforced concrete and masonry building, concrete floors, standing seam metal roof, pile foundation, freight elevator, fire protection system, air conditioning, utilities; 68 two-bedroom modules with connecting bathrooms, lounges, laundry, storage, vending, kitchens, and mechanical equipment. Grade mix: 272 E1-E4.					
11. REQUIREMENT: <u>934</u> PN ADEQUATE: <u>464</u> PN SUBSTANDARD: <u>0</u> PN <u>PROJECT:</u> Provides adequate housing for 272 enlisted personnel. (Current mission.) <u>REQUIREMENT:</u> Adequate housing for 934 enlisted personnel assigned to this center. <u>CURRENT SITUATION:</u> Existing adequate berthing capacity of 464 spaces is insufficient, resulting in overcrowding. A new construction deficiency of 470 adequate billeting spaces exists. Commercial facilities in the Newport area are very expensive, when available. Some enlisted personnel must locate out of the area in order to secure less expensive facilities, resulting in an extreme inconvenience. After construction of the spaces requested by this project, the remaining projected space deficit will be satisfied by follow-on projects. <u>IMPACT IF NOT PROVIDED:</u> Adequate living quarters for all bachelor enlisted personnel will continue to be unavailable, resulting in degradation of morale, training, and career retention efforts. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Replace underground cables and distribution transformers; replace overhead distribution facilities with underground facilities; and relocate and replace existing ductbanks.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Continues the upgrade of the base-wide electrical distribution system. (Current mission.) <u>REQUIREMENT:</u> Adequate base electrical distribution system to complete the replacement of deteriorated electrical facilities and to convert the existing 2,400-volt distribution feeders to 13,800 volts to improve reliability and operating efficiency. This increment completes the electrical system upgrading and improvements. <u>CURRENT SITUATION:</u> A majority of the station's high-voltage electrical system is fifty years old and has exceeded its normal life expectancy. The station is experiencing an increase in electrical failures and unanticipated maintenance. This condition will not improve until the system's upgrading and modernization is complete. This station is a major advanced training center, host to a number of tenant activities, and homeport to ships of the Atlantic Fleet and Naval Reserve Force. Brown-outs and black-outs are extremely disruptive to the functioning of all of these activities and ships. <u>IMPACT IF NOT PROVIDED:</u> Excessive maintenance will continue to be required. Disruptions to activity and tenant organizations will continue. Catastrophic failure would severely and adversely affect many of the base schools and commands for an extended period of time. Without this project, the electrical upgrades started under previous military construction projects will not be completed, leaving large portions of the system connected to the overaged and deteriorated 2,400-volt distribution facilities.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Three-story concrete building, reinforced masonry bearing walls, reinforced concrete floor slabs, reinforced concrete pilings, diaphragm roof; 93 two-room modules with private bath, lounges, laundry, vending, and storage; air conditioning, fire protection system, utilities; demolition of four buildings. Grade Mix: 264 E1-E4, 48 E5-E6, 3 E7-E9. Total: 315.				
11. REQUIREMENT: <u>1,529</u> PN ADEQUATE: <u>590</u> PN SUBSTANDARD: (<u>1,342</u>) PN <u>PROJECT:</u> Provides adequate billeting for 315 bachelor enlisted personnel. (Current mission.) <u>REQUIREMENT:</u> Adequate living quarters for enlisted personnel assigned to this air station as permanent support. <u>CURRENT SITUATION:</u> There is a deficiency of 973 adequate billeting spaces for bachelor enlisted personnel at this station. Single enlisted Marines are billeted in substandard quarters that do not meet DoD habitability requirements. <u>IMPACT IF NOT PROVIDED:</u> Adequate billeting will not be available for all enlisted personnel. Marines will continue to occupy inadequate housing and endure a low standard of habitability. This adversely impacts on recruitment and retention of Marines in an all-volunteer environment. The health and morale of Marines occupying substandard quarters is further accentuated when they work with other Marines who occupy quarters that meet standards of adequacy.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Radio-type fire reporting system, modern receiving equipment with battery backup power supply, emergency generator; removal of existing cable and equipment.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides fire alarm system improvements. (Current mission.) <u>REQUIREMENT:</u> Improvements to the existing fire alarm and fire protection systems consisting of replacing the existing municipal fire reporting system with a new radio-type fire reporting system which will meet the National Fire Protection Association (NFPA) requirements. This system is required to provide the necessary improvements to the fire detection and reporting system by increasing the system reliability with new modern radio actuated equipment and by allowing trouble conditions that will exist in any system to be quickly localized and isolated such that related interference to the system will be minimized. <u>CURRENT SITUATION:</u> The present fire alarm system is deteriorated, unreliable and in need of improvement. Aerial and underground cables have frayed and cracked insulation and the lightning protection system has outdated components that frequently fail causing false or no alarms at all to be transmitted to the fire station. The system has been modified over the years by untrained unauthorized personnel and in many cases does not meet National Fire Protection Association (NFPA) minimum requirements. False alarms (192 per year) are answered by the Fire Department with 90% directly attributable to system component and cable failure. <u>IMPACT IF NOT PROVIDED:</u> The activity fire alarm system will continue to deteriorate, provide false or no alarms during fire emergencies and continue to operate in violation of NFPA codes. Potentially heavy losses and liabilities may be incurred by the Navy through property and personnel loss should this

10. DESCRIPTION OF PROPOSED CONSTRUCTION Two-story building, pile supported masonry walls on a reinforced concrete slab, steel joist with metal deck roofs; classroom and instruction preparation areas, administration space, and armory; provisions for intrusion detection and close circuit television systems; utilities, and parking.				
11. REQUIREMENT: <u>21,600</u> SF ADEQUATE: <u>Q</u> SF SUBSTANDARD: <u>Q</u> SF <u>PROJECT:</u> Provides an instruction building, with instructor work space and lounge area to serve 45 staff personnel, classroom space for 160 students, a storage area for training materials, administrative space for three administrators, an armory, and a small arms maintenance shop to replace relocatable trailers. (Current mission.) <u>REQUIREMENT:</u> Adequate facilities to meet instruction requirements of the Marine Corps Security Force Battalion, Atlantic (MCSFBNLANT) School, which conducts anti-terrorism and security training at this activity. Academic instruction is necessary to support and enhance vigorous marksmanship and battle drill training programs. <u>CURRENT SITUATION:</u> An academic instruction facility and armory do not exist at this activity. Personnel undergoing training with MCSFBNLANT attend daily on-site classes. All activities are conducted in relocatable buildings which do not provide a high-quality, efficient training environment. <u>IMPACT IF NOT PROVIDED:</u> Students will continue to use temporary trailers for classroom instruction and preparation for using live-fire ranges.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Two two-story reinforced concrete buildings with cast-in-place floors, walls, and roofs, pile-supported foundation, interior walls lined with bullet trap systems, utilities, air conditioning, fire protection system, viewing stands; and storage building.				
11. REQUIREMENT: 7,310 SF ADEQUATE: 0 SF SUBSTANDARD: 0 SF <u>PROJECT:</u> Provides indoor tactical training facilities for close quarters battle training accommodating 2,205 students and 108 instructors annually. (Current mission.) <u>REQUIREMENT:</u> Adequate facilities for indoor, close quarters tactical training. The heightened worldwide terrorism threat requires specialized close quarters battle training. This activity must be able to effectively train in mission essential techniques, such as forced entry, clearing building or ship of hostile personnel, and shooting within confined spaces. The training conducted in this facility will use live, full caliber ammunition. <u>CURRENT SITUATION:</u> No facility exists to conduct close quarters battle training at this activity. Students are transported to the nearest similar facility, 40 miles away at Little Creek for training. The Little Creek facility was constructed for use by the SEAL teams, and heavy scheduling precludes sufficient time to conduct efficient training. <u>IMPACT IF NOT PROVIDED:</u> Failure to satisfy this training requirement degrades this activity's mission capability and jeopardizes the personnel and facilities these forces are charged with securing and protecting. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Three-story steel frame building, pile foundation, concrete floors, masonry walls, elastomeric roof, utility elevators; security vaults; fire protection system, air conditioning, area lighting, building information systems, utilities, and parking; demolition of four buildings and portions of flexible pavement and sidewalk.				
11. REQUIREMENT: <u>57,740</u> SF ADEQUATE: <u>Q</u> SF SUBSTANDARD: <u>Q</u> SF <u>PROJECT:</u> Provides an operations test and evaluation management center. (Current mission.) <u>REQUIREMENT:</u> An adequate and properly-configured facility for the Commander, Operational Test and Evaluation Force (COMOPTEVFOR) who is responsible for testing and evaluating weapon systems, ships, aircraft and equipment in the anticipated environment and against the anticipated threats; and who develops and validates procedures and tactics for employing these weapon systems. When directed by CNO, assists developing agencies in the accomplishment of necessary developmental tests and evaluations. The organizational structure will consolidate at COMOPTEVFOR, Norfolk from the Deputy OPTEVFOR Pacific, Coronado, California. This consolidation cannot take place until the new operational test and evaluation management center is complete. <u>CURRENT SITUATION:</u> The current facilities are inadequate, both physically and spatially, for the number of people currently on-board. The organizational consolidation cannot take place until the new management center is completed. The existing facilities, built in 1942, are in inadequate condition, both physically and spatially (temporary trailers were purchased to hold a division). Excessive maintenance is done on a weekly basis and expensive special projects are required to repair roofs and seal leaking walls. An engineering evaluation completed in September 1988 found the present buildings to be inadequate. There are numerous <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>				

1. COMPONENT NAVY	FY 1994 MILITARY CONSTRUCTION PROGRAM	2. DATE
3. INSTALLATION AND LOCATION/UIC: N57023 COMDR OPERATIONAL TEST & EVALUATION FORCE, NORFOLK, VIRGINIA		
4. PROJECT TITLE OPERATIONS TEST AND EVALUATION MANAGEMENT CENTER		5. PROJECT NUMBER P-061
11. REQUIREMENT: (CONTINUED) <u>CURRENT SITUATION: (CONTINUED)</u> significant documented deficiencies in the obsolete electrical, heating, ventilation, air conditioning, and plumbing systems, as well as deteriorated building structure caused by age, rot and termites. Repairs to these buildings have been made in a piecemeal fashion and since 1982 expenditures have been averaging over \$315,000 per year and do not include the command's maintenance self-help projects. Deficiencies exist in the physical, functional, and design criteria. The need to maintain tight physical security has prompted costly, and in some cases futile, attempts to alter the existing buildings to meet security criteria. <u>IMPACT IF NOT PROVIDED:</u> If this project is not provided, the current facility will continue to operate inefficiently, deteriorate, cost increasingly more to maintain, and will be unable to support the Command's consolidation.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story steel frame hangar and shops building, pile foundation, concrete floors, built-up roof over insulation on metal decking, concrete walls with metal panels above; cleaning shop, small surfaces shop, metal bonding shop, fiberglass shop, storage space, administrative space, lunch/break facilities; high-bay area, aircraft access apron, water and noise pollution abatement features, bridge cranes, technical operating manuals, fire protection system, ventilation system, compressed air systems, air conditioning, and utilities.				
11. REQUIREMENT: <u>118,320</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF				
<u>PROJECT:</u> Provides a replacement structure for facilities housing aircraft component shops, rework hangar, engineering offices and cafeteria, which were rendered unusable due to contamination resulting from a PCB transformer fire. (Current mission.) <u>REQUIREMENT:</u> Replacement of contaminated depot rework and support facilities. This activity performs metal, non-metal, hydraulic, and electrical repair of accessories and components for F-14 and A-6 aircraft, and competes for work on a wide variety of other aircraft. This project will provide significant productivity improvements in the rework of defense-critical Navy aircraft. The workload to be performed will remain constant, although its composition will be more varied due to streamlining and competition initiatives. <u>CURRENT SITUATION:</u> Facilities performing rework functions were rendered unusable by PCB/dioxin contamination from a transformer fire in April 1986. No permanent adequate space is available for the relocated shop functions. Operations are hindered by shop crowding; process line dispersion among various facilities; costly, time consuming material handling runs; higher on-going levels of management attention to maintain adequate workplaces and workflows, product quality, personnel morale and safety; limited

10. DESCRIPTION OF PROPOSED CONSTRUCTION Five-story building, concrete pile foundation and slab on grade, concrete flat slab supported floor, pitched concrete roof with insulation, built-up roofing, masonry exterior walls, central heating, air conditioning, elevators, fire alarm system, sprinklers with fire pump, utilities; 123 two-room modules with connecting bathrooms, lounges, laundry, storage, kitchens, vending, and mechanical equipment; demolition of existing buildings and running track; technical operating manuals. Grade mix: 256 E1-E4, 118 E5-E6. Total 374					
11. REQUIREMENT: 3,276 PN ADEQUATE: 851 PN SUBSTANDARD: 0 PN <u>PROJECT:</u> Provides adequate billeting for 374 enlisted personnel. (Current mission.) <u>REQUIREMENT:</u> Adequate housing facilities for 374 enlisted military personnel, crews of vessels undergoing overhaul. <u>CURRENT SITUATION:</u> The shipyard currently has a deficiency of quarters for enlisted military personnel. The deteriorated living conditions faced by crews remaining on-board ships during overhauls are demoralizing and disruptive of shipboard routine. Frequent interruptions of heat, air conditioning, steam, water, and electrical services combined with the generally noisy, dirty environment render many shipboard areas uninhabitable. The other option for enlisted personnel is to live in expensive rooms outside the shipyard. However, this is not possible because of the long lead-time required for leasing motels and apartments for almost 400 individuals, and the fact that the overhaul schedule at the shipyard fluctuates constantly. <u>IMPACT IF NOT PROVIDED:</u> Continued inadequate or expensive living conditions for crews whose ships are undergoing overhaul, resulting in degradation of morale and career retention efforts.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Anti-armor tracking and live fire range with control tower, covered bleachers, covered mess, head, ammo-breakdown building, twenty firing positions, two moving and four fixed target emplacements; upgrade existing roads; new crushed aggregate roads with concrete turning pads, parking area, technical operating manuals.					
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Construct an automated anti-armor tracking and live fire range to accommodate procurement of Remoted Engagement Target System (RETS). (Current mission.) <u>REQUIREMENT:</u> Adequate facilities to provide state-of-the-art ranges and targeting systems in support of Marine Corps training objectives. The range is required for familiarization and proficiency training with light to heavy anti-armor weapons systems for student officers at The Basic School. Additionally, the range will be used for field tracking and qualification exercises with training devices. <u>CURRENT SITUATION:</u> There are no existing facilities capable of supporting this training. Personnel receive classroom training and specialized instructions on new weapons and training techniques, but actual live firing is not conducted and training objectives are not met. The RETS hardware will provide this capability to the students through the use of moving multiple targets and instantaneous feedback to the shooters. The feedback capability of RETS informs the shooter of where the rounds are impacting, which reduces the expenditure of ammunition and also allows for detailed critiques at the conclusion of training. <u>IMPACT IF NOT PROVIDED:</u> Continued use of existing ranges, adversely affecting combat and live fire proficiency, quality of marksmanship, and training of student officers.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story building with load bearing masonry walls, roof trusses and standing seam metal roofing on sloped surfaces and single-ply roofing on flat surfaces; spread footing foundation with slab on grade; fire protection system, utilities, air conditioning, fenced outdoor play area, and parking.				
11. REQUIREMENT: <u>22,850</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provide a child development center for 298 children between the ages of six weeks to twelve years. (Current mission.) <u>REQUIREMENT:</u> An adequate and centralized child care facility to serve the military personnel assigned to this activity. A child development center provides supervised care for infants, preschool, and school-age children in a common facility, on a regularly scheduled or drop-in basis, when parents are employed or at times when the family is unable to care for them. Child care centers are a necessary element in today's environment as their availability alleviates many problems incurred by military parents who are single, who both work, or who have other special needs. These centers make the quality of life more appealing to military personnel and assist the Marine Corps with its fundamental responsibility of maintaining force readiness by retaining trained and effective personnel. <u>CURRENT SITUATION:</u> The existing facility was originally designed as a bowling alley and never intended for child care use. Its configuration requires overstaffing to meet ratios, group size, and development program requirements. This facility houses 74 of the 119 children enrolled for child care, with the other 45 cared for in three inadequate, temporary trailers. In addition, there is a waiting list of 235 children who cannot be accommodated.

The Combat System Laboratory Detachment (Wallops Island) of the Naval Surface Warfare Center (NSWC) is located at the National Aeronautics and Space Administration's (NASA) Goddard Space Flight Center, Wallops Flight Facility and utilizes three sites, the main base, the mainland, and Wallops Island, along the eastern shore of the Delmarva Peninsula in Accomack County, Virginia. This NSWC detachment provides research, development and engineering systems services for Navy surface ships combat systems, aircraft systems, electronics systems and communications systems in support of AEGIS and battle group operations.

DESCRIPTION OF PROPOSED CONSTRUCTION Two-story steel-frame building, pile foundation, concrete floors and load bearing roof, raised computer flooring; two Sensitive Compartmented Information Facility areas, security vaults, sensor tower and foundation pad, grounding, electromagnetic environmental attenuation measures, fire protection and fire alarm systems, air conditioning, utilities and security fence.				
11. REQUIREMENT: <u>32,600 SF</u> ADEQUATE: <u>0 SF</u> SUBSTANDARD: <u>0 SF</u> <u>PROJECT:</u> Provides a Ship Self-Defense Combat System (SSDCS) facility required to perform advanced shipboard warfare systems development and testing, radar and sensor systems integration, sensor and data fusion, and to investigate systems integration and inter-operability issues. (New mission.) <u>REQUIREMENT:</u> Adequate and strategically located facilities to support the research, development, test, and evaluation of Naval surface combatant warfare systems. The facility must be sited on a land-based engineering activity located in a marine environment. Integrated sensor and engagement systems are required to effectively counter the anti-missile threats of the future. <u>CURRENT SITUATION:</u> RDT&E efforts on new concepts and systems are being performed in inadequate space leased from NASA Wallops Flight Facility. The lease expires in December 1995. The expanding NASA mission at the facility will require the Navy to secure other space. The inadequacy of existing facilities, inability to expand at the present site, and the pending expiration of the use permit dictate that the Navy construct adequate facilities to continue SSDCS Program support. <u>IMPACT IF NOT PROVIDED:</u> The SSDCS development effort cannot be performed in a timely and effective manner. After the loss of the existing facility in 1995, this

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story precast concrete building addition; concrete foundation and slab on grade; wood truss roof; 750 KVA, 3 phase transformer; utilities; concrete and storm drain.					
11. REQUIREMENT: <u>30,780</u> SF ADEQUATE: <u>22,810</u> SF SUBSTANDARD: <u>0</u> SF					
<u>PROJECT:</u> Constructs an addition to the existing mess hall. (Current mission.) <u>REQUIREMENT:</u> Adequate and properly-configured facilities to accommodate enlisted personnel for a complement of eight Trident submarines. <u>CURRENT SITUATION:</u> The seating area in the existing galley is presently too small to satisfy current patron demand and cafeteria style operations, and cannot accommodate the complement of eight Trident submarines. In addition, the dry food and cold storage rooms currently in use are too small to handle more than one day's food requirements. Each room must be stocked daily. The cold storage warehouse located on the first floor of the mess hall is used to stock the frozen foods for the submarines. It is also used daily, thereby negatively impacting food storage and preparation operations for the submarines. <u>IMPACT IF NOT PROVIDED:</u> Food preparation and storage requirements cannot be met. Patrons will have to be turned away or eating hours will have to be extended, impacting on food preparation for subsequent meals. Food storage areas will have to be stocked three times daily, which will increase manpower requirements and impact food preparation. Lack of adequate amounts of cold storage warehouse space will impair food storage and packing out operations for Trident submarines.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Structural breakwater with closely spaced concrete piling supported by a pile-supported structure 90 feet wide by 1326 feet long with deck openings; approach trestle 24 feet wide by 260 feet long.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Provides a structural breakwater with access trestle. (New mission.) <u>REQUIREMENT:</u> A breakwater is needed to attenuate the wave motion from Port Gardner Bay. This station is homeport for a carrier battlegroup consisting of a Nimitz-class aircraft carrier. This breakwater will provide a safe harbor for the ships homeported at the carrier pier, protecting them from severe storms which require ships to leave port, and storms of lesser severity which result in mooring system fatigue and damages to ship hulls. The breakwater will also help to slow the sedimentation rate in the harbor. <u>CURRENT SITUATION:</u> Construction of the carrier pier completed. The site is presently a body of water at the mouth of the Shohomish River that flows into Port Gardner Bay. Ships berthed on the west side of the carrier pier will be exposed to damaging waves, if a breakwater is not provided. <u>IMPACT IF NOT PROVIDED:</u> Ships berthed at the carrier pier, and particularly the west side, will be susceptible to damage during severe storms. Without this project, ships will have to put out to sea to avoid damage.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Pile-supported steel framed utilities plant with water tube steam boilers, water purification system, deaerators with feed pumps, economizers, pulsation tanks, cooling tower, air dryers, paving, parking, and electrical and mechanical distribution lines.					
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Project provides a steam and compressed air plant for ships to be berthed at the station. (New mission) <u>REQUIREMENT:</u> Adequate facilities to support the homeporting of a carrier battlegroup consisting of a Nimitz-class aircraft carrier and associated combatant ships. The utilities provided by this project will allow homeported ships to go cold-iron for steam services while berthed. This is a necessary requirement when providing hotel services for the homeported ships. <u>CURRENT SITUATION:</u> There are no facilities at this new homeport to provide shore steam service utilities to berthed ships. <u>IMPACT IF NOT PROVIDED:</u> The homeported ships will not be able to shut down their boilers and air compressor systems when in port, this is a critical ship requirement. Additionally, operation of ships' boilers, while in port, would require the use of more fuel and manpower.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Renovate bathrooms, living areas, common areas, centralized storage, and mechanical rooms; replace cooling system; provide kitchens; and remove asbestos.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Alter and upgrade bachelor enlisted quarters in support of the forced relocation of the Fleet Logistics Support Squadron Five Zero (VRC-50), from Cubi Point, Philippines to Andersen Air Force Base, Guam. (New mission.) <u>REQUIREMENT:</u> Adequate housing for VRC-50 enlisted squadron personnel relocating from the Philippines. <u>CURRENT SITUATION:</u> Built in 1948, the existing facility is energy inefficient and has structural problems. The lighting is inadequate, the mechanical and electrical systems are obsolete, the insulation and sound attenuation are poor, and the building completely lacks privacy. Rain enters the rooms through walls and doors creating problems of mold and mildew. The divider partitions contain asbestos, making repairs of the problems associated with rain and termites extremely difficult. There is no other bachelor housing available, and off-base quarters are expensive, small, and in short supply. <u>IMPACT IF NOT PROVIDED:</u> Adequate living quarters will continue to be unavailable, resulting in personnel continuing to live in substandard quarters, adversely affecting morale, productivity, and retention. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

10. DESCRIPTION OF PROPOSED CONSTRUCTION One-story concrete building, pile foundation, concrete floor and roof slabs, wall frames and footings; administrative office, breakroom, lockers, shower and toilet, and battery charging services; loading docks, central air conditioning, humidity control system, material storage and retrieval system, fire protection and alarm system, and utilities.				
11. REQUIREMENT: <u>120,000</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF PROJECT: Constructs a general warehouse and material handling facility. (New mission.) REQUIREMENT: Essential facilities required to support the relocation of Navy operational and support functions from the Philippines to Naval Complex, Guam and Andersen AFB. There was a requirement to withdraw all remaining Navy assets from the Subic Bay/Cubic Point Naval Complex in 1992. Two events prevented extending the Base Rights Agreements: (1) the eruption of Mt. Pinatubo rendering Clark Air Force Base and the Crow Valley Training Range unusable; and (2) the inability to square Philippine political needs with U. S. operational requirements for Subic Bay and Cubi Point. U. S. national interests still require a credible forward presence in the region. However, there is no plan to replicate Philippine facilities at any single location, allowing a significant reduction of the U. S. presence in the western Pacific while retaining influence in the region. Less than one-quarter (1,232) of the more than 6,000 military and civilian billets were relocated to Guam. Most of the remaining billets were eliminated (over 4,000), with the remainder (less than 500) going to other locations. Military construction support in Guam is essential to the relocation plan. Facility requirements in Guam are especially acute, since operational and quality of life facilities there are already stretched to capacity, even before the arrival of more than 2,000 new military personnel and family members. The Commander-in-Chief, Pacific, endorses the relocation of units to Guam and <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

3. INSTALLATION AND LOCATION/UIC: N61119 FLEET AND INDUSTRIAL SUPPLY CENTER, GUAM		
4. PROJECT TITLE INTEGRATED STORAGE AND HANDLING FACILITY (DBOF)		5. PROJECT NUMBER P-152P
11. REQUIREMENT: (CONTINUED) <u>REQUIREMENT: (CONTINUED)</u> has advocated, before Congress, the need for investing in military construction to provide essential facilities for the welfare of U. S. military personnel assigned to Guam and for the advancement of U. S. national interests in the region. <u>CURRENT SITUATION:</u> Existing supply facilities at this activity are barely adequate to support the current requirement. There are no facilities that can be made available to support the relocation from the Philippines. <u>IMPACT IF NOT PROVIDED:</u> Without this project, relocated supplies and materials will be stored in the open, unprotected and exposed to the environment and vandalism.

<p>PROJECT: Provides a Fleet Logistic Support Office building. (New mission.)</p> <p>REQUIREMENT: Essential facilities required to support the relocation of Navy operational and support functions from the Philippines to the Naval Complex, Guam and Andersen AFB. There was a requirement to withdraw all Navy assets from the Subic Bay/Cubi Point Naval Complex in 1992. Two events prevented extending the Base Rights Agreements: (1) the eruption of Mt. Pinatubo rendering Clark Air Force Base and the Crow Valley Training Range unusable; and (2) the inability to square Philippine political needs with U. S. operational requirements for Subic Bay and Cubi Point. U. S. national interests still require a credible forward presence in the region. However, there is no plan to replicate Philippine facilities at any single location, allowing a significant reduction of the U. S. presence in the western Pacific while retaining influence in the region. Less than one-quarter (1,232) of the more than 6,000 military and civilian billets were relocated to Guam. Most of the remaining billets were eliminated (over 4,000), with the remainder (less than 500) going to other locations. Military construction support in Guam is essential to the relocation plan. Facility requirements in Guam are especially acute, since operational and quality of life facilities there are already stretched to capacity, even before the arrival of more than 2,000 new military personnel and family members. The Commander-in-Chief, Pacific, endorses the relocation of units to Guam and has advocated, before Congress, the need for investing in military construction to provide essential facilities for the welfare of U. S. military personnel assigned to Guam and for the advancement of U. S.</p>

11. REQUIREMENT: <u>8,830</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF				
<u>PROJECT:</u> Provides a facility for the care and development of approximately 115 children. (Current mission). <u>REQUIREMENT:</u> Adequate facilities to support a child development center. A child development center provides supervised care for infants, pre-school, and school age children in a common facility, on a regularly scheduled or drop-in basis, when parents are employed or at times when the family is temporarily unable to care for them. Child development centers are a necessary element in today's environment as their availability alleviates many problems incurred by military parents who are single, who both work, or who have other special needs. These centers make the quality of life more appealing to military personnel and their dependents. <u>CURRENT SITUATION:</u> The existing child development center is located in a hospital building as a temporary measure. This center serves 54 children. Fifty children are currently on the waiting list. This facility has a total of two egresses vice the required one egress per room. The location is partially below ground, in violation of Navy instructions, with many life safety deficiencies. The existing center is undersized and in violation of life safety codes due to very limited avenues of movement and escape from the underground location. <u>IMPACT IF NOT PROVIDED:</u> The existing facility will continue to operate in inadequate conditions which cannot meet current demands for child care. The lack of adequate child care facilities is a detriment to the welfare and morale of personnel and adversely affects retention.

4. PROJECT TITLE INERT STOREHOUSES		5. PROJECT NUMBER P-830P
11. REQUIREMENT: (CONTINUED) <u>REQUIREMENT: (CONTINUED)</u> U.S. national interests in the region. This activity has the requirement to store ordnance as well as inert ordnance materials, such as fins and pallets. Currently, the existing adequate assets satisfy approximately 35% of the requirement, and the substandard assets satisfy another 25%. The activity has an actual space deficiency of 50,430 SF of storage space, and the situation is becoming more critical since there are no facilities to store materials from the Philippines. <u>CURRENT SITUATION:</u> The activity does not have sufficient storage space to accommodate inert materials being relocated from the Philippines. A large portion of the inert material at Guam is stored outdoors in a highly corrosive and harsh climate. This situation is unacceptable because surface rust will build up in the stored material, necessitating repair or replacement. Pins, links, and springs of bomb fins bind up as a result of dusty conditions. If bomb fins become useless due to corrosion or malfunctioning parts, the bombs themselves will be rendered unusable until new fins are procured, or until fins are repaired at a very high cost. <u>IMPACT IF NOT PROVIDED:</u> Continued storage of valuable inert materials outdoors, subjecting them to deterioration from the weather. This deterioration will result in increased maintenance and repair costs.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Single-story reinforced concrete building addition, roof insulation, air conditioning, fire protection system, utilities, fenced outdoor play area, and parking.				
11. REQUIREMENT: <u>7,500</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF PROJECT: Provides an additional child development center for the remaining requirement associated with the Philippines realignment and to reduce the existing waiting list. The facility will have a capacity of 100 children. (New mission.) REQUIREMENT: Adequate facilities to support a child development center. A child development center provides supervised care for infants, pre-toddler, toddler, pre-school and school age children in a common facility, on a regularly scheduled or drop-in basis, when parents are employed or at times when the family is unable to care for them. Child development centers are a necessary element in today's environment as their availability alleviates many problems incurred by military parents who are single, who both work, or who have other special needs. These centers make the quality of life more appealing to military personnel and their dependents. CURRENT SITUATION: Existing facilities are not large enough to accommodate all pre-school dependent children of active duty military personnel desiring child development services. There is a backlog of 183 children. Private sector child care is nearly non-existent on Guam as most families requiring child care rely on the extended family. Service members stationed on Guam do not have this alternative. IMPACT IF NOT PROVIDED: Existing facilities will continue to operate in overcrowded conditions which cannot meet current demands for child care. The lack of adequate child care facilities is a detriment to the welfare and morale of

11. REQUIREMENT: <u>43,550 SF</u> ADEQUATE: <u>0 SF</u> SUBSTANDARD: <u>0 SF</u> <u>PROJECT:</u> Provides permanent facilities for the relocated Explosive Ordnance Disposal Mobile Unit Five (EODMU FIVE). (New mission.) <u>REQUIREMENT:</u> Adequate and suitably-located facilities to house and support EODMU FIVE which has relocated to Guam from the Philippines. This project is a direct result of the withdrawal of Navy assets from the Philippines. The relocated EODMU FIVE needs facilities to operate and perform its mission. They provide explosive ordnance disposal, diving, demolition, and mine countermeasures support to the Seventh Fleet. <u>CURRENT SITUATION:</u> Facilities do not exist on Guam which are appropriately sited to meet the location criteria and the functional and operational requirements of the EODMU FIVE. As a result of the swift withdrawal, completed in 1992, EODMU FIVE administrative functions were relocated to portable, leased trailers. Transportation and supply operations are being conducted from a K-Span constructed as an interim solution, providing minimum space and facilities, e.g. vehicle maintenance bays without proper equipment, no climate control for material, and inadequate office space for transportation and supply functions. <u>IMPACT IF NOT PROVIDED:</u> EODMU FIVE operations will continue to be hindered by limited spacing, and they will remain in temporary trailers, which will negatively impact morale.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Secondary clarifier, primary clarifier, gravity thickener, solids contactor, and drying beds; influent pump stations and contact tank; expand secondary facilities building.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Expands the existing sewage treatment plant to accommodate and ensure proper treatment and disposal of the wastewater generated by the growth in the naval complex. (New mission.) <u>REQUIREMENT:</u> Adequate facilities to treat increased influent of wastewater from ships and facilities associated with the relocation of Navy units from the Philippines to Guam. Guam is the primary recipient of relocated functions, ships and personnel from the Philippines. The Apra Harbor Naval Complex, in particular, will be the site of a major build-up of shore support facilities, and an increase in homeported ships and tempo of Fleet operations that has significantly overloaded the existing sewage collection, treatment, and disposal system. <u>CURRENT SITUATION:</u> The Apra Harbor plant is already being operated at full capacity to meet current wastewater flow. The construction of three hundred new units of family housing, and additional ships being relocated from the Philippines will increase the demand beyond current capabilities. <u>IMPACT IF NOT PROVIDED:</u> Attempting to increase the plant's throughput without this expansion project will seriously degrade the system's reliability resulting in breakdowns. Sewage treatment plant equipment failure will result in degradation of wastewater treatment and discharge services for ships, causing delays in deployment and negatively impacting on fleet readiness. <div style="text-align: right;">(CONTINUED ON DD 1391C)</div>

<u>PROJECT:</u> Constructs a transportation parts storage facility. (New mission.) <u>REQUIREMENT:</u> This center's transportation department has received more than 350 additional pieces of construction and automotive equipment as a result of the withdrawal from the Philippines. An adequate facility is required for secure, controlled, and centralized storage to support the maintenance of the relocated equipment, as well as existing equipment for all PWC serviced activities on Guam. In addition, the transportation department is in need of more repair bays for maintenance of vehicles in the Philippine rollback. <u>CURRENT SITUATION:</u> Guam does not have a facility dedicated to automotive repair shop storage, and there are no facilities at other activities that could be used or converted to support this requirement. As an interim measure, the department uses twelve repair bays and an inadequate temporary structure to store the repair parts. The repair bays need to be returned to the service for which they were intended. <u>IMPACT IF NOT PROVIDED:</u> Continued storage of valuable automotive repair parts in temporary structures susceptible to typhoon damage. Without recapture of the twelve repair bays for maintenance of vehicles, transportation support will be delayed and cost more. These delays deny customers their means of transportation, impacting on the unit's mission performance.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Upgrade existing sewage pumping and collection systems; install power substations, primary and secondary cables, power mounds, air compressor units and distribution piping, and construction boiler plant; extend compressed air line.				
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Upgrades waterfront sewage collection, electrical power and compressed air systems and provides new substation. (New mission.) <u>REQUIREMENT:</u> Adequate utilities to support hotel services for berthed ships. The military relocation from the Philippines to Guam has increased the number of homeported ships and the tempo of fleet operations on Guam. This project will ensure the mission-capability of the Fleet ships by allowing them to shut down their boilers and on-board generating equipment for necessary overhaul and repair. <u>CURRENT SITUATION:</u> Existing waterfront utility systems are old and only marginally meet current demand. Additional utility demand caused by relocating fleet units exceeds current capabilities causing the ships to continuously operate their boilers and on-board generating equipment. This situation not only is bad personnel policy, requiring more hours of watchstanding, but also precludes necessary overhaul and repairs to on-board equipment. Marginal capabilities of existing systems to meet current demands for electrical services, steam and compressed air means no extra capacity to accommodate additional requirements during emergencies. Equipment failure in one of these facilities will reduce capability to provide sufficient support services to ships. Insufficient electric power, steam and compressed air support to ships will hamper their operational activities and delay their deployment, with negative impact on the Fleet's performance.

10. DESCRIPTION OF PROPOSED CONSTRUCTION One single-story and one two-story concrete frame building with concrete spread footings and pile foundations, concrete floor slabs, masonry walls, single ply membrane over concrete deck, seismic design, air conditioning, fire protection system, emergency lighting, technical operating manuals, dual fired gas/oil boilers, utilities, storage space, and demolition of existing buildings.				
11. REQUIREMENT: <u>57,880</u> SF ADEQUATE: <u>0</u> SF SUBSTANDARD: <u>0</u> SF <u>PROJECT:</u> Provides a mess hall with restaurant and quality of life facilities to include a consolidated club, an amusement center, a credit union, a bank, a bookstore, a special service (ITT) office, and associated storage for these activities. (Current mission.) <u>REQUIREMENT:</u> Adequate facilities for dining and recreational activities for military personnel living at Capodichino. These facilities are programmed in support of the expanded mission at Capodichino and do not represent facilities relocated from Agnano. This is the first of three projects providing quality of life facilities at Capodichino. <u>CURRENT SITUATION:</u> The facilities at Capodichino are old, undersized, and in poor condition. The existing dining facility is not sufficient to feed the expanding base population and was built before seismic building codes existed in Italy. Upgrading this facility is prohibitively disruptive and costly. In addition, there is a complete lack of recreational facilities. All existing facilities will be demolished to provide space for the on-going Naples relocation projects. <u>IMPACT IF NOT PROVIDED:</u> Continued use of inadequate dining and quality of life facilities and an absence of recreational facilities at Capodichino, will result in a degradation of morale and impact career retention efforts. The quality of life for assigned personnel will be well below the accepted Navy

10. DESCRIPTION OF PROPOSED CONSTRUCTION The host nation support required varies for each individual NATO project. These funds will be used to cover non-NATO eligible expenses such as host nation costs, life safety, functional utility/livability, energy, administrative expenses, design support, joint formal acceptance inspection and audit, currency fluctuation losses, and restoration floor.					
11. REQUIREMENT: <u>AS REQUIRED</u> <u>PROJECT:</u> Execute role as host nation and construction agent for NATO Infrastructure projects in CONUS, Iceland and Bermuda, in accordance with DOD Directive. <u>REQUIREMENT:</u> The Host Nation Infrastructure Support (HNIS) program provides a source of U. S. funds for each NATO-funded project to pay host nation costs. This authority is not used to increase the scope of a facility for U. S. functions, such work is included through conjunctive funding in separate MILCON projects. <u>CURRENT SITUATION:</u> Navy is construction agent for NATO Infrastructure projects at locations where the United States is host nation. HNIS responsibilities involve funding certain program costs, such as, land acquisition, source utilities, roads and parking, administrative expenses, design support, joint formal acceptance inspections (JFAI) and audits, currency fluctuation losses, and restoration floor. NATO eligibility criteria stipulates only Minimum Military Requirement (MMR) for wartime occupancy and does not include peacetime related features such as fire protection or energy conservation. The average annual HNIS program requirement (FY 1983 through 1990, inclusive) has been \$2,340,000. This request is based on approved NATO Infrastructure projects. <u>IMPACT IF NOT PROVIDED:</u> Timely U. S. funding for the work will not be possible. Delays in executing these projects for lack of HNIS funding will deprive operating

10. DESCRIPTION OF PROPOSED CONSTRUCTION Acquisition of interests in land at these locations: Naval Station, Roosevelt Roads, Puerto Rico Norfolk Naval Shipyard, Portsmouth, Virginia				
11. REQUIREMENT: <u>AS REQUIRED</u> PROJECT: Acquires interests in land at two locations to support activity missions. Adequate control of real estate by restrictive-use easements, land exchange, or fee title is necessary to provide sites for facilities, meet or protect operational capabilities, prevent future encroachment, and control development adjacent to present boundaries of military activities. Lack of control by the Navy of real estate proposed for acquisition by this project will inhibit necessary military operations. Justifications for each of the parcels to be acquired follow: <u>Naval Station, Roosevelt Roads, Puerto Rico</u> - The acquisition of land adjacent to Navy property at the Atlantic Fleet Weapons Training Facility (AFWTF) Radar Site, Crown Mt., Virgin Islands, will provide an adequate site, free of obstructions and radio frequency (RF) interference for the satisfactory operations of radars and other electronic systems. AFWTF operates, maintains, and develops weapons range facilities and services in direct support of the training of fleet forces and other activities and for the development, test and evaluation of weapons systems. The Range operations Center at Crown Mt., St. Thomas, is used in support of fleet training and test and evaluation operations conducted in the outer and inner ranges. This operational site is the most strategically located AFWTF remote control site. Acquisition of this land will also accommodate the forthcoming equipment and instrumentation expansion comprising Large Area Tracking Range (LATR) ground stations, additional radars, telemetry antennas and Range Electronic Warfare Simulators (REWS). The continuous escalating cost of land in the Caribbean, plus

1. COMPONENT NAVY	FY 1994 MILITARY CONSTRUCTION PROGRAM	2. DATE
3. INSTALLATION AND LOCATION/UIC: N46827 VARIOUS LOCATIONS		
4. PROJECT TITLE LAND ACQUISITION		5. PROJECT NUMBER P-094
<p>11. REQUIREMENT: (CONTINUED)</p> <p>imminent land development in this choice area require early approval of this project. Residential or commercial ownership of this property will invalidate the usefulness of the present site for both future planned and some current functions. The increased complexity of fleet exercises and increased number of participating ships and aircraft demand the installation of additional instrumentation. Because of its geographic location, the control site at Crown Mt. is the only site that could be utilized for the installation of additional instrumentation and a microwave link to St. George Hill Radar Site at St. Croix to support the planned increase of operations. The existing topographical configuration and real estate limitations preclude the accommodation of additional instrumentation systems. This limitation can only be overcome by acquiring the property adjacent to the southern boundary of the existing site.</p> <p><u>Norfolk Naval Shipyard, Portsmouth, Virginia</u> - Land acquisition is required to provide access for a second gate for emergencies as well as increased traffic flow due to expansion at the Scott Center Annex. A second entrance gate is required because the Norfolk and Portsmouth Beltline Railroad blocks the only existing gate at unspecified times throughout the day, creating a potentially hazardous condition should emergency or rescue vehicles be required to gain entrance. If this project is not provided, random blockage of the only entrance gate by passing trains will continue, potentially delaying emergency or rescue access to the shipyard.</p>

ITEM		U/M	QUANTITY	UNIT COST	COST (\$000)
POLLUTION ABATEMENT FACILITIES		LS	-	-	134,190
TOTAL REQUEST		-	-	-	134,190
<p>10. DESCRIPTION OF PROPOSED CONSTRUCTION</p> <p>These pollution abatement facilities will bring Naval and Marine Corps installations into compliance with federal, state, and local environmental laws. Facilities include upgrading existing structures, building new structures, solid waste disposal, and separation of water and sewer pipelines. Environmental engineering evaluations were performed to determine the most advantageous method for achieving compliance with environmental laws and regulations. (See individual project descriptions of work.)</p>					
<p>11. REQUIREMENT: <u>VARIES.</u></p> <p>Facilities at Naval and Marine Corps installations were often constructed with inadequate controls to meet present day environmental quality standards. Industrial wastewaters and sewage are discharged untreated or inadequately treated into adjacent waterways. These projects will continue the Navy's program for correcting, controlling, and preventing pollution at Naval and Marine Corps installations, and to comply with federal, state, and local air and water quality standards. The pollution abatement program includes projects from some of the following categories:</p> <p>Sanitary Wastewater System - Some installations have sewerage systems which do not meet present day minimum water quality standards. The Clean Water Act of 1972, PL 92-500, requires every "point source" discharger to obtain a permit which specifies the allowable amount and constituents that can be discharged to surface waters. The permit may contain a schedule specifying the dates by which the discharger will achieve compliance. Projects in this category provide improvements to sanitary sewage collection and treatment systems to satisfy the water quality criteria and permit requirements.</p> <p style="text-align: right;">(CONTINUED ON DD 1391C)</p>					

1. COMPONENT NAVY	FY 1994 MILITARY CONSTRUCTION PROGRAM	2. DATE
3. INSTALLATION AND LOCATION/UIC: NAVAL AND MARINE CORPS INSTALLATIONS, VARIOUS LOCATIONS		
4. PROJECT TITLE POLLUTION ABATEMENT FACILITIES		5. PROJECT NUMBER VARIOUS
<p>11. REQUIREMENT: (CONTINUED)</p> <p>Industrial Wastewater Treatment Facilities - Industrial operations create many unique waste disposal problems. These wastes are more difficult to treat than typical sanitary wastewater. Industrial wastewater effluents contain heavy metals and toxic and corrosive chemicals that are potential stream pollutants, and also have a deleterious effect on municipal sewage treatment systems. Therefore, the Navy must provide pretreatment plants so wastes are treated before being sent to municipal systems for further treatment. Industrial facilities may also discharge wastes, untreated or inadequately treated, into adjacent drainage courses that empty into harbor or navigable waters in violation of discharge permits. Projects in this category provide treatment facilities, and other modifications as required, to meet the discharge permit.</p> <p>Solid Waste Management Facilities - The Navy is fast approaching a crisis because of the lack of solid waste management facilities. These facilities are necessary to minimize the amount of trash, garbage, solid waste, and hazardous waste which must be handled; and to provide for the segregation and management of recyclable materials and their ultimate treatment and disposal in order to protect public health and the environment.</p> <p>Water and Sewer Pipelines Separation - Projects in this category insure compliance with environmental protection agency (EPA) and state regulations for the elimination of potable water contamination because of possible cross-connections of pipelines.</p> <p>Potable Water Treatment or Distribution Systems - Some installations which provide potable (drinking) water may not meet standards set by EPA or the states under the Safe Drinking Water Act (SDWA) of 1974, PL 93-523. Treatment systems must be modified or replaced to produce drinking water which meets the maximum contaminant levels (MCLs) specified by EPA for specific contaminants, including metals and organics. In some cases, distribution systems do not meet the requirements of the SDWA and must be modified or replaced.</p> <p>Oil Spill Prevention - Existing oil and fuel storage and transfer areas do not have the necessary oil spill control structures required to prevent accidental oil discharges from reaching navigable waters. To prevent the possible discharge of oil, in any form, into navigable waters or into the tributaries of such waters, Federal regulations require facilities storing or transferring oil to prepare an Oil Spill Prevention Control and Countermeasures Plan (SPCC Plan) and to fully implement this plan as soon as possible. Steel and concrete fuel storage tanks at the Navy's bulk fuel distribution facilities are now ecologically unsatisfactory because of navigable waters contamination. This was caused when Navy converted ships to the lighter middle distillate diesel fuel which seeps through numerous faults in the walls of tanks. In addition to tanks leaking, the fuel piping systems have deteriorated beyond environmentally safe limits and must be replaced.</p> <p>Hazardous Waste Storage Facilities - Owners and operators of hazardous waste transfer and storage facilities are required by the 1984 amendments to the Resource Conservation and Recovery Act (RCRA) to provide facilities meeting stringent standards. This requires that all hazardous waste be properly containerized, packaged, labelled and, if necessary, stored in approved facilities before final disposal. These facilities may not lawfully begin or continue transfer and storage activities until an effective RCRA permit is received. These projects provide facilities which comply with extensive technical and design standards as mandated by RCRA.</p> <p>(CONTINUED ON DD 1391C)</p>

<u>INSIDE THE UNITED STATES</u>				
<u>CALIFORNIA</u>				
831.10	P-820	INDUSTRIAL WASTEWATER TREATMENT PLANT (DBOF) BARSTOW CA MCLB		8,690
<p>A treatment plant in compliance with environmental requirements of all regulatory agencies, with adequate facilities for quality assurance and quality control activities, raw chemical storage, and sludge handling is required. The existing industrial wastewater treatment facility, constructed in 1959, was shut down in March of 1990 by the Regional Water Quality Control Board regulatory agency. The existing facility does not comply with current environmental laws and is the site of a Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Remedial Investigation. Wastewater is being collected in above-ground storage tanks and trucked to off-site treatment, storage, or disposal facilities at a high-cost. Some Depot Maintenance Activity (DMA) repair and maintenance operations have had to stop work due to prohibitive off-site treatment costs. Without this project, the DMA rebuild and repair capability on combat equipment will continue to be limited. Additionally, for those rebuild and repair activities in operation, the high-cost and safety risk of transporting the wastewater and hazardous materials long distances over public roads will still exist. (Current mission.)</p>				
831.20	P-529	SEWERAGE FACILITY CAMP PENDLETON CA MCB		7,930
<p>The existing sewage treatment plants provide secondary treatment of domestic sewage. The effluent is discharged to a stream and percolated to the groundwater basin upstream of the drinking water supply wells. The concentrations of total dissolved solids (TDS), nitrogen, and phosphorous violate the requirements of the National Pollution Discharge Elimination System (NPDES) permit. By moving the existing discharges to an area close to the ocean with controlled percolation, modification to the Basin Plan can be obtained, and a new NPDES permit issued which will be in compliance. It will also remove a possible source of contaminants which could cause violations of the Safe Drinking Water Act Amendments of 1986. Compliance cannot be achieved by modification of existing operations and facilities. Violation of the Cease and Desist Order gives the Executive Officer of the Regional Water Quality Control Board the authority to bring the matter directly to the State Attorney General for enforcement. Also the discharge will continue to increase the TDS concentrations in the groundwater upstream of the drinking water supply wells in the Margarita, San Onofre and Las Pulgas Basins. This project provides percolation of sewage treatment plant effluent in areas that ensure compliance with Cease and Desist Orders issued by San Diego Regional Water Quality Control Board for violations of the Las Pulgas and San Mateo Plants of Waste Discharge Requirement Orders No. 87-11 and 87-14, NPDES Permits No. CA 010 8251 and 010 8286, Waste Discharge Requirements prescribed by the San Diego Regional Water Quality Control Board, 23 January 1989. (Current mission.)</p>

179.45	P-129	FIRE FIGHTING TRAINING FACILITY LEMOORE CA NAS		1,930
Provides an environmentally-conforming facility for conducting fire fighting training. An adequate facility with a fire fighting pit, containing an aircraft mock-up enclosed by a berm and a vehicle maneuvering ramp, is required to maintain fire fighting proficiency. Aircraft rescue personnel at this station must periodically train using hands-on situations with conditions similar to those that might be encountered in an actual mishap, including hot drills simulating aircraft fire emergencies on a bi-monthly basis. The existing fire fighting training facility is not in compliance with Environmental Protection Agency (EPA) standards which require an impermeable barrier preventing flow or seepage of fuel or contaminated water to surface or subsurface drainage. Regulators could direct the station to cease and desist from operating the facility under the California Toxic Pits Clean-up Act. If this project is not provided, crashcrews will not be able to obtain the required training to maintain readiness in emergency situations. (Current mission.)				
SUBTOTAL - CALIFORNIA				18,550
<u>CONNECTICUT</u>				
831.41	P-441	HAZARDOUS WASTE TRANSFER FACILITY NEW LONDON CT NSB		1,450
A complete hazardous waste transfer facility is required to support hazardous waste storage and disposal operations. Defense Environmental Quality Program Memoranda of 13 May and 20 October 1980 and the Resource Conservation Recovery Act prescribe responsibilities for the disposal of hazardous property. To comply with these regulatory requirements, facilities of unique design are required to ensure safe and environmentally sound storage and disposal of hazardous materials. Currently, the transfer of hazardous waste is conducted in separated areas of generating activities. These sites lack capacity, spill containment, and/or fire and health provisions for safe, efficient operations. If this project is not provided, storage at multiple locations will continue, in violation of regulatory requirements. Effective and efficient disposal operations will remain unattainable, adversely impacting support to the Fleet, and the Base and generating activities will be subject to fines for noncompliance. (Current mission.)				
831.15	P-428	INDUSTRIAL WASTE TREATMENT FACILITY NEW LONDON CT NSB		5,700
Adequate facilities are required to enhance environmental protection, minimize transportation costs, and eliminate the potential for long-term liability because of improper oil disposal. Facility will also allow waste oil products to be burned in the base's on-site power plant. Approximately six million gallons of submarine bilge water, tank strippings, tank ballast and petroleum-based waste oils are collected and treated at the base. Two million gallons are treated in an existing oil water separator and four million gallons are processed in waste oil rafts. After separation, the waste water (approximately 5.7 million

<p>gallons or 95%) is either pumped into the local municipal sanitary sewer or the Thames River, which is an environmentally unsound practice. The oil accumulated from this process, approximately 300,000 gallons per year, is shipped to a remote site to be burned for fuel at a cost of \$.28 a gallon. This project will construct an industrial waste treatment facility in compliance with the Clean Water Act and the National Pollution Discharge Elimination System permit. Without this project, waste water will continue to be disposed of in the Thames River or the municipal sewer, risking an expensive long-term liability judgment for improper oil disposal. (Current mission.)</p>			
SUBTOTAL - CONNECTICUT			7,150
<u>FLORIDA</u>			
831.10	P-831	SANITARY WASTEWATER SYSTEM UPGRADE CECIL FIELD FL NAS	1,500
<p>Upgrades to the sanitary wastewater system are necessary to comply with Environmental Protection Agency (EPA) and the Florida Department of Environmental Regulation requirements that state that treated water discharged from a sewage treatment plant can no longer be discharged into surface waters. Secondary effluent is presently discharged downstream into the receiving waters and flows to the St. John's River. This project will construct appropriate tertiary treatment facilities for sewage treatment plant effluent to pass through before final station discharge, and insure Navy's compliance with Federal and state water quality standards. (Current mission.)</p>			
833.09	P-838	AIR EMISSIONS CONTROL MAYPORT FL NS	3,260
<p>Provides upgraded Carbonaceous fueled boiler facility (CFB) and new air pollution control system to meet current and future local, state, and federal regulations. The CFB burns waste from the Naval Station and ships in port, which cannot be recycled. Current and proposed emissions regulations require removal of particulates and objectionable compounds from the flue gas. The CFB is presently operating in violation of local particulate emission regulations. Proposed federal regulations will require additional flue gas cleaning which the present equipment will not accomplish. If this project is not provided, the installation will be in violation of emission regulations, which could shut down operations. This would necessitate uneconomical landfilling of refuse and disposing of waste oil off site. (Current mission.)</p>

<u>HAWAII</u>				
179.45	P-253	FIRE FIGHTING TRAINING FACILITY BARBERS POINT HI NAS		1,350
<p>Provides a fire fighting training facility that complies with federal and state environmental regulations. An adequate, environmentally-safe facility with a fire fighting pit containing an aircraft mock-up, enclosed by a berm, and a vehicle maneuvering ramp is required to conduct training to maintain fire fighting proficiency. Aircraft rescue personnel at this station must periodically train using hands-on situations with conditions similar to those that might be encountered in an actual mishap, including hot drills simulating aircraft fire emergencies. The existing fire fighting training facility is not in compliance with Environmental Protection Agency (EPA) standards, which require an impermeable barrier preventing the flow or seepage of fuel or contaminated water to surface or subsurface drainage. Training at this facility has been curtailed and regulators could direct the station to cease operation at the facility. If this project is not provided, crashcrews will not be able to obtain the required training to maintain readiness in emergency situations. (Current mission.)</p>				
831.15	P-468	INDUSTRIAL WASTE TREATMENT COMPLEX (DSOF) PEARL HARBOR HI PWC		18,560
<p>A fully compliant and permitted industrial waste treatment complex is required to serve all Navy and Marine Corps activities on the Island of Oahu. The complex will receive, test, recycle, and process for shipping or disposal the full spectrum of industrial wastes including providing any mitigating measures to minimize hazards and any occupational safety and health measures. There are no other facilities on Oahu capable of handling the Navy's hazardous waste. The rudimentary equipment in use now was constructed as a small acid neutralization facility in 1972. The facility does not meet Resource Conservation and Recovery Act (RCRA) requirements, is greatly undersized for serving the volume and complexity of wastes generated, and faces imminent shutdown. Similarly, the environmental/industrial laboratory facility has experienced an exponential growth in analysis requirements due to new regulations which exceed the capacity of the 1945 building. The State of Hawaii Department of Health issued Notices of Violation for the facilities in March 1990 and August 1991. Continued operation could result in fines and criminal penalties. Closure of the facility will result in long-term stockpiling of wastes on Oahu or else shipment of the wastes to the mainland at an estimated cost of \$8,000,000 annually. (Current mission.)</p>				
832.10	P-486	WASTEWATER COLLECTION SYSTEM IMPROVEMENTS (DSOF) PEARL HARBOR HI PWC		8,980
<p>This center operates one main trickling filter plant and four package wastewater treatment plants serving the Naval Computer and Telecommunications Area Master Station, Eastern Pacific (NCTAMSEASTPAC) in central Oahu. Treatment of sewage generated from the activity must comply with National Pollution Discharge Elimination System (NPDES) and State of Hawaii water quality standard requirements. The five small treatment units continuously violate effluent limitations imposed by new NPDES permits issued in September of 1990 and formal Notice of Violations (NOV's) from the state are imminent. The five units cannot meet the new</p>

		<p>permit limitations without significant and costly expansions to tertiary treatment levels. To continue operating as-is will result in substantial fines, civil liability and public outcry from concerned citizens. A number of municipal and private sewage treatment facilities on Oahu have recently been cited and fined for regulatory violations. This project proposes to construct a collection system to divert all sewage generated at NCTAMSEASTPAC to the City and County of Honolulu sewerage system. This is the lowest-cost alternative of the five studied based on an economic analysis and will eliminate the requirement for a NPDES permit, improve inland water quality, eliminate associated administrative burden and potential negative publicity, improve reliability, and eliminate the need to operate and maintain any wastewater treatment plant. (Current mission.)</p>	
		SUBTOTAL - HAWAII	28,890
		<u>MAINE</u>	
831.41	P-250	HAZARDOUS WASTE STORAGE FACILITY (DBOF) KITTERY ME PORTSMOUTH NSY	4,780
		<p>A fully compliant hazardous waste transfer, storage, and disposal facility that meets all codes and requirements of the Environmental Protection Agency (EPA) and the State of Maine is required. This project is vital for the continued industrial operations of the shipyard which generates over two million pounds of solid and hazardous wastes each year. These wastes include oil containing PCB's, mercury, used sand blast materials, contaminated oil, paints, etc. Adequate facilities are required for sampling, testing, and consolidating solid and hazardous waste until it can be disposed of by contract haulers. Presently, this critical work is done from a leased trailer, five container type buildings, a small temporary building and an open storage area. These structures are scattered over the yard and are totally inadequate in size and function for complying with Resource Conservation and Recovery Act (RCRA) regulations. The facilities lack weather protection for stored materials, spill containment, fire protection, emergency lighting, and personnel safety features and amenities. The existing facilities are marginally licensed under a temporary, "grandfather" type license from the Maine Department of Environmental Protection. Anticipated more restrictive requirements for treatment, storage and disposal facilities make the withdrawal of this license imminent. This would place the shipyard in an untenable position. (Current mission.)</p>

<u>NEW JERSEY</u>			
831.41	P-982	HAZARDOUS WASTE STORAGE FACILITY (DBOF) EARLE NJ NWS	870
<p>This project provides a fully compliant hazardous waste storage and transfer facility meeting all Federal and state laws for storage of up to one year. Hazardous materials are generated daily on the station, but the majority of the wastes come from homeported ships returning from deployment. Most of the generated wastes are ignitibles, such as paints, fuels and solvents. The station has only one enclosed facility, a quonset hut; an outdoor storage yard inside an explosive safety area; and a waste oil tank to store all the materials it receives. These facilities are very inadequate in size and in meeting stringent Environmental Protection Agency regulations. Additionally, the situation is becoming more critical due to the increasing quantities of hazardous wastes generated by more homeported ships and the length of storage time necessary. It is becoming more difficult for waste haulers to find landfills or proper disposal locations. The many safety and environmental violations within the existing building include cracks in the foundation, leaking and caved in roof, no fire protection, improper ventilation, overcrowding of materials, no separation berms, no eye wash fountains, no alarms and no alternate exit. The station is open to being cited for violations and possible fines. (New mission.)</p>			
SUBTOTAL - NEW JERSEY			870
<u>NORTH CAROLINA</u>			
833.15	P-946	LANDFILL CAMP LEJEUNE NC MCB	7,690
<p>An adequate sanitary landfill to dispose of wastes is required for Camp Lejeune to conform to Federal criteria for solid waste disposal facilities. The existing landfill permit has expired. As an interim measure, Camp Lejeune applied for a permit from the State of North Carolina for vertical expansion in July of 1992. Vertical expansion will extend the life of the current landfill to approximately December of 1994. When the current landfill becomes unusable, waste will need to be disposed of off-base. Because other landfills in the coastal plain area have the same limitations as Camp Lejeune, disposing of Camp Lejeune's waste outside of the coastal plain area is estimated to cost \$8 million per year. This project will provide a lined sanitary landfill. Without this project, Camp Lejeune will not have a landfill in compliance with federal and state regulations. Wastes will have to be disposed of off-base outside the coastal plain area at a considerable cost. (Current mission.)</p>			
831.10	P-947	WASTEWATER TREATMENT PLANT UPGRADE (PHASE I) CAMP LEJEUNE NC MCB	28,300
<p>North Carolina is attempting to reverse the degradation of New River water quality by tightening discharge limits. This is the first of three stand-alone projects proposed to satisfy sewage effluent deficiencies identified by State regulations and a mandate from the North Carolina State Environmental Management Commission stating that, effective 31 January 1992, effluent outfalls will not be allowed into shellfish harvesting (SA) waters. Camp Lejeune is unable to comply with the final</p>

833.20	P-830 TRASH RECYCLING FACILITY ADDITION (DBOF) NORFOLK VA PWC	5,330
<p>Solid waste management is involved with environmental issues relating to both incineration and landfill disposal. The recovery of certain materials and recycling is becoming a cost-effective practice, reducing the volume of solid waste and producing usable energy. Through sampling, it has been determined that the valuable material content of refuse collected by the Navy in the Norfolk area is higher than normal. Removal of these recyclables from the refuse is required to improve future incineration operations and reduce landfill disposal requirements. Trash is collected from industrial and warehouse areas, offices, housing, and ships in port and delivered to the salvage fuel plant. Between 1976 and 1986, all refuse generated was burned and the remaining ash disposed of at the regional municipal landfills. However, in August 1986, the ash tested positive in a toxicity test and, consequently, all refuse incineration at the plant ceased. To meet the base's steam demand, the boilers now burn oil. Loss of the ability to incinerate the refuse has resulted in a substantially large disposal cost. Solid waste disposal for the approximately 25,000 cubic yards collected is currently costing about \$420,000 per month. This waste contains aluminum, glass, paper, cardboard, plastics, and ferrous and non-ferrous metals. Recovering these materials would recycle about 40 percent of all the solid waste with a value of \$130,000 per month. The remaining waste, with a higher heat content, can then be incinerated or disposed of at a landfill. The Commonwealth of Virginia has adopted a goal of reducing solid waste disposal by 25 percent by 1995. Navy policy is to abide by and meet state goals for solid waste reduction. This project will construct an addition to the salvage fuel heating plant to house a transfer/recycling facility for extracting recyclable materials. It is the lowest-cost alternative based on an economic analysis with a 27-month payback period. Without this project, this center will not be able to reduce its operational costs for solid waste disposal by minimizing the volume delivered to the regional landfill and realizing income from selling recyclable materials. Additional benefits, including the interception of medical and hazardous wastes and improperly disposed of government property, and other positive environmental impacts, will not be achieved. (Current mission.)</p>

<u>WASHINGTON</u>		
831.16	P-157	OILY WASTE TREATMENT FACILITY BANGOR WA NAVSUBASE
		COST (\$000) 1,380
<p>Adequate facilities are required to improve local water quality by reducing the oil contamination of sanitary sewage pumped from Trident submarines to below the limits required by county law. This project will also insure that Trident refit schedules are accomplished in a timely manner by reducing the number of shutdowns which occur in the pier to shore waste transfer systems. The oil content of this base's sanitary sewage averages in excess of 100 parts per million with instantaneous concentrations far exceeding this amount. Delta Pier wastes are a major contributor to this contamination problem. Excessive oil contamination causes treatment breakdowns at the Kitsap County Wastewater Treatment Plant. The existing waste transfer system is susceptible to shutdowns caused by oil/water separator failure and cross contamination of the chemical holding tank and ship overboard discharge systems. Approximately six times a year failures require system shutdown and time consuming cleanups which interrupt refit operations. A third problem with the existing system is its inability to handle oil/water emulsions. These emulsions overcome the existing oil/water separator and flow into the sanitary sewer where they must be cleaned out and disposed of as hazardous waste during a system shutdown. Failures in the existing system hold the potential for delaying Trident refit schedules. This project will construct facilities to treat chemical holding tank and ship overboard discharge wastes pumped into the county sewer system from Trident submarines berthed at the Delta Pier. Without this project, contamination of the base's sanitary sewage will continue to exceed legal levels, resulting in problems at the treatment plant and increased pollution of Puget Sound. The system will continue to experience failures which require shutdown and disruption of Trident refit operations. (Current mission.)</p>		
831.41	P-370	HAZARDOUS WASTE STORAGE FACILITY (DBOF) KEYPORT WA NUWC DIV
		8,980
<p>A fully compliant hazardous waste transfer, storage, and disposal facility is required that meets all codes and requirements of the Environmental Protection Agency (EPA) and the State of Washington. The existing storage facility is sited over a debris landfill and directly adjacent to wetlands. The unstable character of the fill material and the facility's proximity to the wetlands places it in violation of Washington State Dangerous Waste and EPA Regulations. In addition, the facility is located on a designated "Superfund Site" and is part of an Installation Remediation Program. The existing facility lacks automatic fire suppression and alarm systems, personnel safety provisions, and segregation and spill containment features. The EPA has mandated closure of the facility. This project is vital for continued industrial operations at Keyport because it handles hazardous wastes generated by the MK 48 and MK 50 torpedo programs. (Current mission.)</p>

831.10	P-610	WASTEWATER COLLECTION AND TREATMENT SYSTEM Z/VARLOCS MILCON
		3,260
<p>Modifications to the wastewater collection system and construction of a new sewage treatment plant is required to replace the existing treatment facilities. The existing septic tanks, drain fields, and mounds system are either close to the end of their useful life or have become saturated and ineffective as a means of wastewater treatment. This results in a potential source of surface and ground water contamination in violation of National Pollution Discharge Elimination System (NPDES) permit requirements and state environmental regulations and ground water quality standards. Some of these facilities were built in the early 1940's and, although later expanded, are failing and unsuitable for continued use because of age, the relatively impervious soils over bedrock, and increased activity loading. To partially alleviate this situation and prevent NPDES violations, the septic tanks require weekly pumping out and hauling away of the effluent. A new treatment plant is required because no more open land is available on the activity for new leaching-type systems. Without this project, use of the existing drain fields must be discontinued because of unsuitable ground conditions, over-loading, and contamination of groundwater. The activity's primary mission will be significantly impacted because of possible drinking water contamination and legal action against the Navy. (Current mission.)</p>

TOTAL REQUEST		-	-	-	5,500
10. DESCRIPTION OF PROPOSED CONSTRUCTION Projects authorized by Title 10 USC 2805 not otherwise authorized by law (except family housing) having an approved cost of \$1,500,000 or less, including construction, alteration, or conversion of permanent or temporary facilities. Total request includes funds for supervision, inspection, and overhead.					
11. REQUIREMENT: VARIES. Title 10 USC 2805 provides authority to the Secretary of Defense and the Secretaries of the Military Departments to acquire, construct, extend, alter or install permanent facilities having an approved cost of \$1,500,000 or less not otherwise authorized by law. Included are those items required for which a need cannot reasonably be foreseen nor justified in time to be included in an annual military construction program, but are so urgently required that financing cannot be deferred until legislation in support of a new program is enacted.

A & E SERVICES AND CONSTRUCTION DESIGN		LS	-	-	64,373
TOTAL REQUEST.		-	-	-	64,373
10. DESCRIPTION OF PROPOSED CONSTRUCTION Funds to be utilized under Title 10 USC 2807 for architectural and engineering services and construction design in connection with military construction projects including regular program projects, unspecified minor construction, emergency construction, land appraisals, and special projects as directed. Engineering investigations, such as field surveys and foundations exploration, will be undertaken as necessary.					
11. REQUIREMENT: <u>VARIES</u> . All projects in a military construction program presented for approval must be based on sound engineering and the best cost data available. For this reason, design is initiated to establish project estimates in advance of program submittal to the Congress. Based on this preliminary design, final plans and specifications are then prepared. These costs for architectural and engineering services and construction design are not provided for in the construction project cost estimates.

<u>INSIDE THE UNITED STATES</u>					
<u>CALIFORNIA</u>					
143.45	P-712	ARMORY CAMP PENDLETON CA MCB		480	
<p>Adequate armory facilities are required for secure storage of approximately 3,200 weapons and other related items belonging to the Maintenance Battalion. Currently, an aging metal butler building at Pulgas is being used for interim weapons storage. It does not meet security or environmental control standards for permanent weapons storage. Continued storage of military ordnance in these unsatisfactory facilities increases the threat of loss through theft and corrosion. This project will provide the necessary facilities. (Current mission.)</p>					
441.10	P-067	FIRE PROTECTION SYSTEM SAN DIEGO CA NTC		700	
<p>Project provides an adequate and properly configured fire protection system and safety features required to protect the personnel, equipment, contents and structures for five single-story clothing warehouses and bring the buildings into compliance with the special occupancy requirements of the current National Fire Protection Association (NFPA) Life Safety Code. Provides buildings with automatic wet sprinkler fire protection system with connection to the base fire alarm system in accordance with NFPA code standards and installs upgraded fire walls to prevent fire spread between areas. The warehouses currently only have wall attached fire extinguishers and a hand operated fire alarm pull box at the corner of one building. If this project is not provided, the warehouse structures, contents, personnel, and equipment will continue to be at a high risk of fire hazard. Loss of these warehouse facilities and stored supplies would impair the activity's ability to support the training mission. (Current mission.)</p>					
171.10	P-505	ACADEMIC INSTRUCTION BUILDING ADDITION TWENTYNINE PALMS CA MAGCC		600	
<p>The Tactical Air Operation Module (TAOM) is a new piece of equipment that is being introduced in the Marine Corps inventory. Alterations to the Air Schools Academic Building are currently being accomplished to accommodate this equipment. However, adequate classroom space is unavailable for this training. An addition to the existing building is required to provide more classroom space for training. An interim relocatable facility is being used which provides neither the desired proximity to the equipment nor adequate classroom space. Without this project, this center will continue to use inadequate facilities which will lower the quality of training required to support this module. (Current mission.)</p>

<u>GEORGIA</u>			
740.74	P-705	CHILD DEVELOPMENT CENTER ALBANY GA MCLB	940
<p>A child development center is required to provide care for 110 school and pre-school children of Marine Corps personnel at this base. A child development center provides supervised care for infants, pre-school, and school age children in a common facility, on a regularly scheduled or drop-in basis, when parents are employed or at times when the family is temporarily unable to care for them. Child development centers are a necessary element in today's environment as their availability alleviates many problems incurred by military parents who are single, who both work, or who have other special needs. These centers make the quality of life more appealing to military personnel and their dependents. The existing center is located adjacent to the brig and 250 feet from (within the safety arc) of an ammunition storehouse. This center can only accommodate forty-seven children, with an additional twenty-four children located in a temporary leased facility. Without this project, child care services will continue to be provided in an inadequate and insufficient manner while exposing the children to unnecessary safety hazards. (Current mission.)</p>			
SUBTOTAL - GEORGIA			940
<u>NEW JERSEY</u>			
143.11	P-955	MATERIALS HANDLING EQUIPMENT SERVICE CENTER ALTERS (DBOF) EARLE NJ NWS	420
<p>Renovates and converts a facility located at Earle's waterfront into three properly layed-out and equipped maintenance areas to more efficiently service and maintain automotive vehicles, materials handling equipment, and small boats. Presently, there are no facilities available at the waterfront area that can provide adequate service for the materials handling equipment and small boats. Small boat maintenance and repair is presently done outdoors in a vehicle parking area using lightweight portable hand tools, and is subject to the weather. The building currently used for vehicle maintenance, while exceeding the required space, is not equipped with the proper tools or special work areas. This project provides the necessary alterations required for the specialized built-in equipment and work areas needed to perform maintenance and support services. Without this project, this activity will continue to be unable to service materials handling equipment and small boats at the waterfront area. This will greatly affect Earle's ability to support existing and future homeported ships in the areas of materials handling equipment, small boat and automotive vehicle service and maintenance. This project will be conjunctively funded with NATO. (New mission.)</p>

<u>SOUTH CAROLINA</u>				
842.10	P-786	FIRE PROTECTION PIPELINE (DBOF) CHARLESTON SC NWS		580
This station requires additional water lines for fire protection on a pier which handles ammunition and explosives. Navy safety criteria requires that there be water flow of certain quantity and pressure available for fighting fires that may occur at a pier. The existing water distribution system is undersized and cannot provide the required flow for protection of life, weapons and ships alongside the pier. This project will provide increased water flow for the pier area and reduce the high potential for loss of life and costly weapons and equipment. (New mission.)				
SUBTOTAL - SOUTH CAROLINA				580
<u>TENNESSEE</u>				
171.35	P-292	FUELS TRAINER FACILITY MEMPHIS TN NAS		600
Provides an adequate facility for support of the Aviation Fuels Training Schools, which provide officers and selected members of the Aviation Boatswain's Mate Fuels (ABF) Rating with requisite knowledge in shipboard aircraft fuels, fueling systems, operations, maintenance and repair. Skills developed include reclamation procedures, tank stripping, fuel transfer and service, fueling/defueling aircraft and malfunctioning/emergency routing of fuel. Fuels training is currently conducted at NAS Memphis without a fuel systems trainer. This project will continue the consolidation of aviation rate training at Memphis, and will provide a facility to house the fuel system trainer equipment already procured and in storage awaiting a facility. Without this project, training will continue to be degraded, increasing the possibility of loss of aircraft and personnel because of contaminated fuel. (New mission.)				
842.10	P-293	POTABLE WATER SYSTEM IMPROVEMENTS MEMPHIS TN NAS		350
The State of Tennessee has expressed urgent concern that some very serious cross connections between this station's potable water system and potentially polluted sources have not been corrected. Portions of the water distribution system and building plumbing systems were installed in the 1940's, prior to the adoption of stringent plumbing regulations. This project will provide backflow prevention devices in the potable water system to enable this station to comply with applicable Federal and State of Tennessee drinking water regulations. Without this project, the cross connections will not be eliminated, the risk of drinking contaminated water will continue, with the associated threat to the health and safety of those dependent on the water system. This station will continue to be in violation of Federal and state regulations. (Current mission.)

<u>GUAM</u>				
137.10	P-001P	OCEANOGRAPHY BUILDING ALTERATIONS GUAM NAVOCEANCOMCEN		690
<p>Closing the Naval Oceanography Command in the Philippines has resulted in the relocation of the functions and personnel to the Naval Oceanography Command Center/Joint Typhoon Warning Center (NAVOCEANCOMCEN/JWTC), Guam. The existing facilities are inadequate and not configured to accommodate the additional equipment and personnel required to provide the increased fleet meteorological and oceanographic support. The addition of the ten relocated billets from the Philippines, computer upgrades, additional equipment, and the installation of the previously ordered new systems will adversely affect direct fleet meteorological support. The NAVOCEANCOMCEN/JWTC is solely responsible for issuing timely and accurate warnings of tropical cyclone development throughout the entire western Pacific and Indian Ocean areas. This activity also provides extratropical warnings of storms, high winds, and other phenomena hazardous to the operating fleet. Without this project, this activity will not be able to accommodate the functions and personnel relocated from the Philippines and will not be able to provide the fleet and shore activities with the most accurate and timely weather data possible.</p>

FAMILY HOUSING - FY 1994 BUDGET SUMMARY
PROGRAM SUMMARY**

(In Thousands)

FY 1994 Program \$1,218,889

FY 1993 Program \$1,049,745

Purpose and Scope

This program provides for the support of military family housing functions within the Department of the Navy.

Program Summary

Authorization is requested for:

(1) The performance of certain construction summarized hereafter; and

(2) The appropriation of \$1,218,889

(a) to fund this construction; and

(b) to fund partially certain other functions already authorized in existing legislation.

A summary of the funding program for Fiscal Year 1994 follows (\$000):

DEPARTMENT OF THE NAVY
FAMILY HOUSING - FY 1994 BUDGET ESTIMATE
CONSTRUCTION OF NEW HOUSING

(In Thousand)

FY 1994 Program \$160,149
FY 1993 Program \$233,390

Purpose and Scope

This program provides for land acquisition, site preparation, acquisition and construction, and initial outfitting with fixtures and integral equipment of new family housing units and associated facilities such as roads, driveways, walks, utility systems, solar energy systems, and community and recreational facilities.

Program Summary

Authorization is requested for:

- (1) Construction of 1,309 new and replacement homes, 20 mobile home park spaces, and three stand alone support facilities (Self Help Warehouses, Welcome Centers and Community Center); and,
- (2) Appropriation of \$160,149,000 to fund this construction.

11. <u>REQUIREMENT:</u>		
<p><u>Project:</u> Construction of 218 new and 100 replacement homes for junior enlisted families. (Current Mission)</p> <p><u>Requirement:</u> Adequate family housing is needed for married personnel and their families. This project includes the first of three phases to replace the 810 Bayview units which have been determined to be structurally unsound. The first phase involves demolition and replacement of 100 units. The economic analysis has been prepared comparing the alternatives of status quo, revitalization, and replacement construction. Replacement construction is the recommended alternative, as it corrects current deficiencies and provides modernized, energy efficient housing. This project includes community recreational facilities and expanded common open spaces reflecting the Navy's Neighborhoods of Excellence concepts. Recreational facilities include tot lots, jogging paths, and playing courts/fields in accordance with MIL-HDBK-1035.</p> <p><u>Current Situation:</u> Existing housing in the Bayview Housing Area at San Diego is structurally unsound. The units were built in 1947 as a low income housing project. They were acquired by the Navy in 1953 for use as Navy Family Housing. The units are undersized, do not meet minimum standards for numbers of bathrooms, and have a poor unit design for livability. The units have extensive deterioration of the electrical wiring and distribution system. Sewer systems have failed. Roofs are worn out. The interior layout is poor. And the units have minimal insulation and no energy conservation features. The projected family housing deficit in San Diego is the largest in the Navy. Although there is a projected decline in personnel due to planned force structure reductions, the housing deficit is expected to be about 9,700 in 1997. The current inventory of almost 7,000 units satisfies less than 21 percent of the family housing requirement. Despite aggressive housing referral service efforts to maximize the Navy's share of available adequate community housing, there is a huge waiting list for Navy housing. Approximately 7,000 families face waiting times ranging from 19 to 36 months. The most critical need is for two, three, and four bedroom units for junior enlisted families. The local community's inability to provide sufficient adequate and affordable housing for Navy families continues to be a major concern. Vacancy rates are low and a substantial number of rental assets are seasonal and high cost, and out of reach for most of our junior enlisted personnel. The average sale price of \$197,000 is also beyond the reach of most enlisted and junior officer families. Cost continues to undermine the local community's ability to supply affordable housing to more Navy families.</p> <p><u>Impact If Not Provided:</u> Military members will be forced to choose between involuntary separation from their families, or accepting housing that is unaffordable or unsuitable. Either choice will likely lead to poor morale and dissatisfaction with the Navy. Retention of quality personnel will be adversely impacted.</p> <p>Project design conforms to Part II of Military Handbook, 1190, "Facilities Planning and Design Guide".</p> <p>Necessary coordination with the school district is in progress.</p>

15. REMARKS									
<p>Lines 6 & 7. Projections show significant decline in base loading numbers due to planned force reductions. Reductions are predominantly host/tenant and large ships.</p> <p>Line 9b. This is the first of several phases to replace the Bayview housing area which is beyond economic repair. 100 units are scheduled for replacement in FY94.</p> <p>Line 12a. Military assets exclude the 100 Bayview units slated for replacement in the FY94 program.</p> <p>Line 12a(2). The 724 units represent the 408 unit FY92 project, the 300 unit FY93 project, plus 16 units carried over from the FY91 project.</p> <p>Line 12b. The April 92 Naval Complex San Diego market analysis projects that the Navy's share of suitable community assets will decline. Housing allowances will not likely keep pace with the 5% annual increase in housing costs projected through 1996. Projected community assets are taken from Tables 4-5/4-6 of the analysis.</p> <p>Line 14. The 318 unit project satisfies 3.5% of the deficit and is well within the programming limit established by OSD guidance of 17 Aug 90 (build up to 90% of effective housing deficit).</p>									
<div style="text-align: right;"> 318 Enlisted Units 158 2-bedroom JEM 160 3-bedroom JEM <hr/> 318 Total Units </div>									
Current data = FY92. Projected data = FY97. Projections reflect personnel reductions over the FYDP.

11. <u>REQUIREMENT:</u>		
<p><u>Project:</u> This project represents the second phase of a program to replace the Bellevue housing area. Demolition occurs under phase one. Replacement with 188 junior enlisted homes occurs under phase two. Phase two also includes construction of a community center/project office for the Bellevue housing area, and a Family Housing Office to support PWC Washington. (Current Mission)</p> <p><u>Requirement:</u> This project will provide 188 replacement homes for junior enlisted personnel and their families. The project provides a community center/project office. The community center will have multi purpose areas for meetings, community events and town meetings. The project office will provide a small area for the Bellevue housing inspectors and for a Self Help Store. The project also includes a Family Housing Office. The need for this Housing Office results from the establishment of Public Works Center (PWC) Washington that was implemented 1 October 1992. The PWC is organized as a central Headquarters/Administrative operation with decentralized field operations. This consolidates all family housing in the National Capital Region (NCR) under PWC Washington. PWC will centrally manage all Navy owned family housing units within a 30 mile radius of the Pentagon. This increased responsibility will require a significant growth in the size of the housing staff. The existing facility is approximately one-half of the space which will be required to operate the Family Housing Office efficiently and in a professional manner. This project includes community recreational facilities and expanded common open spaces reflecting the Navy's Neighborhoods of Excellence concepts. Recreational facilities include tot lots, jogging paths, and playing courts/fields in accordance with MIL-HDBK-1035.</p> <p><u>Current Situation:</u> The deteriorated, substandard family housing units at Bellevue will be demolished under phase one. Demolition is scheduled to begin in late summer 1993. There is an extreme shortage of affordable, suitable housing in the Washington, DC area for enlisted personnel. Rental rates and the cost of for-sale housing in the region are beyond the reach of most junior enlisted personnel. The existing housing office is old and much too small to provide quality services to military families to be served under the NCR consolidation.</p> <p><u>Impact If Not Provided:</u> If replacement units are not provided for the Bellevue area, a severe shortage of available housing for junior enlisted personnel will exist. Adequate, affordable, private sector housing for junior enlisted personnel is limited in the metropolitan area. If the existing family housing office is not replaced, the housing staff which takes care of incoming and departing families will be unable to provide essential housing services. Efficiency and customer satisfaction will benefit by collocating all housing functions at a one-stop-shop.</p> <p>Project design conforms to Part II of Military Handbook, 1190, "Facilities Planning and Design Guide".</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>Construct detached metal frame or masonry structure on concrete slab for storage and issue of self help items. Space is included for storage of appliances and furnishings for family housing units. Facility includes heating, cooling and humidity equipment required by local practice.</p>				
11. <u>REQUIREMENT:</u>				
<p><u>Project:</u> Construct a warehouse for storage and issue of self help items, and provide an area to store family housing appliances and furnishings. The project includes adequate utilities, site improvements and parking. (Current Mission)</p> <p><u>Requirement:</u> This facility will provide a large building for storing and issuing self help items. A section of the warehouse will be dedicated to storage of appliances and furnishings. The building will be conveniently located for deliveries. Inventory control will be facilitated once appliances and furnishings are centrally located.</p> <p><u>Current Situation:</u> Two leased trailers serve as temporary storage facilities for family housing. This interim arrangement is not only expensive, but storage space is inadequate. The severely limited storage capacity impedes implementation of a full service Self Help Center. It also results in an inadequate supply of replacement appliances and furnishings for the family housing inventory.</p>				

1. COMPONENT NAVY	FY 19 <u>94</u> MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION PWC PENSACOLA FLORIDA		
4. PROJECT TITLE SELF HELP CENTER/WAREHOUSE		5. PROJECT NUMBER H-219
11. <u>REQUIREMENT:</u>		
<p>Impact If Not Provided: Limited storage will continue to result in an inadequate on-hand supply of appliances and furnishings, and will cause further delays in acquiring replacement appliances for Pensacola family housing. Self Help will continue to maintain an inadequate supply of loaner and replacement items. Failure to provide adequate facilities will adversely affect quality of life, and will be detrimental to instilling pride-of-ownership attitudes among the residents. Additionally, failure to provide a full service Self Help Center will result in increased budget requirements for maintenance which could otherwise be accomplished by residents on a self help basis. Expensive leasing fees will continue to be paid for the trailers, and the possibility exists that additional trailers will have to be leased.</p> <p>Project design conforms to Part II of Military Handbook, 1190, "Facilities Planning and Design Guide".</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>Detached permanent type construction with visitor/staff parking and land-scaping. Functions include reception/waiting areas, children's play area, counseling rooms, conference/training room, staff offices and lounge, rest rooms, file and storage area, and janitorial space. Space is included for storage and issue of self help items, and for warehouse and issuing government provided appliances and furnishings.</p>				
11. REQUIREMENT:				
<p><u>Project:</u> This project will construct a single story building which will consist of a Family Housing Office, a Self Help Center and a furnishings warehouse. The project includes adequate utilities, site improvements and parking. (Current Mission)</p> <p><u>Requirement:</u> A single facility is required to provide support and services to military families attached to NSB Kings Bay. This project will provide a centrally located facility which will include a Family Houaing Office, a Self Help Center and a furnishings warehouse.</p> <p><u>Current Situation:</u> Beginning in FY-93, the family housing staff is being forced out of their existing office space. They will be temporarily relocated to a facility which is approximately one-half of the required administrative space. Current self help and warehouse facilities are inadequate. The severely limited storage capacity impedes implementation of a full service Self Help Center. It also results in an inadequate supply of replacement appliances and furnishings for the family housing inventory.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>Construct permanent stations for locating privately-owned single and double wide manufactured housing (Mobile Home) units. Scope of individual spaces includes provision of utility services, tie downs, parking patios, exterior storage units, and landscaping. Project scope shall include paved streets, sidewalks and a recreation area.</p>				
11. <u>REQUIREMENT:</u>				
<p><u>Project:</u> Construct 20 mobile home park spaces. (Current Mission)</p> <p><u>Requirement:</u> This project will provide an alternative for enlisted members and their families. It will help to shorten the waiting for time for the 20 existing mobile home park spaces.</p> <p><u>Current Situation:</u> Currently lower graded enlisted personnel waiting for military housing are forced to choose between substandard housing or living apart from their families. The availability of mobile home lots for rent in the private sector is still scarce, especially for those members who already own a mobile home. This situation eliminates a good source of affordable housing for our junior personnel. Local entrance fees continue to increase, remain non-refundable, and monthly lot rents are increasing. The current waiting time for existing lots is 6-12 months.</p> <p><u>Impact If Not Provided:</u> Failure to provide this mobile home park will result in continued long waiting lists. Lower graded enlisted members will be forced to choose between involuntary separation from their families or accepting housing that is unaffordable or unsuitable. Retention and morale of quality personnel will be adversely impacted.</p> <p>Project design conforms to Part II of Military Handbook, 1190, "Facilities Planning and Design Guide".</p>

15. REMARKS									
<p>Block 4. Primary responsibilities include administration, training, and readiness of the Atlantic Fleet Aircraft Patrol Force conducting long range anti-submarine operations and surveillance tactics, and ensuring the availability of aircraft patrol forces to meet operational commitments.</p> <p>Lines 6 & 7. Projections show a decline in base loading due to a loss in ships in overhaul specifically the DDG Halor. The prospective gain of VP-40 squadron, due to the closure of NAS Moffett Field, is not reflected in the projected base loading.</p> <p>Line 14. The proposed project is for 20 mobile home pads. No paygrade designation is attached to mobile home pads. NAS Brunswick currently has 20 mobile home spaces on base, with a demand for twice this amount. Local entrance fees for private off-base spaces continue to increase & are non-refundable. The waiting time for an on-base mobile home lot is about 1 year.</p>									
Current data = FY92. Projected data = FY97. Projections reflect personnel reductions over the FYDP.

1. COMPONENT NAVY	FY 19 <u>94</u> MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION PWC NORFOLK/NAB LITTLE CREEK, VIRGINIA		
4. PROJECT TITLE FAMILY HOUSING		5. PROJECT NUMBER H-258
11. <u>REQUIREMENT:</u>		
<p><u>Project:</u> This project represents the second phase of a program to demolish 608 deteriorated, substandard family housing units at Ben Morrell and construct replacement homes. Demolition of 287 units occurs under Phase I. This phase demolishes the remaining units and provides 388 replacement homes. Replace 4 units at Little Creek. Demolition includes removal of asbestos materials and underground storage tanks. Construct a community center and a Family Housing Office. (Current Mission)</p>		
<p><u>Requirement:</u> This project demolishes existing units determined to be structurally unsound, and replaces at a lower density. An economic analysis has been prepared comparing the alternatives of status quo, revitalization, and replacement construction. Replacement construction is the recommended alternative as it corrects current deficiencies and provides modernized, energy efficient homes. This project includes community recreational facilities and expanded common open spaces reflecting the Navy's Neighborhoods of Excellence concepts. Recreational facilities include tot lots, jogging paths, and playing courts/fields in accordance with MIL-HDBK-1035. A community center and a one-stop-shop Family Housing Office are included in the replacement project.</p>		
<p><u>Current Situation:</u> Existing housing at Ben Moreell is structurally unsound. Units are failing at the rate of six to eight per month. Failures of occupied units include collapsed plaster ceilings, severe water and termite damage, and sewer and gas leaks. 388 units will replace the existing 608 substandard units to bring site density into compliance with family housing standards. The housing area currently does not have a community center. The area is the site of a housing office which supports approximately one-half of the housing staff. The office is a housing unit converted to administrative space. The remainder of the housing staff is located in a temporary lease facility located at Janaf Shopping Center. The lease is up at the end of FY-95. The four officer units at Little Creek are structurally unsound and pose fire and safety hazards. The electrical wiring is severely deteriorated. Replacement wiring is cost prohibitive. The units experience frequent roofing and heating system failures. The Little Creek replacement units are billet quarters.</p>		
<p><u>Impact If Not Provided:</u> If replacement homes are not provided for the Ben Moreell area, a severe shortage of available housing for junior enlisted personnel will exist. Adequate, affordable, private sector housing for junior enlisted personnel is limited in the metropolitan area. This is particularly true for large bedroom units. If current administrative facilities are not replaced, the housing staff which services incoming and departing families will continue to be split between the existing office at Ben Moreell and the Janaf Office. The lease at Janaf expires the end of FY-95. Efficiency and customer satisfaction will benefit by collocating these housing functions at a one-stop-shop. Failure to replace the four billet quarters will result in flags and senior officers displacing field grade officers in order to live on base. The field grade units will require significant improvements to accommodate the entertainment requirements associated with the billet positions.</p>		
<p>Project design conforms to Part II of Military Handbook, 1190, "Facilities Planning and Design Guide".</p>

14. PROPOSED PROJECT								4	388	0	392																
15. REMARKS																											
Line 9b. 287 units are scheduled for demolition at Ben Morrell. Units scheduled for replacement in the FY94 program include 388 additional units at Ben Morrell and 4 units at Little Creek.																											
Line 12a. Military assets exclude the 287 units scheduled for demolition and the 392 units beyond economic repair which are slated for replacement in the FY94 program.																											
Line 12b. As the military presence in the area declines, a reduction in the Navy's share of suitable community assets will also occur. Junior enlisted paygrades with 3 & 4 bedroom requirements are particularly impacted since these units tend to be very expensive, or are available only in the "for sale" market.																											
Line 14. The proposed project will replace 388 of the 608 substandard units in the Ben Morrell housing area. The other 321 units are scheduled for demolition as part of the FY94 project. 4 units at Little Creek will also be replaced under the proposed project. Units in both housing areas are already being vacated due to severe structural & mechanical failures.

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>Detached permanent type construction for assembly occupancy, with parking and landscaping. Functions include multi-purpose assembly area, activity rooms, kitchen, rest rooms, and locker space.</p>				
11. <u>REQUIREMENT:</u>				
<p><u>Project:</u> This project will construct a 8,000 square foot community center. (Current Mission)</p> <p><u>Requirement:</u> The 600 unit Wadsworth housing area is comprised of 404-three bedroom and 196-four bedroom townhouse units providing housing for enlisted ranks E-1 through E-9. The area is home to approximately 2,900 occupants, of which 1,800 are children and teenagers. Wadsworth is a high density housing complex which is not collocated with any other military activity or base. It is several miles from the nearest military support facility, and is completely surrounded by civilian community housing, apartments and subdivisions. The Wadsworth housing area desperately needs a community center to accommodate the social, cultural and physical activities of its residents.</p> <p><u>Current Situation:</u> No community center exists in the Wadsworth Housing area. Lack of public transportation restricts access by Wadsworth youths to limited civilian facilities. The absence of sidewalks along the heavily traveled perimeter road creates a serious safety hazard for pedestrian traffic. The need for a community center has received a great deal of attention from the press, auditors, and politicians since the murder of a resident teenager by a peer.</p>

3. INSTALLATION AND LOCATION NSB BANGOR WASHINGTON		
4. PROJECT TITLE FAMILY HOUSING		5. PROJECT NUMBER H-221
11. <u>REQUIREMENT:</u>		
<p><u>Project:</u> Construction of 290 homes for junior enlisted families, as well as a community center for Navy families living at NSB Bangor. (Current Mission)</p> <p><u>Requirement:</u> Adequate family housing and a community center are needed for married personnel and their families. This project includes community recreational facilities and expanded common open spaces reflecting the Navy's Neighborhoods of Excellence concepts. Recreational facilities include tot lots, jogging paths, and playing courts/fields in accordance with MIL-HDBK-1035.</p> <p><u>Current Situation:</u> NSB Bangor is one of four Navy activities comprising this CNO-classified Critical Housing Area. The base is located in Kitsap County. Although there has been some fluctuation in the number of ships in the area, the overall Navy housing demand has maintained a strong growth trend over the past several years. Despite the decline in personnel due to planned force structure reductions, the housing deficit is expected to be over 700 units by 1997. A market analysis supports the housing need identified in the survey, and projects a critical housing shortage for enlisted families. With the rapidly increasing population in Kitsap County, our Navy families are becoming a smaller portion of the households and are being squeezed out of the housing market. Private developers are faced with rising land costs and development fees, and are not creating housing which is affordable for our junior sailors whose housing allowances are being substantially outpaced by sharp increases in both sale and rental housing costs. In addition, no community center currently exists. The present situation creates a hardship for families living in government housing at NSB Bangor by not providing a facility that ensures adequate space for community meetings, social functions, and recreational activities.</p> <p><u>Impact If Not Provided:</u> Military members will be forced to choose between involuntary separation from their families, or accepting housing that is unsuitable. Either choice will likely lead to poor morale and dissatisfaction with the Navy. Retention of quality personnel will be adversely impacted. There will not be a community center facility to provide adequate meeting, lecture and social activity space to more than 1,200 families residing in government housing at NSB Bangor.</p> <p>Project design conforms to Part II of Military Handbook, 1190, "Facilities Planning and Design Guide".</p> <p>Necessary coordination with the school district is in progress.</p>

15. REMARKS									

Lines 6 & 7. Projections show a decline in baseloading numbers due to planned force reductions.

Line 12a(2). The 400 units identified as under contract/approved are the 200 units in the FY93 President's Budget plus the FY93 200 unit Congressional add.

Line 12b. As the military presence in the area declines a reduction in the Navy's share of suitable community assets will also occur.

Line 14. The proposed project satisfies 40.8% of the deficit & is within the programming limit established by OSD guidance of 17 Aug 90 (build up to 90% of effective housing deficit).

Project Composition

300 Enlisted Units 270 2-bedroom JEM

4. PROJECT TITLE FAMILY HOUSING		5. PROJECT NUMBER H-259
11. <u>REQUIREMENT:</u>		
<p><u>Project:</u> Construction of 40 homes for junior enlisted families. (New Mission)</p> <p><u>Requirement:</u> NCS Thurso is closing and functions are being transferred to NSGA Edzell. This project will provide adequate junior enlisted quarters for Navy families migrating from NCS Thurso. Adequate family housing is needed for married personnel and their families. This project includes community recreational facilities and expanded common open spaces reflecting the Navy's Neighborhoods of Excellence concepts. Recreational facilities include tot lots, jogging paths, and playing courts/fields in accordance with MIL-HDBK-1035.</p> <p><u>Current Situation:</u> NSGA Edzell is a remote overseas location with a limited rental market. A December 1991 family housing market survey indicates that the local economy will not be able to support the projected increase in personnel at NSGA Edzell. The housing market is already extremely tight, and the situation will only deteriorate as additional personnel are transferred from NCS Thurso.</p> <p><u>Impact If Not Provided:</u> If the family housing is not provided, a severe shortage of suitable homes will exist. Due to the remote location of the base, suitable rental units are in very short supply. Military members will be forced to commute over an hour to get to work, or they will face involuntary separations. Morale and retention will be negatively impacted.</p> <p>Project design conforms to Part II of Military Handbook, 1190, "Facilities Planning and Design Guide".</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>This project involves the purchase of 81 units located at West Ruislip. These units are currently leased by the Navy and are assigned to enlisted members and their families. The project proposes to exercise the purchase option contained in the current lease agreement between the Navy and the landlord. 1994 is the last year this purchase option can be exercised.</p>

11. <u>REQUIREMENT:</u>		
<p><u>Project:</u> This project involves the exercise of a purchase option to acquire 81 units that are currently leased by the Navy at West Ruislip for NAVACTS London, UK. (Current Mission)</p> <p><u>Requirement:</u> The existing lease agreement contains a series of pre-priced purchase options that can be exercised by the Navy to purchase these units. Prices are stated in English pounds. The last year this purchase option can be exercised is 1994.</p> <p><u>Current Situation:</u> There is a current and projected deficit of suitable housing for Navy families. The competition for suitable housing in London is intense due to factors such as cost, overcrowding, etc. The cost of housing has risen between 20-25% over the last two years. The recent median price of a three bedroom townhome in London was \$200,000. In 1994, the same unit would cost over \$250,000 if recent escalation trends continue. Rental prices are also subject to the same trends in upward escalation. Rental market values for mid- and lower-priced properties have risen at a rate of 12-15% per year and the trend of property appreciation is expected to continue. Sufficient living space is also a serious problem for Navy families. Most U.K. homes are small and prohibit use of standard American furnishings and appliances. These homes lack adequate storage areas and frequently lack connections for hookup of washers and dryers. Support facilities such as the commissary and exchange are located at RAF West Ruislip.</p> <p><u>Impact If Not Provided:</u> The purchase options for the West Ruislip units will expire unless exercised. The alternative would be to renew the lease agreement for these or other units. Renewed leasing would be at an increased cost and would result in the need for additional high-cost lease points as the annual costs would exceed \$20,000 per unit per year. If the purchase option is not exercised, and leasing is continued, resources would have to be applied to the leasing account for these units. (The leasing budget does not include any provision for these units.) If the purchase option is not exercised, and leasing is not continued, these families would likely become unsuitably housed due to the shortage of suitable housing in London. This would be detrimental to quality of life and satisfaction with the Navy. In addition, this alternative would require the payment of allowances which are presently unprogrammed and unbudgeted.</p>

15. REMARKS								

Line 9b. Includes 81 lease-construct enlisted assets at West Ruislip. A pre-priced purchase option must be exercised by 31 Mar 94. If the purchase option is not exercised, the renegotiated lease is anticipated to exceed the high cost statutory limit by FY95. If this occurs, the units will be lost from the inventory since the Navy has no additional high cost lease points.

Line 14. The economic analysis supports execution of the pre-priced purchase option in FY94.

DEPARTMENT OF THE NAVY
FAMILY HOUSING - FY 1994 BUDGET ESTIMATE
CONSTRUCTION IMPROVEMENTS

(In Thousands)

FY 1994 Program \$190,696
FY 1993 Program \$130,844

Purpose and Scope

This program provides for alterations, additions, expansions, and/or extensions to existing public quarters, other real property, and supporting facilities. As such, it has a major impact on the quality of life for military families. This program will increase the useful life and livability of the homes, bring them up to contemporary standards, and make them more energy efficient.

Program Summary

Authorization is requested for:

- (1) Various improvements and/or major repairs to existing family housing; and
- (2) Appropriation of \$190,696,000 to fund these improvements.
- (3) We are continuing our emphasis on revitalization through whole neighborhood projects, which will accomplish all required improvements and repairs at one time. We have also included repair projects considered to be a major investment.
- (4) A separate DD 1391 is attached for all projects exceeding \$50,000 per unit as adjusted by the area cost factor.

10. DESCRIPTION OF PROPOSED CONSTRUCTION Provides for revitalization of family housing units, support facilities and infrastructure. Revitalization consists of alterations, additions, expansions, modernization, and major repairs. Typical work includes kitchen and bath renovations/modernization; upgrades and repairs to structural, electrical, and mechanical systems; and repairs/replacements involving utility systems and other infrastructure. 11. REQUIREMENT: Major investments to the Navy's family housing inventory are needed to arrest and correct deterioration, address obsolescence of our homes (whose average age is thirty years) and their components, and make the units more functional and energy efficient. Revitalization will extend the useful life of these units. IMPACT IF NOT PROVIDED: The Navy will not achieve the objectives under the "Neighborhoods of Excellence" initiative to completely revitalize the inventory. As a result, quality of life for Navy families will be further eroded; the units will increasingly deteriorate and thus become obsolete; maintenance costs will grow disproportionately, as incremental fixes are applied to maintain the units available for occupancy; and the cost of revitalization will increase over time as necessary work is deferred.

10. DESCRIPTION OF PROPOSED CONSTRUCTION						
<p>This project encompasses wholehouse improvements and concurrent repairs to 85 housing units located at the Naval Construction Battalion Center, Port Hueneme, California. Work includes complete replacement of all kitchen cabinets, counters, sinks, vents, lines, fixtures, including installation of new ranges, hoods, dishwashers, connections, and painting; replacement of floor coverings in kitchens, baths, and living/dining spaces; refinishing of hardwood floors and stairways; installation of preformed, seamless bath enclosures, cabinets, lavatories, venting, and water lines; repair of water-damaged walls, floors, and ceilings; replacement of bathroom fixtures; replacement of water heaters and venting, wall furnaces and venting, gas lines, electrical lines, panels, plumbing systems, fixtures, GFI receptacles, TV cable and outlets, interior telephone lines, terminals, telephone boxes, windows, screens, all doors and hardware, gutters, downspouts; interior/exterior painting of all buildings; relocation of water heaters; provision of hard-wired smoke detectors with battery back-up; enhancement of the front entrances of all dwelling units in conjunction with door and window replacement; and reconfiguration of floorplans.</p>						
11. <u>REQUIREMENT</u> :						
<p>PROJECT: This project will provide improvements and concurrent repairs to 85 family housing units. It represents the first of three phases.</p>						

1. COMPONENT NAVY	94 FY 19__ MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION NCBC PORT HUENEME, CA		
4. PROJECT TITLE IMPROVEMENTS		5. PROJECT NUMBER HC/R-1-90
<p>REQUIREMENT: The Bruns Park Housing Complex, consisting of 285 housing units, was constructed in 1954. In 1957, the Navy purchased this housing and in 1960 converted it to public quarters; currently, all units are designated for enlisted personnel with dependents now assigned to NCBC. This project is needed to improve the habitability of these 38-year old housing units by making repairs and providing amenities to bring these dwellings up to the standard of other family units located on the Center.</p> <p>CURRENT SITUATION: Kitchen conditions reflect hard usage from many different occupants. Cabinets are scarred, shelves are missing, drawers no longer have glides, fronts are loose, and mismatched replacements are never satisfactory. Leaks have caused wood to stain, mildew and rot. Countertops are badly worn, scarred, burned, and spot repairs are not possible. Kitchen sinks are stained and the finish has worn through. All are discolored by hard water. Fixtures are worn out and replacement parts are not readily available. Range hoods have no finish left and the venting is in poor condition. Stop-gap repairs are no longer adequate for water lines, and disposal lines. Electrical lines and light fixtures require replacement. Floor coverings reflect hard usage and age and tile replacements are no longer available; mismatched patches are unsightly. The original hardwood floors show heavy wear. Some hardwood near the bathrooms will need replacement due to water damage. The stairways show the worst wear in the house. These have never been replaced or refinished since construction. Electrical service is totally deficient; the system is unable to handle the personal equipment that present day occupants have. The safety of the original wiring is questionable; outlets don't meet safety codes and the meter boxes encapsulate a mess of telephone line, old meter housing, and electrical panels. Due to the age of gas service lines inside the units, and their condition, complete replacement is needed. Phone lines are in need of replacement. TV leads in the walls also need to be replaced for outlets in the living room and master bedroom. Wall furnaces and present venting systems are inefficient and outdated; The upstairs bathrooms are the problem areas in greatest need of extensive repairs and improvements. Original plumbing fixtures are still in use in most of these bathrooms. Lavatories are cracked, counters are stained and burned, and many drawers are damaged and unable to be closed. Many mirrors have worn surfaces and all fixtures have been damaged by the hard water. Tubs and shower fixtures leak. Adjacent rooms have water-damage in most of the "up-and- down" units. Due to proximity to the ocean, the metal window frames found in these units have become deeply pitted and rusted, and the "crank-type" opening device is a continuous maintenance problem for every window. Many windows will not close properly and leaking occurs. All doors throughout these units show</p>		

1. COMPONENT NAVY	FY 19 ⁹⁴ MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION NCBC PORT HUENEME, CA		
4. PROJECT TITLE IMPROVEMENTS	5. PROJECT NUMBER HC/R-1-90	
<p><u>CURRENT SITUATION:</u> (continued)</p> <p>years of wear. Many of these doors are originals and the locks are inoperable. Some of the doors do not close properly; exterior doors and thresholds are damaged and locksets so worn the security is impaired. Battery operated smoke detectors are currently in use. Interior stairs are too narrow or too wide, and stairwells are inconveniently located.</p> <p><u>IMPACT IF NOT PROVIDED:</u> These units will remain undesirable from an assignment standpoint due to hard usage, worn appearance, and operation of outdated fixtures and appliances. Damaged cabinets, countertops, floors, walls and ceilings as well as poorly placed and mismatched lighting fixtures point out the fact that these units will continue to be high maintenance items and will continue to deteriorate even more if we are unable to carry out this project. Without these repairs and improvements, occupant dissatisfaction and demoralization will continue to increase. These on-base housing units do not meet the standard consistent with other housing units on the Center or with homes in the surrounding community; and finally maintenance expenses, and inconveniences, will continue to increase with poor damaged plumbing and electrical systems.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>This project will provide improvements and concurrent repairs for 200 family housing units located in the Corry Housing area at PWC Pensacola. Work includes installation of double pane windows and vinyl siding on the outside of each unit; construction of covers over the front entrance walkways; modification of front entrance ways; installation of additional insulation in attics; provision of fiberglass insulated exterior doors; installation of ground fault interrupter receptacles in bathrooms and kitchens; installation of fluorescent lighting fixtures in kitchens; replacement of existing HVAC systems, bathtubs and lavatories, tank type water closets, water piping, ceramic tile in bathrooms; kitchen cabinets; and carpeting.</p>				
11. REQUIREMENT:				
<p><u>PROJECT:</u> This project will provide improvements and concurrent repairs to 200 units located at the Corry housing area.</p>				
<p><u>REQUIREMENT:</u> These units were constructed in 1968. This project will correct deficiencies, bring units up to new construction standards, and extend their useful life. Moreover, this project will improve the quality of life for families living in this housing area.</p>				
<p><u>CURRENT SITUATION:</u> Windows are single pane, insulation in the attic must be added to reach an "R" value of 30. Electrical receptacles in the</p>

4. PROJECT TITLE IMPROVEMENTS		5. PROJECT NUMBER HR/C-3-92
<p><u>CURRENT SITUATION</u> (continued):</p> <p>kitchens and baths are not of the GFI type. Light fixtures are worn and damaged due to the high turnover of the Navy personnel. The bathroom fixtures are old and are becoming repair problems. Leaks have developed around tubs. Water piping is located in the overhead of the houses and is not wrapped to prevent freezing. The HVAC inefficient units are worn out and the thermostats should be replaced with an energy efficient setback type. A moisture infiltration problem has developed on the inside of the CMU walls which causes deterioration of the sheetrock.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Failure to provide this project will result in the loss of potential energy savings, increased maintenance costs, continued occupant discomfort, and continued deterioration due to moisture infiltration through the CMU walls. The investment required for these repairs/improvements will result in more usable, functional units and increase occupant satisfaction, while preserving the Navy's investment in their assets.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION						
<p>This project encompasses wholehouse repairs and improvements to 178 enlisted and officer housing units in Halsey Village. Work includes provision of hard wired smoke detectors and new suspended ceilings; relocation of outlets in kitchen and dining room walls; installation of central air conditioning, ceiling light fixtures with switches in bedroom, and electric outlets in bedrooms and kitchens; provision of light fixtures in basements; provision of GFI electrical receptacles; construction of garages, patios, and storage sheds; provision of privacy fencing; additional planting; weatherstripping of exterior doors; replacement of windows, storm doors, roofing, soffits, and roof vents; addition of ceiling in basements; replacement of tubs, tub enclosures, supply, and waste and vent piping; patching of ceramic tiles; replacement of closet doors; repairs to tot lots; replacement of furnaces and bath fixtures; and modification of kitchens, to include new cabinets, counters, and configuration.</p>						
11. REQUIREMENT:						
<p>PROJECT: This project will provide wholehouse improvements and repairs to 178 units located at Halsey Village at PWC Great Lakes. This project is phase II.</p>						

1. COMPONENT NAVY	FY 19 <u>9</u> MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION PWC GREAT LAKES, IL		
4. PROJECT TITLE IMPROVEMENTS		5. PROJECT NUMBER HC/R-1-86
<p>REQUIREMENT: The units at Halsey Village were built in 1962. Major repairs and improvements have not been accomplished on these units since they were built. This project will correct all deficiencies, bring the units up to new construction standards, and extend their useful life by another 25 years.</p> <p>CURRENT SITUATION: The cathedral type ceiling in the living/dining room and kitchen is an ineffective design feature which wastes energy. Unlike most of the other units in the Great Lakes inventory, these units are not air conditioned although central air conditioning is allowed according to DOD criteria in this location. Light fixtures in the bedrooms do not provide adequate lighting for bedroom or closet. Electric outlets in bedrooms are inadequate in number or location. Light fixtures in kitchen are inadequate, ineffective, and inefficient. Basements floors, walls or ceiling finishes are unfinished. Basement electrical wall outlets and fixtures are inadequate protection for severe climatic conditions in this area. Patios have not been provided for private outdoor living space. Storage sheds have not been provided for exterior bulk storage. Privacy fencing is needed between patios. Planting is very sparse. Weatherstripping for exterior doors is either worn, missing, damaged, and ineffectively or incorrectly installed. Windows are old, difficult to operate, poorly weatherstripped, single glazed, permit excessive air infiltration, badly worn, and do not have a thermal-break in the aluminum frame. Storm doors are poor quality and near the end of their useful life. Soffits and fascia boards are damaged, loose, and deteriorated. Soffit vents are inadequate in size. Gravel and asphalt roofs are at the end of their useful life. Attic insulation over bedrooms, closets, and halls is inadequate. Ductwork for living/dining and kitchen is not properly located and runs below the floor slab. Water is infiltrating. Ceiling in basement under the bathroom is damaged due to water leaks. Existing tubs and enclosures are a continual maintenance problem. The metal bifold closet doors are a constant maintenance problem. Tot lots are inaccessible and insufficient in number and amounts of equipment. Existing smoke detectors are battery operated, they require monitoring for proper operation, weak, dead, or missing batteries.</p> <p>IMPACT IF NOT PROVIDED: Navy families will continue to live in deteriorated units. The occupants of these units will not receive the same amenities and standards of living afforded to other occupants of Great Lakes housing. As a result, quality of life and satisfaction with the Navy will suffer. Deferral of this work will lead to higher revitalization costs in the future. Maintenance costs will increase as units are kept available for occupancy.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION This project provides essential exterior repairs to 19 historic units located at the United States Naval Academy. The work includes repairs/replacement of slate and copper roofs, repair of exterior building elements (e.g., pointing of brick), repairs/replacement of gutters and downspouts, restoration and repairs to exterior trim and porches, and abatement of lead-containing materials in the unit exteriors.				
11. REQUIREMENT: <u>PROJECT:</u> This project will provide extensive exterior major repairs to 19 historic officer units. <u>REQUIREMENT:</u> This project represents the first phase of a planned two-year exterior restoration program. It will protect the structural integrity of the units, make them weather-tight, and preserve significant historical features. The units in this phase were constructed between 1906 and 1911. There has been no significant investment in these units in the last 25-30 years. Although the units have been maintained over the years, their overall condition, due to their age, is such that work is needed now to correct deficiencies and bring them up to contemporary standards.

10. DESCRIPTION OF PROPOSED CONSTRUCTION This project encompasses wholehouse/site improvements and repairs to 93 enlisted units at Shenandoah Woods. Work includes provision of vinyl flooring in utility rooms; installation of a one-hour fire rated wall and ceiling assemblies in bulk storage closets; provision of additional kitchen wall cabinets, countertops, and new partitions; replacement of soffits; installation of powder room vanities; insulation of the attics; enlargement of bulk storage areas; installation of storage closets in garages, ceiling fans, spark ignition covers and humidifiers; screening of exterior exhaust ducts; covering exposed water pipes, replacement and installation of additional electric outlets and circuits; provision of concrete pads at utility room exits, insulation of exposed ducts; installation of privacy fencing in rear yards; replacement of interior, exterior, and garage doors including frames and hardware; repairs/ replacement of floors; repairs to concrete slabs, masonry walls, and joints in utility rooms and garages; replacement of kitchen countertops, cabinets, bathroom countertops and cabinets, windows, medicine cabinets, roof shingles, flashings, soffits and fasteners, and cracked bricks; repairs to foundation walls, expansion joints, and concrete pads; provision of splash blocks; replacement of porch column; replacement and adjustment of HVAC grilles; provision of volume dampers and high efficiency heaters; replacement of new lavatories; replacement/ installation of main circuit breakers and light fixtures; repairs to grounding connections; replacement of park benches; regrading of front and side yards; and repaving driveways.						

1. COMPONENT NAVY	FY 19 <u>94</u> MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION NAS WILLOW GROVE, PA		
4. PROJECT TITLE IMPROVEMENTS	5. PROJECT NUMBER HC/R-3-89	

11. REQUIREMENT:

PROJECT: This project will provide improvements and concurrent repairs to 93 enlisted units at Shenandoah Woods at NAS Willow Grove. This project represents the second and final phase of revitalization of this area.

REQUIREMENT: The units at Shenandoah Woods were built in 1978. There have been no major repairs or improvements to these units in the last 15 years. This project will correct all deficiencies, bring the units up to new construction standards, and extend the useful life of these units by another 25 years.

CURRENT SITUATION: Kitchens are poorly laid out and lack adequate storage space. Powder rooms lack sufficient storage space and water pipes are exposed on outside walls. There is no finished flooring in utility rooms. Laundry areas do not have sufficient number of convenience outlets and lack dedicated circuits for the modern home appliances. Existing tot lots and playground equipment are deteriorated. Front and rear entrance doors and rear utility room doors are of poor quality construction and the frames and thresholds are gouged and worn. Closet door tracks and hardware are damaged and do not fit properly. Kitchen walls and base cabinets are of poor quality construction. Countertops have lifted at the edges and have bubbles. Interior flooring and baseboards have deteriorated due to age and water damage from routine cleaning techniques. Sub-flooring on the second floor is not anchored to main floor. Bathroom sinks and vanities are chipped and marred. Interior finishes in bathrooms are delaminating. Medicine cabinets are rusting. Sliding patio doors and slider window in second floor bedrooms are difficult to open, the hardware is deteriorated and the pane is single glazed with no thermal break. Powder room access panelboards do not have adequate fire rating. Electrical panelboxes have no main power disconnect switches. Light fixtures are ungrounded and antiquated. Garage door frames are warped, rotten and do not provide weather tight seals. Asphalt roof shingles are worn, buckled and are lifting up. Gas fired furnaces are inefficient. Interior stair treads are split, defecting, and squeaky. Stair railings do not comply with safety standards. Some supply and return air grills are rusted and deteriorated and flange fasteners are not adequately secured to walls. Cement parging on foundation walls is spalling, cracked or missing.

3. INSTALLATION AND LOCATION NAS WILLOW GROVE, PA		
4. PROJECT TITLE IMPROVEMENTS	5. PROJECT NUMBER HC/R-3-89	
<p><u>IMPACT IF NOT PROVIDED:</u> Families will continue to live in deteriorated homes which lack many of the amenities found in other units in the Willow Grove inventory. Quality of life and satisfaction with the Navy will suffer. Electrical code violations will continue and occupants could be subjected to electrical shock in the kitchen/laundry area. Rooms will remain cluttered due to lack of proper storage space. Utility bills will remain high and energy will continue to be wasted.</p>

TOTAL REQUEST						6,693.5
Area Cost Factor = .92						
10. DESCRIPTION OF PROPOSED CONSTRUCTION <p>This project provides wholehouse/site repairs and improvements to 114 Torgersen family housing units. The work includes replacing kitchen cabinets and bathroom vanities, counter tops, sinks and bathroom exhaust fans and the installation of range hoods; replacing interior bi-fold doors, patio doors and storm doors, and mechanical and storage room doors; plumbing repairs and replacement of hot water heaters and all plumbing fixtures; repairing electrical system and replacement of service mains, exterior and interior light fixtures, and service panels; repairing roofs, replacing flooring; HVAC repairs and replacement of condenser units; repairing sidewalks, driveways, parking lots and repairing and resurfacing roads; installing landscaping; constructing brick fence around the patio and air conditioning equipment, and constructing playgrounds.</p>						
11. REQUIREMENT: <p>PROJECT: This project will provide all necessary wholehouse/site repairs and improvements to 114 enlisted family housing units at PWC Norfolk.</p> <p>REQUIREMENT: This project will correct all major structural, mechanical, and electrical deficiencies in these family housing units and site as well as provide quarters that are fully adequate, comparable to other local housing in the area, and fully energy efficient.</p>						

1. COMPONENT NAVY	FY 19__ MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION PWC NORFOLK, VA		
4. PROJECT TITLE IMPROVEMENTS		5. PROJECT NUMBER HC/R-24-91
<p><u>CURRENT SITUATION:</u> The kitchen cabinets and bathroom vanities can no longer be repaired. The aluminum storm doors and patio glass doors require replacement and are not energy efficient. The interior bi-fold closet doors are damaged beyond economical repair due to normal wear. The doors to the mechanical rooms need to be replaced. The plumbing system needs the replacement of the lavatory and kitchen faucets which are corroded and deteriorated. The bathtubs are old, deteriorated and unsightly. The bathroom exhaust fans are nearing their life expectancy and noisy. The gas domestic hot water tanks are reaching their normal and useful life expectancy and are showing signs of deterioration. The air conditioning system condensing units are approaching the end of their average life expectancy. The electrical service entrance cable is aged and weather damaged. The cable's outer insulation covering is worn to the point of exposing the inner wiring to the elements. Electrical service panels have reached their life expectancy and are inadequate for future wiring circuits. The lighting fixtures are aged and wiring is brittle due to normal wear, and have loose internal connections. The units do not have range hoods. Sidewalks, driveways, parking lots and roads have corner breaks, cracks and pot holes. There are no tot lots, sport courts, nor playgrounds located on this facility.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Repair and maintenance costs are increasing as the deterioration of various building components increase. Plumbing and electrical systems are becoming increasing difficult to repair without major demolition of walls and ceilings. Occupant attitudes will become increasingly more negative as the deterioration continues. Delay in project accomplishment only increases the maintenance/repair costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION						
<p>This project provides for wholehouse repairs and improvements to 98 units, detached carports, and other real property. Work includes installation of dishwashers, garbage disposals, cabinets, range hoods, countertops, stainless steel wall guards behind stoves, modification of kitchens, master bathrooms, and plumbing (3-BR units); provision of overhead bedroom/closet lighting; improvement of kitchen and bathroom lighting; installation of combination storm/screen doors, replacement of sliding glass patio doors and all windows; lowering of bathroom ceilings; improvement of bathroom and kitchen ventilation; installation of hard wired smoke detectors with battery backup; replacement of flooring and molding, water heaters; and repairs to siding, privacy fences, exterior storage and trash areas and interior and exterior painting. Other real property improvements and repairs include provision of additional off-street parking, steps on steep walkways, grading and paving on sides of carports, new sidewalks, rockery or retaining walls, playgrounds and landscaping; repaving of roads; repairs to sidewalks damaged by roots; replacement of broken parking bumpers; and relocation of catch basins.</p>						
11. <u>REQUIREMENT</u> :						
<p><u>PROJECTS</u>: This project will provide wholehouse repairs/improvements to 14 2-BR single level units, 48 3-BR townhouse units, 28 4-BR townhouse units, associated detached carports, and other real property. This project is phases II.</p>						

1. COMPONENT NAVY	FY 19 ⁹⁴ MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION NSY PUGET SOUND, WA		
4. PROJECT TITLE IMPROVEMENTS	5. PROJECT NUMBER HC-2-85	
<p>CURRENT SITUATION: Solid core entry doors, exposed to the elements since construction, show severe weathering. Combination storm/screen doors will allow added ventilation for the units in warm weather and improve resident comfort by reducing cold air infiltration and heat loss in colder months. Single glazed windows and patio doors are not energy efficient and do not operate freely in their present state. The 12 foot high bathroom ceiling cannot be cleaned by residents, and the seven foot high exhaust fans cannot ventilate the high area adequately. The lack of sufficient ventilation creates excessive moisture and mildew buildup on the bathroom ceilings which increases maintenance cost. Because no bedroom lighting is provided, residents are obligated to provide more than the usual amount of table lamps to light these rooms. Kitchens are small and inconvenient. The finish on range hoods shows the effects of abrasive cleanser and have become dented over the years. These units contain neither dishwashers or disposals. Kitchen cabinets and countertops, dishwashers, garbage disposals, and a more functional floor plan will provide a convenience which is already available to other family housing and community residents. Battery operated smoke detectors should be replaced with a hard-wired system containing a battery backup. Incandescent lighting should be replaced with energy efficient fluorescent type fixtures. Hardwood parquet flooring in living areas is too thin to be further sanded and refinished. Nine inch vinyl floor tiles, which have unsightly cracks and gaps caused by settling of the buildings, can no longer be matched. The base moldings and trim show wear and tear. Existing formica lavatory vanity shelving is chipped and stained. Rather than below sink storage cabinets, these bathrooms have only shelves. Medicine cabinet interiors are rusted. Fiberglass tubs have hairline cracks and are worn. Floor plan in main bath is a poor use of space and is inconvenient and cumbersome for the users. Minor modifications will alleviate this problem. Decking and rails have become weathered, and dryrot is pervasive. Plywood canopy shrouds over bedroom windows also show signs of dryrot and are extremely weathered. Lack of pedestrian walkways promotes cutting across landscaped areas, crating unsightly erosion. Grassy areas against the sides of the carports are always unkempt and promote pest infestation. Some paved sidewalks are too steep for a safe descent to the front door of the quarters and need to be replaced with steps and handrails. Parking is so limited that many occupants have only one parking space for their use. Lighting is minimal. Asphalt sidewalks are breaking up due to tree roots, parking bumpers are broken in numerous location, and catch basins are poorly located in the middle of pathways. Roads are in need of repairs. Areas which are too steep to mow are constant eyesores and sources of erosion.</p>

3. INSTALLATION AND LOCATION NSY PUGET SOUND, WA		
4. PROJECT TITLE IMPROVEMENTS		5. PROJECT NUMBER HC-2-85
<p><u>IMPACT IF NOT PROVIDED:</u> These are the only remaining units at Jackson Park without dishwashers and garbage disposals. Without improvements and repairs to these 90 units, energy waste and high maintenance cost will continue to escalate and the condition of the units will deteriorate at an accelerated rate. Lack of improvements and repairs on the other real property in this area will escalate erosion, promote accidents, and increase unsightliness of the area. Occupant dissatisfaction and demoralization will continue and, in all likelihood, escalate.</p>

3. PROJECT LOCATION NSI PACE SOUND, WA		
4. PROJECT TITLE IMPROVEMENTS		5. PROJECT NUMBER HC-1-91
<p>11. <u>REQUIREMENT:</u></p> <p>PROJECT: This project will provide wholehouse improvements to 34 two bedroom units, 38 three bedroom units, 28 four bedroom units, detached carports, and other real property.</p> <p>REQUIREMENT: These units at Jackson Park were built in 1968. With the exception of new roofs, no major repairs or improvements have been accomplished on these units in 20 years. Major repairs and improvements are required to these units in order to correct all deficiencies, bring the units up to new construction standards, and extend the useful life of these units by another 25 years.</p> <p>CURRENT SITUATION: Solid core entry doors, exposed to the elements since construction, show severe weathering. Single glazed windows and patio doors are not energy efficient and do not operate freely in their present state. Because no bedroom lighting is provided, residents are obligated to provide more than usual amount of table lamps to light these rooms. Further, this phase of construction was built on a heavily wooded area which tends to filter out much of the natural light. Kitchens are small and inconvenient. Kitchen cabinets and countertops are chipped, cracked and stained. The addition of new cabinets, countertops, and range hoods will provide a clean and more efficient layout. The vinyl sheet floor and floor tiles can no longer be cleaned. The floor coverings have unsightly cracks, tears, stains, and gaps caused by settling of the buildings. The base molding and trim show wear and tear. The bathroom hardware and accessories are chipped and stained. Bathrooms have no storage space or shelves. Medicine cabinet interiors are rusted. Tubs have scratches and stains. Bathtubs have no sliding glass door, water spills on to the floors and walls. Remove windows, install shelves and bathroom fans. Floor plan for first floor occupants cannot use this bathroom. Modifications will alleviate this problem. Battery operated smoke detectors should be replaced with a hard-wired system containing a battery backup. Plywood canopy shrouds over upstairs bedroom windows also show signs of dry rot and are extremely weathered. Lack of pedestrian walkways invites people to walk through landscaped areas creating unsightly damage. Grassy areas against the sides of the carports are always unkempt and promote pest infestation. Some paved sidewalks are too steep for a safe descent to the front door of the quarters and need to be replaced with steps and handrails. Parking is so limited that many families have only one parking space for their use. Lighting is minimal. Asphalt sidewalks are breaking up due to tree roots, parking bumpers are broken in numerous location and catch basins are poorly located in the center of pathways. Roads are in need of repaving throughout this area. Rockery and retaining walls are needed in areas too steep to mow. These steep</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION						
<p>This project proposes repairs and improvements to 27 enlisted and officer family housing units at NCTAMS WESTPAC Finegayan. Work includes replacement of architectural finishes (kitchen base and wall cabinets, bathroom tiles, vinyl floor tiles, exterior walls, weather stripping, exterior/interior doors and painting), plumbing (kitchen and bathroom exhaust fans, bathtubs, garbage disposals, bathroom access panels, water closets, lavatories, water heaters, range hoods and kitchen sinks); and electrical components (ground-fault outlets, disconnect switches and light fixtures); construction of carports with storage and driveways, trash enclosures, patios, privacy walls, additional half baths; and installation of dishwashers, sliding glass doors, gutters and downspouts.</p>						
11. <u>REQUIREMENT</u> :						
<p><u>PROJECT</u>: Provide repairs and improvements to 27 enlisted and officer family housing units.</p>						
<p><u>REQUIREMENT</u>: This project is required to restore the aesthetic and functional performance, convenience and comfort, and quality living environment of the housing unit and to enhance morale and stability of Navy families.</p>						

1. COMPONENT NAVY	94 FY 19__ MILITARY CONSTRUCTION PROJECT DATA	2. DATE
3. INSTALLATION AND LOCATION PWC GUAM, MI		
4. PROJECT TITLE IMPROVEMENTS		5. PROJECT NUMBER HC/R-8-85
<p>CURRENT SITUATION: The existing 30 year old Family Housing units are in poor condition due to ravages of the elements along with age. The architectural finishes are dilapidated and damaged by termite infestation, constant use and normal wear and tear. The plumbing fixtures, piping and accessories are pitted and the electrical system is malfunctioning due to rust and age. Cars are parked on the streets, exposed to corrosive elements which are extra harsh on Guam due to salt air, high temperatures and typhoons. During street cleanings, cars must be moved causing inconvenience to occupants. Lack of sufficient storage forces occupants to store personal property, tools, bikes, grills in the open resulting in rapid deterioration, danger to children and invitation to theft. The rear of the quarters is plain and provides no privacy for outdoor activities. Ten units are not equipped with dishwashers although these appliances are standard design features in modern homes. Rain puddles cause erosion and possible undermining of foundations without gutters and downspouts to divert water properly. Rain splatters also cause unsightly permanent soil stains on exterior walls.</p> <p>IMPACT IF NOT PROVIDED: Continued occupancy of these dwelling units in their present state of disrepair will accelerate their deterioration and have an adverse effect on the morale and retention of highly trained and skilled military personnel. Occupant relations will suffer, service calls and management problems will increase.</p>

<p><u>CURRENT SITUATION:</u> Roofs, downspouts, gutters and soffits are deteriorated and leak. Water heaters are at the end of their normal usable life. Interior doors, frames, and hardware are old, do not work properly and require replacement. Electrical wiring, fixtures, and switchcovers are aged and worn and present a shock and safety hazard, as well as provide unreliable service. Bathroom fixtures, plumbing and tile require replacement due to age and deterioration. Wooden floor structural supports are deteriorated as a result of settlement and moisture problems. The units do not have carports, enclosed entrance ways, or air conditioning. Fencing is deteriorated.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Repair and maintenance costs are increasing as the deterioration of various building components increase. Occupant attitudes will become more negative as the deterioration continues. Delay in project accomplishment increases the maintenance/repair costs.</p>		

DEPARTMENT OF THE NAVY
FAMILY HOUSING - FY 1994 BUDGET ESTIMATE
ADVANCE PLANNING AND DESIGN

(In Thousands)

FY 1994 Program \$22,924

FY 1993 Program \$14,200

Purpose and Scope

This program provides for working drawings, specifications and estimates, project planning reports, and final design drawings for construction projects (authorized or not yet authorized) and the development of Comprehensive Neighborhood Plans for the revitalization of family housing. This includes the use of architectural and engineering services in connection with any family housing new construction or construction improvements.

Program Summary

The amount requested will enable full execution of the construction program. Authorization is requested for appropriation of \$22,924,000 to fund new construction, improvements and major repair design requirements.

<p>10. DESCRIPTION OF PROPOSED CONSTRUCTION 10 USC authorizes funding for architectural and engineering services and construction design of military family housing new construction and construction improvement projects. Funds are required for continuation of a worldwide asbestos and lead screening effort and the development of Comprehensive Neighborhood Plans for Navy family housing.</p> <p>11. REQUIREMENT: VARIES All project estimates are based on sound engineering and the best cost data available. Design is initiated to establish project estimates in advance of program submittal to the Congress. At the preliminary design, final plans and specifications are then prepared. Costs for architectural and engineering services, turnkey evaluation, and construction design are not included in the construction project cost estimates. The presence of asbestos and lead (e.g. lead-based paint) is a major problem in Navy family housing. In Fiscal Year 1993, the Navy has embarked on a worldwide effort to inspect, screen, and test family housing for asbestos and lead contamination. The Navy will also initiate the development of Comprehensive Neighborhood Plans. The purpose of these plans is to integrate thematic approaches, such as overall base appearance and compatibility with the surrounding community into the revitalization program and will provide a basis for project phasing.</p> <p>IMPACT IF NOT PROVIDED: Project execution schedules for Fiscal Years 1995, 1996 and 1997 will not be met. Planning and Programming will suffer and continue on an ad hoc basis. This will result in costly change orders and differences in architectural themes and amenities in the same neighborhood.</p>					

**DEPARTMENT OF THE NAVY
FAMILY HOUSING - 1994 BUDGET ESTIMATE
OPERATION AND MAINTENANCE**

(\$000)

FY 1994 Program 731,724
FY 1993 Program 556,751

Purpose and Scope

a. **Operation.** This portion of the program provides for expenses in the following sub-accounts:

Management. Includes direct and indirect expenses incident to the administration of the family housing program such as housing office personnel and operations, administrative support, training, travel, programming and studies, and community liaison. All housing referral costs are also included, although the housing referral program assists personnel in locating housing in the private community, and is not related to the operation or management of military family housing units.

Services. Includes direct and indirect expenses incident to providing basic support services such as refuse collection and disposal, fire and police protection, pest control, custodial services for common areas, snow removal, and street cleaning.

Furnishings. Includes the procurement for initial issue or replacement of household equipment (primarily stoves and refrigerators) and, in limited circumstances, furniture; the control, moving and handling of furnishings inventories; and the maintenance and repair of such items.

Miscellaneous. Includes work or services performed for the benefit of family housing occupants, including mobile home hook-ups and disconnection, for which reimbursement will be received; payments to the U. S. Coast Guard for Navy occupancy of Coast Guard housing; and United Kingdom accommodation charges.

b. **Utilities.** Includes all utility services provided to family housing, such as electricity, gas, fuel oil, water and sewage. Excludes telephone services.

c. **Maintenance.** This portion of the program supports the upkeep of family housing real property, as follows:

Maintenance/Repair of Dwelling. Includes service calls, change of occupancy rehabilitation, routine maintenance, preventative maintenance, interior and exterior painting, and major repairs.

Other Real Property. Includes maintenance, repair and replacement of electrical, gas, water, sewage and other utility distribution systems located within family housing areas, and the portion of activity utility rates attributable to distribution system maintenance when separately identified.

Also includes maintenance and repair of any other family housing real property, such as grounds, surfaced areas and family housing community facilities.

Alterations and Additions. Includes minor incidental improvements to dwellings or other real property performed under the authority of 10 USC 2805. Larger scope or higher dollar value items are funded in the construction program.

Program Summary

Authorization is requested for an appropriation of \$721,659,000. This amount, together with estimated reimbursements of \$10,065,000 will fund the Fiscal Year 1994 program of \$731,724,000.

A summary of the funding program for Fiscal Year 1994 follows (in thousands):

	<u>Appropriation Request</u>				Reimburse-	Total
	<u>Operations</u>	<u>Utilities</u>	<u>Maintenance</u>	<u>Total</u>	<u>ments</u>	<u>Program</u>
Navy	\$149,738	\$156,698	\$316,054	\$622,490	\$ 8,265	\$630,755
Marine Corps	\$ 21,415	\$ 38,254	\$ 39,500	\$ 99,169	\$ 1,800	\$100,969
Total DON	\$171,153	\$194,952	\$355,554	\$721,659	\$10,065	\$731,724

JUSTIFICATION:

The Department of Navy family housing budget requests the minimum essential resources needed to provide military families with adequate housing either through the private community or in government quarters. Navy and Marine Corps installations are generally located in the high cost, coastal areas. Accordingly, the over inflated cost of adequate housing in these areas causes many of our military families to reside in facilities that lack even the minimal amenities expected in a home. Therefore, increased emphasis is being placed on the proper funding of the family housing Operations and Maintenance program.

The Fiscal Year 1994 estimated program was formulated utilizing the Office of Management and Budget's published inflationary factors and foreign currency exchange rates.

JUSTIFICATION
NAVY

OPERATING EXPENSES

<u>FY 1993</u>	<u>FY 1994</u>
\$114,359,000	\$149,738,000

The FY 1994 estimated program represents the Navy Family Housing requirements using Office of Management and Budget inflation factors and foreign currency exchange ranges. Reconciliation of estimates is provided for each program element as follows:

MANAGEMENT

<u>FY 1993</u>	<u>FY 1994</u>
\$58,573,000	\$77,251,000

Reconciliation of Increases and Decreases

	<u>(\$M)</u>
1. FY 1993 President's Budget Request Amended	58.6
2. FY 1993 Appropriated Amount	58.6
3. FY 1993 Current Estimate	58.6
4. Price Growth	4.5
a. Inflation	(4.5)
5. Program increases	14.2
a. Acquisition of automated systems	(7.4)
b. Quality of Life enhancements	(6.8)
6. FY 1994 President's Budget Request	77.3

RATIONALE FOR CHANGES IN THE MANAGEMENT ACCOUNT. Funding adjustments are proposed in the Family Housing Management Account for defense business operations price increases, inflation and restored funding deleted during the BRCC II assessment for those activities later removed from the closure list. In addition, the request continues the CNO direction to upgrade quality of life by implementing improvements to the availability and delivery of customer services at the activity housing offices i.e., expanding office hours, expanding off base showing services, enhancing referral services, expanding customer service training, pursuing implementation of deposit waiver programs, conducting home buying and selling workshops and installing state of the art computer and office equipment at various activities.

SERVICES

FY 1993
\$33,259,000

FY 1994
\$36,461,000

Reconciliation of Increases and Decreases

	(\$M)
1. FY 1993 President's Budget Request Amended	33.3
2. FY 1993 Appropriated Amount	33.3
3. FY 1993 Current Estimate	33.3
4. Price Growth	2.0
a. Inflation	(2.0)
5. Program increases	1.2
a. Services for new units coming on line	(.4)
b. Recycling initiatives	(.8)
6. FY 1994 President's Budget Request	36.5

RATIONALE FOR CHANGES IN THE SERVICES ACCOUNT. Funding adjustments are proposed in the Family Housing Services Account for inflation and restored funding deleted during the BRCC II assessment for those activities later removed from the closure list. The funding adjustments also include additional indirect support costs for fire and police protection, and costs associated with providing pest control, street cleaning, snow removal, refuse collection, and trash disposal for newly acquired units, and for newly enacted city, county and state ordinances for recycling.

FURNISHINGS

FY 1993
\$21,459,000

FY 1994
\$34,893,000

Reconciliation of Increases and Decreases

	(\$M)
1. FY 1993 President's Budget Request Amended	21.5
2. FY 1993 Appropriated Amount	21.5
3. FY 1993 Current Estimate	21.5
4. Price Growth	.6
a. Inflation	(.6)
5. Program increases	12.8
a. Expanded overseas loaner furnishings program	(3.4)
b. Upgraded kitchen equipment	(5.5)
c. Installation of window coverings	(3.9)
6. FY 1994 President's Budget Request	34.9

RATIONALE FOR CHANGES IN THE FURNISHINGS ACCOUNT. Funding adjustments are proposed in the Family Housing Furnishings Account for a basic furnishings program with increases included for inflation and restored funding deleted during the BRCC II assessment for those activities later removed from the closure list. In addition, the request continues the CNO direction to upgrade quality of life through a program called Neighborhoods of Excellence (NOE) by providing quality, energy efficient appliances, window coverings; and overseas, providing loaner furniture consistent with U.S. standards and what

Army and Air Force families already receive. The Navy relies primarily on the local community to house Navy families. Local community homes outside the U.S. generally lack stoves, refrigerators, kitchen cabinets, closets, washers, dryers and vary in their electrical voltage. This program will provide stoves, refrigerators, washers, dryers, electrical transformers, wardrobes and kitchen cabinets. These items will be made available to Navy families for the duration of their tour, thus increasing the livability of off-base units and eliminating the cost of procuring these items to the military members. In addition, the loaner furnishings program will allow for provision of furniture for families arriving in overseas locations while their household goods are in transit (normal shipping time can exceed 3 months).

MISCELLANEOUS

<u>FY 1993</u>	<u>FY 1994</u>
\$1,068,000	\$1,133,000

Reconciliation of Increases and Decreases

	(\$M)
1. FY 1993 President's Budget Request Amended	1.1
2. FY 1993 Appropriated Amount	1.1
3. FY 1993 Current Estimate	1.1
4. FY 1994 President's Budget Request	1.1

RATIONALE FOR CHANGES IN THE MISCELLANEOUS ACCOUNT. Funding adjustments are proposed in the Family Housing Miscellaneous Account for the United Kingdom's revised method of computing the U.K. Accommodation Charges.

UTILITIES

<u>FY 1993</u>	<u>FY 1994</u>
\$158,962,000	\$156,698,000

Reconciliation of Increases and Decreases

	(\$M)
1. FY 1993 President's Budget Request Amended	159.0
2. FY 1993 Appropriated Amount	159.0
3. FY 1993 Current Estimate	159.0
4. Price Growth	7.5
a. Inflation	(7.5)
5. Program decreases	-9.8
a. base closures and realignments	(-9.8)
6. FY 1994 President's Budget Request	156.7

RATIONALE FOR CHANGES IN THE UTILITIES ACCOUNT. Funding adjustments are proposed in the Family Housing Utilities Account for defense business operations increases and inflation. The program decrease is for those units the will be removed from Navy family housing inventory as a result of base draw downs, closures and realignments.

MAINTENANCE

FY 1993
\$196,290,000

FY 1994
\$316,054,000

Reconciliation of Increases and Decreases

	(\$M)
1. FY 1993 President's Budget Request Amended	226.4
2. Congressional Adjustments	-30.1
3. FY 1993 Appropriated Amount	196.3
4. FY 1993 Current Estimate	196.3
5. Price Growth	4.9
a. Inflation	(4.9)
6. Program increases	119.3
a. full funding of routine maintenance requirements	(92.1)
b. backlog reduction of projects less than \$15K	(27.2)
7. Program decreases	-4.4
a. Government of Japan burden sharing	(-4.4)
8. FY 1994 President's Budget Request	316.1

RATIONALE FOR CHANGES IN THE MAINTENANCE ACCOUNT. Funding adjustments are proposed in the Family Housing Maintenance Account for defense business operations increases and the inflation costs associated with maintaining over 74,000 family housing units. In addition, this request continues the CNO direction to upgrade the quality of life for Navy families through a program called Neighborhoods of Excellence (NOE) by fully funding annual maintenance requirements, funding minor repair projects (less than \$15K) to reduce the backlog, expanding hours maintenance will be performed, performing maintenance through appointment, and providing additional self help materials to the residents. Program decreases are reimbursements received from the Government of Japan for utility burden sharing. Reimbursements received from the Government of Japan will be expended in the Maintenance Account as the utility costs must be paid in advance.

REIMBURSABLE AUTHORITY

FY 1993
\$8,265,000

FY 1994
\$8,265,000

Reconciliation of Increases and Decreases

	(\$M)
1. FY 1993 President's Budget Request Amended	8.3
2. FY 1993 Appropriated Amount	8.3
3. FY 1993 Current Estimate	8.3
4. FY 1994 President's Budget Request	8.3

RATIONALE FOR CHANGES IN THE REIMBURSABLE ACCOUNT. There are no funding adjustments proposed in the Family Housing Reimbursable Account.

b. minor repair projects	(2.6)	
7. Program decrease		(-.4)
a. Program decrease for program realignments	(-.4)	
8. FY 1994 President's Budget Request		39.5

RATIONALE FOR CHANGES IN THE MAINTENANCE ACCOUNT.

Program estimate provides for price increases associated with maintaining over 23,000 new and existing family housing and 600 801 lease units. Other increases are costs associated with increase in maintenance service contracts to allow for maintaining the present level of occupant service calls, change of occupancy, and routine maintenance and minor repair backlog. Program decrease is a result of the realigning of funds from the maintenance account to the utilities account for essential requirements. Repairs scheduled for execution have been deferred to offset the requirements in the operations account. Deterioration of family housing assets has continued unabated. Neglect of minor repair may result in large repair costs in the outyears.

4. PROJECT TITLE GENERAL AND FLAG OFFICERS QUARTERS	5. PROJECT NUMBER	
<p style="text-align: center;">DEPARTMENT OF THE NAVY FY 1994 BUDGET GENERAL/FLAG OFFICERS QUARTERS (GFOQs) WHERE ANTICIPATED MAINTENANCE AND REPAIR WILL EXCEED \$25,000 PER UNIT</p> <p>This information is provided in accordance with the reporting requirement established by the Conference Appropriations Committee Report dated 21 December 1987. The information provides the details for those GFOQs where the maintenance and repair obligations in FY 1994 are expected to exceed \$25,000 per unit. Operations include the prorated costs for management of family housing, services such as fire and police protection, refuse collection, entomology, snow removal, and furnishings. Utilities include applicable costs for energy (electricity, gas, fuel oil, steam, and geothermal), water and sewerage. Maintenance and repairs include recurring work such as service calls, preventative maintenance, routine change of occupancy work, and major repairs. This includes all operation and maintenance costs to the dwelling unit, appurtenant structures and other related area and facilities intended for the use of the general or flag officer. In those quarters designated as historical, major work is coordinated with the appropriate State Historic Preservation office. These quarters are identified as National Historic Register (NHR), or eligible to be on the National Historic Register (ELIG) or are in an Historical Thematic District (HTD).</p>

MCB CAMP PENDLETON	1152	9,199	4,105	55,416	(0)	68,720	0
<p>Operations consists of management, services, and furnishings. Maintenance and repair includes routine recurring maintenance, replacement of the dishwasher, and two repair projects. The repair projects will replace the exterior siding (\$23,900) and roof (\$9,600). In 1994, the exterior siding will be 15 years old. It is painted wood (clapboard), has a recurring termite infestation problem, the finish is rough due to previous sandblasting (1987), has no insulation, and contains lead paint. The wood siding will be replaced with vinyl, which has a useful life of 20 years. The roof will be 14 years old in 1994 and is made of foam which was sprayed on and painted. A foam roof has an estimated useful life of 15 years. It has discolored and deteriorated due to the climate and birds. The roof will be insulated and replaced with a shingle or tile roofing material. It has only one level with 4 bedrooms and 3 bathrooms. (Year built: 1943; NSF: 2,353)</p>

<p>Operations consists of management, services, and furnishings. Maintenance and repair includes routine recurring maintenance, change of occupancy maintenance work, interior painting, and a project to remodel the kitchen (\$40,000). The project will reconfigure the kitchen to obtain maximum utilization of the space available. The kitchen is 17'4" x 12'1" and is configured into two areas--one for cooking and the other as a dinette. The project will remove existing walls to the studs; reconfigure the cooking and dinette areas; replace cabinets, windows, and floor covering; upgrade the appliances; and provide adequate lighting. It has only one level with 3 bedrooms and 2 bathrooms. (Year built: 1959; NSF: 1,901)</p>

JUSTIFICATION

Domestic Leasing Program Summary: The domestic leasing program is authorized in 10 USC 2828 as amended, which limits the number of units authorized at any one time and specifies the maximum cost limitation. This program consists of leasing on an interim basis until Section 801 and/or military construction (MILCON) units come on line.

Section 801 of the FY 84 Military Construction Authorization Act (PL 98-115) authorizes the Department of Defense to enter into agreements for the leasing of Military Family Housing units on or near military installations within the United States. This authorization was considered a test and would have expired upon execution of contracts no later than 1 October 1985. The Navy sites chosen for testing Section 801 were Norfolk, Virginia, and Earle, New Jersey. The Section 801 program was made permanent in FY 1992. The Department of the Navy has awarded contracts for Section 801 projects at Norfolk, VA (300 units), Earle, NJ (300 units), Mayport, FL (200 units), Staten Island, NY (1,000 units), Washington, DC (600 units), Washington, DC (Summerfield-414 units), Port Hueneme/Point Mugu, CA (300 units), Pensacola, FL (300 units), and Twentynine Palms, CA (600 units). A total of 475 new units at Summerfield, Port Hueneme, Twentynine Palms and Staten Island are scheduled to come on line in FY 1994.

Domestic Leasing Fiscal Year Summary:

FY 1992 - The domestic lease program consisted of 1,540 units that required funding of \$20,816.4. Funding in the amount of \$19,298.7 provided funding for the Section 801 projects at Earle, Norfolk, Mayport, and Washington, DC. An additional \$1,517.7 supported domestic short term leases in Washington, DC, Staten Island, NY, Guam and San Diego, CA, Public Works Center and Marine Corps Recruit Depot.

FY 1993 - The domestic lease program consists of 4,144 units requiring funding of \$56,663.3. Funding in the amount of \$49,015.0 is requested to provide funding for Section 801 projects at eight Navy and Marine Corps activities. The remaining \$7,648.3 is required to support domestic short term leases in Washington, DC, Staten Island, NY, Guam, Puget Sound, WA, San Diego and at three Marine Corps Bases in California--San Diego, Camp Pendleton and El Toro.

FY 1994 - The domestic lease program consists of 4,683 units requiring funding of \$65,690.0. Funding in the amount of \$56,353.0 is requested to provide funding for Section 801 projects at eight Navy and Marine Corps activities. The remaining \$9,337.0 is required to support domestic short term leases in New London, CT; Washington, DC; Guam; Puget Sound, WA; Norfolk, VA; and at the San Diego, CA, Public Works Center and Marine Corps Recruit Depot.

Foreign Leasing: Leasing in foreign countries is authorized in 10 USC 2828, which limits the number of units authorized at any one time and specifies the maximum cost limitation.

The FY 1992 unit authorization consisted of 3,217 units of which 1,504 required funding. The additional leases supported the leasing program at Naples, La Maddalena and Sigonella, Italy, and individual leases at Rome, Italy and Rota, Spain. The FY 1992 request also included the buyout of leases at Holy Loch, Scotland, that closed in June 1992.

The FY 1993 unit authorization consists of 3,217 units of which 2,481 require funding. The authorization difference of 736 is to support lease initiatives at Naples, Sigonella and La Maddalena, Italy, and Rota, Spain, that do not require funding until FY 1994.

The FY 1994 unit authorization consists of 4,229 units and funding for 2,845 of those units. The authorization difference of 1,384 is to support lease initiatives at Naples, Sigonella and La Maddalena, Italy, and Rota, Spain, that do not require funding until FY 1995.

FY 1994
FAMILY HOUSING, NAVY
DEBT PAYMENT
(\$000)

	(In thousands)
FY 1994 Program	\$ 88
FY 1993 Program	\$ 90

Purpose and Scope

The requirement for the payment of principal and interest on the remaining indebtedness for Capehart and acquired Wherry housing has been completed. All mortgages have been paid off as of 30 September 1988 for the Wherry housing and as of 30 September 1989 for the Capehart housing. The only remaining requirement for this program is the payment of Servicemen's Mortgage Insurance Premiums to FHA for mortgages assumed by active military personnel on housing purchased by them.

Program Summary

Authorization required for the appropriation is \$88,000. No reimbursements will be used to finance the FY 1994 program pursuant to Section 511, Public Law 96-418.
